THE UNITED REPUBLIC OF TANZANIA

PRESIDENT'S OFFICE

REGIONAL ADMINSTRATION AND LOCAL GOVERNMENT

KASULU TOWN COUNCIL

FORM FOUR PRE-MOCK EXAMINATION

CODE: 013 **GEOGRAPHY**

Time: 3:00 Hours **Wednesday, 21.05.2025**

INSTRUCTIONS

1. This paper consists of section A, B and C with total of **eleven (11)** questions
2. Answer **all** questions in section A and B and any **two (2)** questions from section C.
3. Section A carries **sixteen (16)** marks, section B carries **fifty-four (54)** marks and section C carries **thirty (30)** marks.
4. Map extract **of LIWALE** (Sheet 280/4) is provided

MsomiBora.com

SECTION A (16 marks)

Answer **all** questions in this section

1. For each of the items (i)-(x), choose the correct answer from among the given alternatives and write its letter beside the item number in the answer sheet provided.

(i) In order rain to be formed it has to pass through some stages as an expert in geography studies identify the correct processes of rain formation.
A. Cooling, evaporation, condensation and precipitation
B. Evaporation, cooling, precipitation and rainfall
C. Evaporation, cooling, condensation and rainfall
D. Evaporation, precipitation, condensation and cooling
E. All the above.

(ii) Soil is among factors which determines economic activities together with:
A. Climate.
B. Type of zone
C. Nature of people
D. Agricultural activities
E. Equatorial zones

(iii) The tourist reported enjoying the temperature of Ihefu wetland in Mbeya at 1500 meters above sea level, which is 32C. They also planned to travel from Ihefu to Unguja in Zanzibar which is at sea level. What might be the temperature experienced by the tourist in Zanzibar?
A. 23°C B. 0.6 °C C. 9 °C D. 41 °C E. 19 °C

The name given to a boundary that demarcates solid materials from the molten mantle is known as:
A. Asthenosphere
B. Gutenberg
C. Mohorovic
D. Mesosphere
E. Core

(iv) All the following are famous tourist attraction sites in Tanzania except?
A. Mikumi wildlife, Tarangire and Ruaha reserve.
B. Serengeti national park, Mount Kilimanjaro and Mikumi
C. Selous reserve, Tarangire and Mikumi Park
D. Tsaro, Turkana and Oldonyo Lengai
E. Tarangire, Ruaha reserve and Serengeti national park

(v) Dormant volcanic mountains are those which:
A. Have never experience eruption
B. Have erupted once but are no longer active
C. Continue to erupt occasionally
D. Erupt only when there is an earthquake
E. Erupt every year.

(vi) The atmosphere is said to be humid only when:
A. It is saturated with water vapour
B. It is unsaturated with water vapour
C. It contains water vapour
D. It does not contain water vapour.

(vii) Suppose you are living in urban center and you are interested in keeping livestock. What type of livestock keeping would be suitable for you?
A. Nomadism

B. Ranching
C. Transhumance
D. Pastoralism
E. Sedentary

(viii) Robert is living near the mountain within the time he noticed the bending of truck of trees and fences downward the slope. Identify the type of process occurred.
A. Land slide
B. Mudflow
C. Soil creep
D. Rock fall
E. Soil erosion

(ix) Suppose you want to carry out a field study on factors which use to classify the climate of the place, what are best components of weather you are going to consider?
A. Temperature and rainfall
B. Temperature and cloud cover
C. Rainfall and sun shine
D. Cloud cover and humidity
E. Sunshine and humidity

2. Match the items in list A with the correct response in list B by writing the letter of the corresponding response beside the items number in the answer sheet (s) provided

i. Used to measure relative humidity of the atmospheric pressure ii. Used to determine direction towards wind which is blowing iii. Used to measure atmospheric pressure iv. Used to measure and record he duration of sunshine v. Used to measure amount of rainfall vi. Used to measure temperature of a place	A. Campbell stokes B. Evaporimeter C. Anemometer D. Hygrometer E. Thermometer F. Rain gauge G. Barometer H. Wind vane

Section B (54 Marks)
Answer all questions from this section

3. Carefully study the map extract of **LIWALE** (sheet 280/4) and answer the questions that follow:

a) Briefly describe two possible reasons for the growth of Liwale town

b) Giving reason, identify the dominant type of rock in the mapped area

c) Describe three characteristics of the rock mentioned in (a)

d) Calculate the area covered by woodland at grid reference of 820130 and 870130

e) Show the methods used to show Liwale town

4. (a) Classify three pollutants from manufacturing industries.

   (b) Explain five effects of these pollutants to the people and environment.

5. A group of researchers from Kasulu District assigned a research work to find out critical reasons and solutions for truancy among students.

   a) You as a student, advice the researchers on best procedures to follow to have a successful work.

   b) Briefly explain any four uses of the findings obtained from research

6. After learning different types of simple land survey students were asked to explain fruits of studying of chain survey but only Yoweri failed to explain. Assume you are a student who understood the lesson, how will you help him to explain fruits of chain survey? (Any six points)

7. A sudden shake and vibration of the earth's crust may have a number of outcomes

   (a) What is his geographical phenomenon

   (b) Outline four (4) outcomes of the phenomenon mention in (a) above

   (c) What is the instrument would be used to measure the intensity of the hazard named in (a)

   (d) Describe four (4) causes of the hazard in (a)

8. Carefully study the photograph provided below and then answer the questions that follows.

a) Name the crop shown in the photograph above.

b) Mention three necessary physical conditions for the growth of the crop.

c) With two reasons determine the type of photograph

d) Mention two contributions of economic activity taking place.

