PRIME MINISTERS OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
ARUSHA REGION
FORM FOUR PRE - MOCK EXAMINATION
GEOGRAPHY — MARCH - 2026
MARKING GUIDE

1. (i) C
(ii) B
(iii) C
(iv) C
(v) B
(vi) C
(vii) B
(viii) B
(ix) C
(x) C

10 @1 = 10

2 (i) H
(ii) C
(iii) B
(iv) A
(v) F
(vi) I

06 @1 = 06

3 a) Natural vegetation
- Due to the presence of unevenly distributed vegetation around Manyara
- Due to the presence of woodlands around Mahali pa nyati 01
- Due to the presence of scrubs around CHEM CHEM

b) The relief is both highland and lowland
- Highland due to the presence of compacted contours near KILIMANJARO 02 @1
- Lowland due to the presence of dispersed contours near MTO WA MBU

(c) The climate of Mto wa mbu is equatorial climate due to - Area is located along latitude 3° 20's
- Due to the presence of Mto wa mbu 02
- Due to the presence of evergreen vegetations.

(d) Land uses
i) Fishing due to the presence of Mto wa mbu
ii) Lumbering due to the presence of woodlands
iii) Tourism due to the presence of Mahali pa nyati 4points @½ = 02
iv) Education due to the presence of schools etc

