MUDA: Saa 3

Jumanne, 11- 08- 2020.

Maelekezo

1. Karatasi hii Ina sehemu A, B na C zenye jumla ya maswali **kumi na mbili (12).**

2. Jibu mswali yote kutoka sehemu A, B na chagua maswali **matatu (3)** kutoka sehemu C.

3. Zingatia maagizo ya **kila sehemu** na **kila swali**.

4. Simu za mkononi na vitu vyote visivyoruhusiwa **havitakiwi** katika chumba cha mtihani.

5. Andika **namba yako ya mtihani** katika kila ukurasa wa kijitabu chako cha kujibia.

SEHEMU A : (alama 15)

Jibu maswali yote katika sehemu hii.

1. Chagua herufi ya jibu sahihi katika vipengele (i) hadi (x) kisha andika herufi ya jibu hilo katika kijitabu chako cha kujibia

Maswali

(i) Neno gani linaweza kujitokeza kama kitenzi kishirikishi
A. Anaimba B. Huyu C. Alikuwa D. Nimesafiri E. Mtoto ( )

(ii) Sentensi sahihi huwa na miundo mingapi ya kitenzi
A. Miwili B. Mitatu C. Minne D. Mmoja E. Haina ( )

(iii) **"Vizuri vinajiuza"**. Neno **"vizuri"** katika sentensi hii ni aina gani ya neno?
A. Kielezi B. Kivumishi C. Kitenzi D.Kiwakilishi E. Nomino ( )

(iv) Katika neno **"nimemkamata"** kiambishi **"me"** kinadhima ya
A. Kuonyesha nafsi B. Wakati uliopita C. Urejeshi mtendwa
D. Hali ya masharti E. Wakati timilifu ( )

(v) Neno **"Nzi"** lina silabi ngapi?
A.Tatu B. Moja C. Nne D. Mbili E. Tano ( )

(vi) Njia ipi ya kuhifadhi fasihi simu lizi iliyoibuka kutokana na maendeleo ya sayansi
A. Njia ya kichwa B. Njia ya maandishi C. Njia ya simu
D.Njia ya kanda za sinema na video E.Njia ya magazeti ( )

(vii) Kati ya wahusika wafuatao yupisi aina ya muhusika wa fasihi simulizi?
A. Binaadamu B. Wanyama C. Lugha D. Vitu na mahali
E. Hadhira ( )

(viii) Vifuatavyo ni vipashio vidogo kabisa vya kiisimu isipokuwa?
A. Sentensi B. Konsonati C. Mofimu D.Irabu E. Silabi ( )

(ix) Mtindo wa lugha unapatikana katika madaya
A.Kamusi B. Viambishi C.Misimu D.Rejista E. Ngeli ( )

(x) Ni jambo gani linalodhihirisha upekee wa kazi fulani ya kifasihi?
A. Muundo wa kazi husika B. Wahusika wa kazi husika C. Jina la kazi husika
D. Jina la mtunzi wa kazi husika E. Mtindo wa kazi husika ( )

2. Chagua kifungu cha maneno kutoka **orodha A** kinachotoa maelezo sahihi ya kifungu cha maneno katika **orodha B.** Andika herufi ya jibu sahihi kando ya namba ya kipengele cha swali katika kijitabu chako cha kujibia.

Orodha A	**Orodha B**
i) Kuandika ujumbe mfupi	A: Hatua ya sita ya uandishi barua rasmi.
ii) Kuandika anuani ya mpelekewa	B: Hatua ya kwanza katika uandishi wa simu.

Orodha A	Orodha B
iv) Jina la muandishi v) Kichwa cha habari	D: Hatua ya pili ya uandishi wa kadi ya mualiko. E: Hatua ya pili ya uandishi wa simu. F: Hatua ya kwanza ya uandishi wa kadi ya mualiko. G: Hatua ya tatu ya uandishi wa barua rasmi. H: Hatua ya tatu ya uandishi wa simu.

SEHEMU B : (ALAMA 40)

Jibu maswali yote katika sehemu hii.

3. Toa mifano mitano (5) ya njia ya kufananisha sauti katika uundaji wa maneno.

4. "Mofimu ni kipashio kidogo cha kiisimu chenye kutoa maana kisarufi au kimsamiati," Kwa maana hiyo ya mofimu toa mifano mitano (5) tofauti ya mofimu huru.

5. a. Utata katika mawasiliano huweza kusababishwa na mambo mengi.Taja mambo manne yanayoweza kusababisha utata katika mawasiliano.

   b. Vipi tunaweza kuondoa utata katika mawasiliano? Orodhesha mambo manne wanayopaswa kuzingatia na wazungumzaji katika kuondoa utata katika mawasiliano.

