REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

IRINGA, LINDI AND MOROGORO FORM FOUR REGIONAL MOCK EXAMINATIONS, 2024

)DE: 013 GEOGRAPHY

ME: 3 HOURS **May, 2024**

STRUCTIONS

1. This paper consists of three sections A, B and C with the total of eleven (11) questions.
2. Answer all questions from section A and B and two (2) questions from section C.
3. Section A carries sixteen (16) marks, section B carries fifty-four (54) marks and section C carries thirty (30) marks.
4. Map extract of Mpanda sheet 153/3 is provided.
5. Programmable calculators, cellular phones and any other unauthorized materials are NOT allowed in the examination room.
6. Write your examination number on every page of your answer sheets.

MsomiBora.com

SECTION A (16marks)

Answer all questions from this section

1. For each of the following items (i)-(x), choose the correct answer from among the given alternatives and write its letter beside the item number in the answer sheet(s) provided.

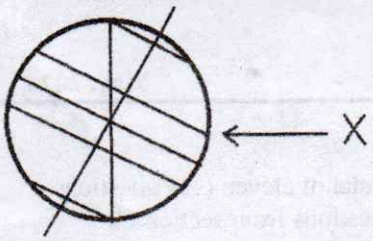

i. **Taifa Stars** scored first goal against **Algeria** at 7:10 PM at Mkapa stadium in **Dar es Salaam (15^0E)** in what time does the goal observed in Algeria (45^0W) where some Tanzanians were watching the same game?

A. 11:10 AM
B. 10:00 AM
C. 03:10 PM
D. 12:30 AM
E. 03:10 AM

ii. Mr. Kombo is an educated Maasai who is now keeping his cattle in one permanent place, he does not move from one place to another looking for pastures and water and instead he grows pastures in his farm for feeding his cattle. What is the general term of livestock keeping system Mr. Kombo is practicing?

A. Nomadic Pastoralism
B. Semi-nomadic Pastoralism
C. Transhumance
D. Sedentary livestock keeping
E. Shifting Cultivation

iii. Three students of form one were debating on the below diagram they didn't reach on conclusion on the dates of position of the overhead sun at noon, as form four, what could you advise them on the following date that overhead sun occur?

A. 22nd December
B. 21st March
C. 21st June
D. 23rd September
E. 23rd June

iv. The old man was astonished when he heard about the presence of heavenly bodies that revolve around the sun mostly between the orbits of Mars and Jupiter. As a geographer who passed through secondary education what name of these objects you would use to tell the old man?

A. Meteors
B. Planets
C. Asteroids
D. Comets
E. Satellites

v. Halima and her mother were moving along the river Wami to see how the river erode and transport its loads. Halima's mother wandered on how fragments are worn out during collision of carried loads in the river during rainy season which result to smooth – rounded stones. The daughter told her mother that the process she learned from the geography subject, what is the name of the process Halima named to her mother?

A. Hydration action
B. Attrition
C. Abrasion
D. Corrosion
E. Hydrolysis

vi. The tourism development is highly facilitated by a major key factor in Tanzania, as a form four student suggest that key factor.

A. Availability of strong capital invested in the sector
B. Availability of well developed science and technology as that used in S.A
C. Presence of many tourists' attractions
D. Presence of many skilled and knowledgeable personnel
E. Presence of well developed transport and communication in all places over the country

vii. Bukoba district experienced shaking of crustal rocks which led to destruction of properties and death of people. Suggest the point where this shaking originate within the earth's crust?

A. At the epicenter
B. Near the border with Uganda
C. At the fault
D. At Lake Victoria
E. At the focus

viii. Natural gas yields important by-products such as sulphur, hydrogen and helium. So it is an important raw material for the chemical industry. What can you tell your fellow students the major use of natural gas?

A. Generating nuclear bombs
B. Making plastic
C. Generating power
D. Generating by-products
E. Domestic use only

ix. The Amazon and the Congo basins are regions characterized by the same geographical background to human activities, climate, vegetation and relief. What could be the general term for these regions?

A. Natural
B. climatic region
C. Natural vegetation
D. Natural resources
E. Natural landscape
F. Natural tropical

x. Geography subject teacher prepared a lesson about soil concept on the vertical section showing the sequence of horizons. What does the concept meant?