3 (e) Area = Full sq + Half sq / 2

0sq + 15sq / 2

= 0 + 7.5sq

= 7.5sq 01

From the scale 1: 50,000

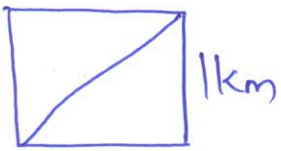

1km = 100,000 cm

x = 50,000 cm

$x = \frac{1km \times 50,000 cm}{100,000 cm}$

1cm = ½

Then 2cm = 1km 01/2

1sq = $1km^2$

7.5sq = x

$x = \frac{7.5sq \times 1km^2}{1sq}$

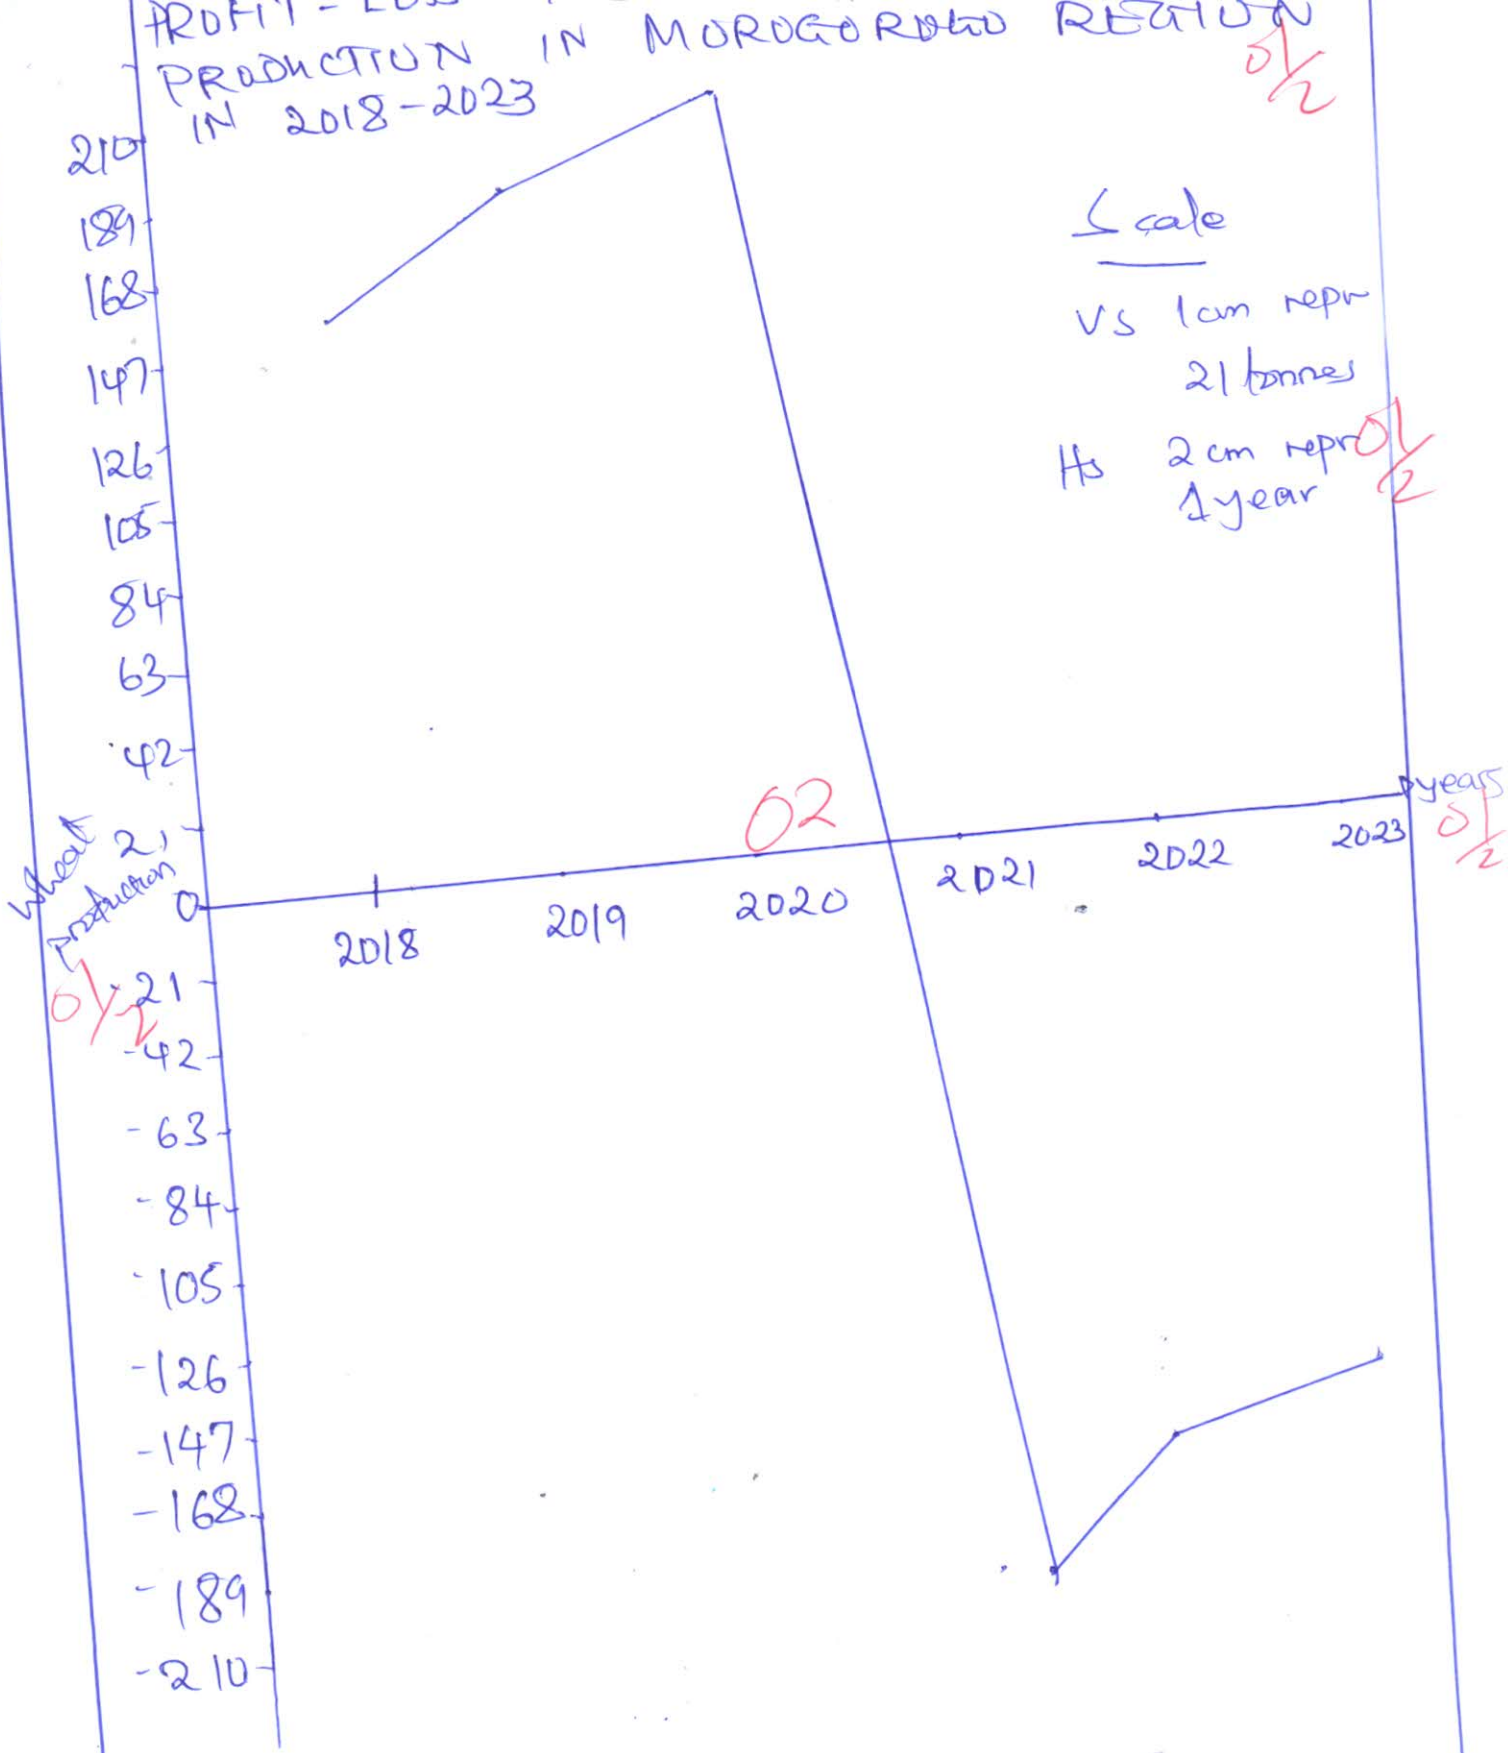

$7.5 km^2$ 01/2

4 (i) Profit - loss line graph on wheat

Wheat (x)	$\bar{x}$	Deviation $(x - \bar{x})$
560	$\bar{x} = \frac{\Sigma fx}{N}$	560 - 403.7 = 156.3
592		592 - 403.7 = 188.3
600	$= 2422$	600 - 403.7 = 196.3
200		200 - 403.7 = -203.7
230	$= 403.7$	230 - 403.7 = -173.7
240		240 - 403.7 = -163.7

01/2

PROFIT - LOSS
PRODUCTION IN MOROGORO REGION
IN 2018-2023

Scale

Vs 1cm repr 21 tonnes

Hs 2cm repr 1 year

4 (ii) Merits of profit-loss line graph
- Simple to read
- Easy to construct
- It shows variation
- Helps in determing profit and loss.

3 points @½ = 1½

(iii) Years that the production is below mean are 2021-2023 01

iv) The production is decreasing due to
- Poor science and technology
- Low rainfall
- Low market demand etc

01

v) The data of the data given is grouped data. 01

09

5. a) Chain survey - 2

b) Gross/human error - 01

c) The total obstacle
- Is the obstacle that obscur visibility and can-not be walked around

⇒ It is overcomed by pythagorus theorum 03 with diagram and procidures to overcome

d) - Arrow
- Peg
- Ranging poles

with diagram 03@1

09

6 a) Qualitative research approach 02

b) Non-probability sampling technique 02

c) i- To know the causes of abortion in Arusha region in the year 2025

ii- To identify the effects of abortion on academic performance in the year 2025 03@1

iii- To solve the effects caused by abortion on academic performance in the year 2025.