SECTION C (30 Marks)

Answer only two (02) questions from this section

9. Construction of Nyerere dam helps Tanzanians to earn advantageous than disadvantageous, as a student who studied regional focal studies in form two what you think Tanzanians will enjoy for that project.

10. Human activities enable the livelihood but in other hand they destroy the environment. Justify this statement by using six points that environmental problems resulted from human activities.

11. The Minister of national resources and Tourism in Tanzania has been so much active in promoting tourism sector. Despite the economic significance of the sector, there are negative impacts to our country. Elaborate this statement by giving six points.

GEOGRAPHY MARKING SCHEME FORM FOUR PRE-MOCK

1. 10 Marks (@ 1 mark)

i	ii	ii	iv	v	vi	vii	viii	ix	x
C	A	A	C	D	A	C	E	C	A

2. 06 Marks (@ 1 mark)

i	ii	iii	iv	v	vi
D	H	G	A	F	E

3. A. -Trade: due to presence of market located at grid reference 822166
- Transportation: presence of road from 870158 to 810165

B. Sedimentary rock due to Liwale located near the coast region which dominated by sedimentary rocks (1 mark)

C. (i) have no definite shape
(ii) They are soft (2 marks)
(iii) They arranged in layers

D. Area= Full square+ $\frac{Half\ square}{2}$ ×area of single square

Full square= 21
Half square= 9 (3 marks @ 1)

$\frac{1}{2}$)

21+(9÷2)
21+4.5= 25.5
Area of single square
1km ×1km = $1km2$
25.5 × $km2$= $25.5km2$
Therefore area is $25.5km2$

MsomiBora.com

E. (i) Place name eg Liwale
(ii) Grid reference example 807177 and 826177 (2 marks)
(iii) Contour lines located all over the map

4. A (3 marks)
Pollutants from manufacturing industries are.
(i). Industrial solid wastes
(ii). Liquid pollutants
(iii). Noise pollution
(iv). Gases

B. (6 marks)
Effects are;
(i). Eruption of diseases
(ii). Environmental degradation

(iii). Global warming
(iv). Climatic change
(v). Reducing fertility of the soil.

5. . A. Procedures are,
(i). Identifying geographic research problem
(ii). Research objectives
(iii). Formulation of hypothesis and research question
(vi). Pre survey or reconnaissance
(v). Research design
(vi). Data collection
(vii). Data processing and analysis.
(Viii). Data presentation and interpretation
(ix). Report writing
B. Uses are.
(i). They are useful in advancing knowledge which improves and develop the society.
(ii). They enable the researcher to identify the needs of the society.
(iii). They help to find solutions to problems facing society.
(iv). Creates critical thinking among the researchers.

6. Fruits of chain survey are.
(i). The equipment can easily replace.
(ii). It does not involve complicated mathematical calculations
(iii). It involves few people to conduct the exercise
(iv). It does not deal with angular measurements.
(v). It is simplest and commonest techniques of surveying exercise.
(vi). It save time.

7. (a) Earth quakes (1 marks)
(b) (i) Advantages (2 marks)
-introduction of new species in a new area
-it leads soil formation
-it helps in geographical studies i.e in literature review in research
-it can create tourist attractions eg water falls
(ii) Dis advantages (2 marks)
-it leads destruction of properties
-it leads loss of life
-it leads loss of habitat
-rise of famine and hunger
(c) Instrument used to measure the intensity of the hazard mentioned in (a) is SEISMOGRAPH (1mark)
(d) (3 marks)
(i). Volcanic eruption
(ii). Fire outbreak
(iii). Plate tectonic movements
(iv). Mass movements such as landslides

8. A. The crop shown is Maize (1mark)
B. Necessary physical conditions are. (2 marks)
(i). Availability of fertile soil
(ii). Warm temperature

(iii). Annual precipitation ranging from 635mm to 1145mm
(iv). Grows better in a deep rich soil of the sub tropics with abundant nitrogen.
C. The type of photograph is ground photograph. Reasons. (3 marks)
(i). The object seen clearly
(ii). It covers a small area
(iii). It shows only the front view of the object.
(iv). It has three major parts which are fore ground, middle ground and background.
D. Contributions of economic activity taking place are (3 marks)
(i). Source of food
(ii). Source of employment
(iii). Increases government revenue
(iv). Source of income to the people

9. (i). Employment opportunities
(ii). Development of infrastructures
(iii). Development of other sectors such as industrial sector. 15 marks
(iv). Increases government revenue
(v). Improves standard of living among the people.
(vi). Increases international relationship.

10. Environmental problems resulted from human activities are.
(i). Deforestation caused by agricultural activities
(ii). Loss of biodiversity due to overgrazing and agricultural activities
(iii). Drought due to industrial activities
(iv). Global warming caused by industrial and poor agricultural activities
(v). Environmental degradation caused by mining and industrial activities 15 marks
(Vi). Climatic change influenced by industrial and farming activities
(vii). Desertification caused by industrial and mining activities.
(viii). Water pollution caused by poor fishing activities

11. Negative impacts of tourism are.
(i). Cultural interference and conflicts
(ii). Moral decay
(iii). Environmental degradation 15marks
(iv). Terrorism
(v). Eruption of diseases
(vi). Exploitation of resources. etc