A. Soil texture
B. Soil profile
C. Soil horizon
D. Soil Structure
E. Soil water

2. Match the descriptions of concept of soil in list A with their corresponding response of soil in list B beside the item number in the answer sheet

LIST A	LIST B
i. Status of soil with respect to the amount of elements necessary for plant growth	A. Soil type
ii. Removal of the materials from the surface of the land	B. Soil profile
iii. Vertical section of the soil to the underlying rocks	C. Soil porosity
iv. Fineness and coarseness of soil particles	D. Soil texture
v. Residuals that have decomposed and mixed with soil mass	E. Soil structure
vi. The total volume of open spaces between soil particles which can either be filled with water or air	F. Soil fertility
	G. Soil organic matters
	H. Soil erosion
	I. Soil water

SECTION B (54 marks)
Answer all questions from this section

3. Study carefully the map of **MPANDA (sheet 153/3)** and then answer the questions that follows.
   (a) Observe the grid reference 854063 (Kasokola church) and Shanwe water hole grid reference (854013).
      (i) The two points are intervisible?
      (ii) State the reason of your response in (i) above?
   (b) Describe the population distribution of the area.
   (c) Outline 3 types of vegetation shown on the mapped area
   (d) With concrete evidence state the climate of Mpanda

4. Carefully study the following data and answer the questions that follow;

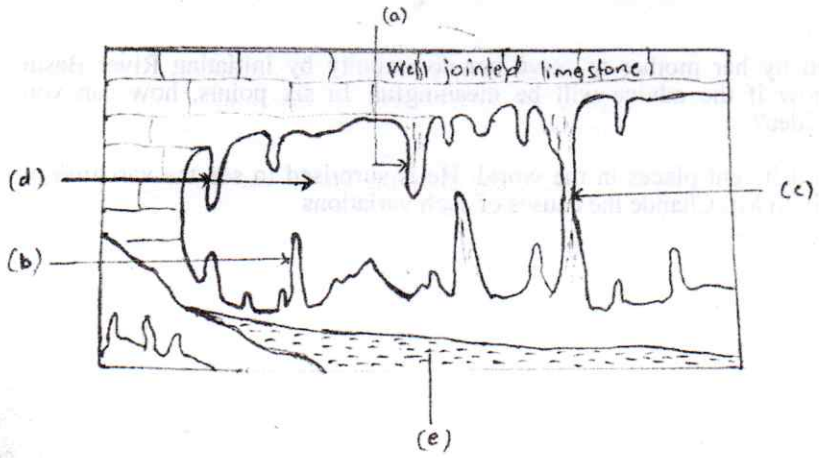

Production of food crops in Morogoro region in tones

YEAR	MAIZE	BEANS	RICE	WHEAT	POTATOES
2018	800	140	300	560	560
2019	600	260	290	592	400
2020	450	430	500	530	300
2021	320	430	230	575	120
2022	410	230	130	600	230
2023	605	152	230	230	200

   a) Draw the divergent bar graph to present rice production
   b) Briefly explain four merits of using divergent bar graph
   c) In which year the production of rice was below the mean?

5. The survey can be classified by considering various criteria, amongst criteria is basing on equipment that are used
   a) Explain briefly four equipments used in conducting chain survey
   b) Suggest two Errors that can occur during the chain survey

6. Study the diagram of karst region below and then answer the questions that follow

   a) Name all labbed features from letter a – d seen on the diagram
   b) Briefly explain the formation of features labbed a and c
   c) Outline four important of lime stone region to human

7 Suppose you want to conduct geographic research on illegal fishing in your society and your interest is to know fishing methods practices by residents

a) Name two major respondents on your research.
b) Outline four reasons why it is necessary for a researcher to consider ethical issues when conducting geographical research.
c) Name three appropriate research tools which might be used on a given research.

8 Study carefully the photograph below then answer the questions that follow: -

(a) With two evidences suggest the type of photograph.
(b) Suggest economic activity that might be taking place in the area
(c) Suggest three possible regions in Tanzania where the photograph might have been taken
(d) Suggest 4 negative impacts of activity to the environment

SECTION C (30 marks)

Answer two (2) questions from this section

9 The process by which flora of the given area decrease and eventually disappear is becoming a worst and predominant problem in most parts of the world. As a geographer explain by using six strong points on how to minimize the problem.

10. Mainda is a rich person who was advised by her mother to serve her community by initiating River Basin Development Project. But she doesn't know if the advice will be meaningful. In six points, how can you encourage Mainda to implement her mom's idea?

11. Mr. Chande is a diplomat who travelled in different places in the world. He is surprised to see the variation of population in the world. In six points, explain to Mr. Chande the causes of such variations