d) EFFECTS OF ABORTION ON ACADEMIC PERFOMANCE IN ARUSHA REGION IN THE YEAR 2025. 02

09

7. a) Vertical photograph 02

Reason with evidences

- Taken at angle 90°
- covers large area

b) Vertical photograph	Horizontal/ground photo
- Taken at angle 90°	Taken at angle 180°
- Its scale decrease from centre outwards	its scale decreases from the foreground to the background
- Covers the large area	It covers small area

4points @1 = 04

7 (c) Factors affecting the quality of photograph

- Camera shake
- Object movement
- Weather condition
- Quality of camera
- Experience of photographer. etc

3@1 = 3

09

8 i-a) Hydraulic action
b) Corrasion / Abrasion
c) Attrition
d) solution

3 points @1:3

ii- Features resulted from wave erosion

a) Wave cut platform
b) caves & ledges
(c) Blowholes
(d) Geo
(e) Natural arch
(f) Stack
(g) Stump

4 points @ 1½ = 6

SECTION C

9. Introduction

Rapid population growth — 02

Main body

- Effects of rapid population growth
  - i- Soil erosion
  - ii- Poverty
  - iii- Increase in unemployment
  - iv- Environmental pollution
  - v- Loss of biodiversity
  - vi- Inadequate for agriculture etc

6 points @ 2 = 12

Conclusion

Any related — 01

10. Introduction

Textile industry — 02.

Main body

Challenges facing textile industry
- outdated machinery and technology
- High cost
- unreliable power supply
- Insufficient labour
- Competition
- High taxes
- Poor infrastructure
- Poor management
- High cost of chemicals etc.

6 points @ 2 = 12

Concl

Any related. — 01

11. Introduction

soil — 01

Main body

Factors for soil formation

- Climate
- Relief / topography
- Living organisms 3points @ 2 = 6
- Parent rocks
- Time

Physical properties of the soil

- soil texture
- soil structure
- soil density 3points @ 2 = 6
- soil colour
- soil porosity etc

Conclusion

Any related. — 01
