THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
MARKING SCHEME FOR GEOGRAPHY EXAMINATION
FORM FOUR - 2024.

SECTION A (16 MARKS).

01 (i) E
(ii) A
(iii) B
(iv) C
(v) A
(vi) C
(vii) B
(viii) A
(ix) D
(x) A

10 @ 1 mark

02. (i) D
(ii) E
(iii) F
(iv) C
(v) B
(vi) A

6 @ 1 mark

SECTION : B (54 MARKS).

3. (a) (i) objective of the Map drawn.
(ii) Date of compilation.
(iii) Nationality of the Cartographer.

3 mark @ 1 mark

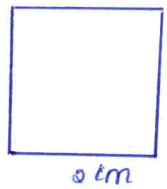

(b) SOLUTION

FULL SQUARE = 2
HALF SQUARE = 10

½ mark

$SQUARES = F.S + \frac{H.S}{2}$

$S = 2 + \frac{10}{2} = 2 + 5 = 7$ squares.

= Total = 2 marks

Scale = 1 : 50,000

½ mark

1km = 100,000cm
? x = 50,000 cm
= ½ km

1cm = ½ km
2cm = ?
= 1 km

½ mark

Area of 1 square = S x S
= 1km x 1km
= $1km^2$

If Area of Square = $1km^2$
7 squares = ?
= $7km^2$

½ mark

3 (c). (i) Contours
(ii) Form lines
(iii) Spot height
(iv) Trigonometric station.

3 marks @ 1 marks

(d) DATA

Vertical Increase = 20cm
Scale = 1:50,000
Map distance = 26.4cm
Ground distance = ?

SOLUTION

M.D = 26.4cm
Scale = 1:50,000c

½ mark

1km = 100,000cm
x = 50,000cm

$x = \frac{50,000 \text{ cm km}}{100,000 \text{ cm}}$

$x = \frac{1}{2}$ km

½ Marks

= 2 marks

1cm = ½ km
26.4cm = x

= 13.2 km

½ Mark

∴ Because he go back again, the total distance will be 13.2km x 2

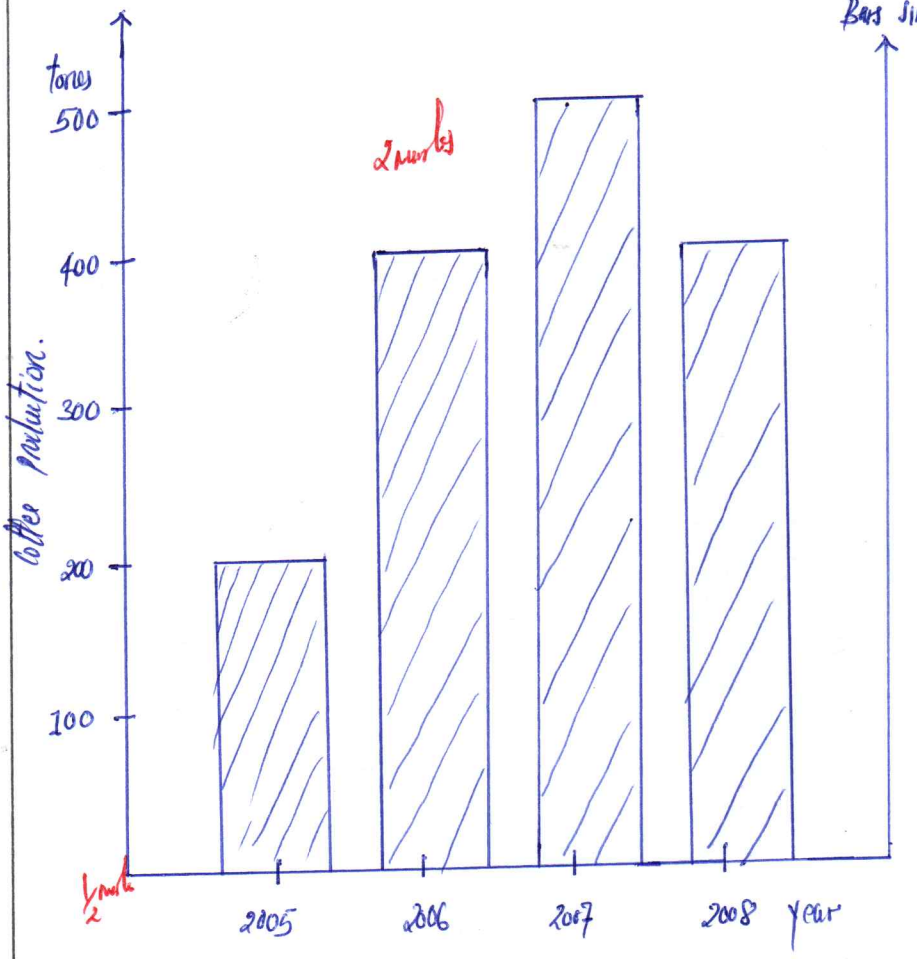

= 26.4 km

½ mark

4. SOLUTION.

(a) (SUITABLE TITLE) ½ mark

Scale eg.
V.S = 2cm rep 100 tones. ½ Mark
H.S = 2cm rep 1 year
Bars size = 1.4cm

= 4 marks

Key.
▨ – Coffee production. ½ mark

(b) Merits.
- Easy to read and interprete.
- Have a good impression.
- It used to compare production. 3 marks @ ½

Demerits.
- It represent only one item.
- It does not offer comparison of different variables
- It consume space if data are many

(c) - Simple line graph
- divergent bar graph 2 mark @ 1

5 (a) Formulation of hypothesis. 1mark

(b) (i) Null hypothesis.
(ii) Alternative hypothesis. 2@1mark

(c) - A student to give any three characteristics of hypothesis, 3marks

(d) - A student to describe any three Importance of ~~identify~~ hypothesis. 3marks

06. (a) Chain Survey. 3marks

(b) (i) Obstacle that obscure visibility example, Hill, buildings etc.

(ii) obstacle that do not obscure visibility example Swamp, river etc 2@1mark

(c) (i) Chain.
(ii) Tape Measure.
(iii) Arrows.
(iv) A Note book. 4marks@1

7. (a) Aerial / Vertical photographs. 3marks

(b) - It is used for land planning.
- It is used for Security.
- It is used for drawing a Map. 3marks@1

(c) - It is Costfully.
- It can be hindered by natural weather phenomenon like heavy rain, clouds etc
- It need skills. 3marks@1

08. (a) Volcanic eruption. 3marks

(b) (i) Habitat distruction.
(ii) Soil Degradation.
(iii) Pollution.
(iv) climate change
(v) loss of biodiversity.

5 mark @ 1 mark

SECTION C

09. A student is required to explain the importance of road transport over air transport, example.

- It is cheap / cost effectiveness
- It can move in a short distance (Accessibility).
- Environmental impact.
- Suitability for certain goods like perishable goods
- Support local economies .etc.

30 mark @ 15 marks

10. A student to explain ways of Improving farming example,

- Use of quality seeds.
- Proper weed Management.
- Use of Modern tools
- Proper farming Method like crop rotation etc.

11. A student to explain factors influencing population distribution in Tanzania, example;

- climate.
- Soil.
- water bodies
- Social services .etc.