6. Eleza shughuli nne (4) zilizosaidia kukuza na kueneza Kiswahili kabla ya kuja kwa Waingereza nchini

7. Taja mambo matano (5) muhimu ya kuzingatia katika utungaji mzuri wa Insha na eleza umuhimu wa kila jambo

8. Soma kifungu cha habari kifuatacho kisha jibu maswali kwa kuandika herufi ya jibu sahihi pembeni ya nambari ya swali.

Mwenyezi Mungu Muumba wa Mbingu na Ardhi na vyote vilivyowemo, ndiye Mpangaji wa utaratibu mzima wa maisha ya mwanaadamu kuanzia kuzaliwa kwake hadi kufa kwake. Ndiye yeye anayeshusha mitihani ya kila aina kwa wanaadamu,ili kuwapa majaribio juu ya mitihani hiyo. Mwenye kuwa na subira ndiye atakaeshinda na yule atakaeshindwa ndie aliyekula hasara, moja ya mitihani hiyo ni "Maradhi".

Maradhi ni mtihani mkubwa ambao mwanaadamu ameekewa kwa kujaribiwa kuwa atashukuru au atakufuru. Wengine husema ni adhabu kwa kukithiri maovu ya mwanaadamu, adhabu au mtihani wa maradhi una siri nzito, hasa pale mwanaadamu unapompata na asijue dawa ya kumponesha haraka ama kuuguwa kwa muda mrefu, wengiwetu hushindwa kuwa na subira na kuanza kufeli juu ya mtihani huo. Vyeo huanza kutolewa kwa waungu watu ambao huchukua madaraka ya Mwenyezi Mungu na kuwa wao ndio wenye uwezo mkubwa wa kuondoa maradhi hayo.

Hawa huwana macho ya ziada ya kuona lililomsibu mgonjwa na hatima ya mbele vipi itakuwa, lakini hakuna liwalo juu ya yote hayo bali ni kuongeza mitafaruki ya koo, familia na hata jamii, huwatumia hata viumbe visivyokuwa sisi kuwasaidia katika kujua habari nyingi za kifamilia ila mwisho wa yote hakuna liwalo,nikupoteza vitu na mali tu.

Maradhi mengine hushika mpaka ulimwengu na kusababisha majanga makubwa kwa binaadamu na hata wanyama wengine, shughuli za kiuchumi, kiutamaduni na kitaalamu zote huzoreteshwa na maradhi hayo, waganga wakuu wa wanaotegemewa na mataifa hushindwa kupata dawa ya kunusuru majanga hayo.

Hapo mwanaadamu anaanza kubadili njia na kukumbuka kuwa yupo ambae ndie Mshushaji wa mitihani hii, hivyo watu hugeuza upande na kuanza kufungua nyumba za ibada kwa kutafuta dawa ya maradhi hayo, hata wale waliokuwa wakiziona haziwahusu, kwa hali hii huwa ni mstari wa mbele juu ya ibada hizo, hapo ndiyo binaadamu anapata ukumbusho kuwa ulimwengu haujiendeshi unaendeshwa na muendeshaji mwenyewe ni Mwenye nguvu na Mwenye hekima afanya alitakalo, muda autakao, pahala atakapo bila kuangalia matakwa ya watu fulani.

Maswali

(a) Pendekeza kichwa cha habari hii kisichozidi maneno matatu.

(b) Unafikiria kwanini wanaadamu hushindwa kuwa na subira wanapopata maradhi?

(c) Mwandishi anaposema **"Macho ya ziada"**, ana maana gani?

(d) Kutokana na habari hii taja maradhi mawili yanayofaa kutolewa mfano kama ni mtihani au adhabu.

SEHEMU C : (ALAMA 45)

Jibu maswali matatu (3) katika sehemu hii.

9. Umeteuliwa kushiriki katika shindano la uandishi wa Ngonjera la Wilaya ya kati, Tunga ngonjera yenye beti nne(4) kuhusu Ugonjwa wa korona (Covid 19).

10. Kwa kutumia diwani mbili ulizosoma, elezea namna zinavyolenga kujenga taifa jipya la kisasa

11. "Kazi moja ya msanii ni kuwapambanisha wahusika ili kuweza kuibua maudhui ya kazi husika.' Thibitisha kauli hiyo kwa kutumia riwaya mbili ulizosoma

12. "Tamathali za semi huiboresha kazi ya msanii". Fafanua usemi huo kwa kutumia tamthili ya mbili ulizosoma

GEOGRAPHY

(For Both School and Private Candidates)

Time: 3 Hours **Wednesday, 12th August 2020**

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.

2. Answer **all** questions in sections A and B and any **two (2)** question from section C.

3. Map extract of **TABORA (Sheet 118/2)** is provided.

4. Credit will be given for the use of relevant diagrams.

5. Programmable calculators, cellular phones and unauthorized materials are **not** allowed in examination room.

6. Write your **Examination Number** on every page of your answer booklet(s)

SECTION A : (15 Marks)

Answer all questions in this section.

1. For each of the items **(i) - (x),** choose the correct answer from among the given alternatives and write its letter beside the item(s) number in the answer booklet(s) provided.

(i) Autumn, winter, spring and summer are the result of:
A. Monsoon B. Lunar eclipse C. Rotation. D. Revolution.
E. Tides. ( )

(ii) Sima and sial are separated by the zone called:
A. Sialic B. Mohorovic discontinuity C. Mesosphere.
D. Conrad discontinuity. E. Gutenberg discontinuity. ( )

(iii) The shallow part of the sea that stretches out from the coast is called
A. Continental shelf B. Continental slope C. Ocean ridge
D. Ocean trench E. Island. ( )

(iv) These are objects with leading heads and bright tails in the sky:
A. Comments B. Comets. C. Steroids. D. Meteorites
E. Planets. ( )

(v) Prediction of the state of atmosphere in a region for 24 to 48 hours is known as
A. weather elements B. weather report C. weather instrument
D. weather station E. weather forecasting ( )

(vi) A large part of the Southern Hemisphere is covered by
A. Land mass B. Volcanoes C. Water mass

D. Dark clouds E. Ice. ( )

(vii) If the temperatures at 500 metres where the tourists start climbing mount Kilimanjaro is 20°C. What will be the temperature when they reach 2,000 metres above sea level?
A 10°C B 5°C C 11°C D 12°C E 15°C ( )

(viii) A cirque is
A. an arm-chair shaped depression on a glaciated lowland area
B. an arm-chair shaped depression on the sides of a glaciated mountain
C. an arm-chair shaped depression in the desert areas
D. an arm-chair shaped valley in glaciated areas
E. an arm-chair shaped depression on the plateau. ( )

(ix) ……. Are lines drawn through places having the same amount of cloud cover?
A. Isohalines B. Isonephs C. Isotherms D. Isobars E. Isohyets. ( )

(x) The last solar eclipse in Tanzania was happened on
A.Tuesday,21st June 2018 p.m. B. Friday,21th June 2019p.m.

2. Match the descriptions of Marine features in **Column A**with the corresponding feature in **Column B** by writing the latter of the correct answer beside the item number in the answer booklet provided.

Column A		Column B	
(i)	Is the perpendicular or steep face of the rock along the sea coast?	A.	Cave
(ii)	Is the long ridge of sand running parallel to coast and separated from it by lagoon.	B.	Tombolo
(iii)	Is the feature formed as a result of the bar of sand or shingles linking an Island and mainland?	C.	Natural arch
(iv)	Is the narrow ridge of the pebbles or sand joined to the land at one end with the other end terminating in the sea.	D.	Cliff
		E.	Overhanging cliff
(v)	Is the roof like structure formed as a result of headland being eroded right through from one side cave to another side of the headland?	F.	Barrier beach
		G.	Spit

SECTION B : (55 Marks)

Answer all questions in this section.

3. Study the map extract of Tabora (Sheet 118/2) and answer the following questions.

   (a) Calculate the area covered by whole part of the mapped area in km^2.
   (b) By providing evidences from the map suggest the climate experienced by the area portrayed.
   (c) Examine the settlement patterns of the area.
   (d) Describe four social activities which are taken on the area.
   (e) Identify the main features found at grid references shown below
      (i) 758403
      (ii) 807425
      (iii) 751408
      (iv) 786456

4. Demographic processes that were conducted in Zanzibar **2012** show that the total population of Zanzibar was **1,303,569** people. Thenpopulation was categorized according age structure, sex and economic level and presented using different statistical methods, as a geography student
   (a) Suggest type of statistic used to present the data.
   (b) Briefly explain the significances of the type of statistic mentioned in (a) above.
   (c) Outline the methods that can be used to represent statistical data.

5. The geography Teacher of Fumba Secondary School taught his student's survey topic theoretically when they are in class room, the next day wants to do it practically and He told them to find the materials that will be used to draw the map of their school compound. The teacher wants one among of his student to go and demonstrate the procedure that will be used in their surveying process.
   (a) Suggest the type of land survey that will be used on their surveying process.

(b) Describe any five instruments that will be used in the type of survey named (a) above.
(c) What are the merits of the type of survey used in (a) above.

6. Explain briefly the following concept as applied in research.
(a) Descriptive research
(b) Applied research
(c) Quantitative research
(d) Research tools
(e) Sampling techniques

7. Carefully study the following photograph and answer the questions that follow.

(a) What the type of photograph? given three reasons.
(b) Identify the way of transport shown on the photograph.
(c) What are the benefit of the way mentioned in (b) above.
(d) Suggest two ways that can be applied to improve the quality of the area shown.
(e) In what time was photograph taken. Give reason.

SECTION C : (30 Marks)

Answer two (2) questions from this section.

8. (a) Rocks are the aggregates of minerals in solid state where by different social and economic activities depends on the types of rock found in that area. Outline the type of rock according to mode of formation and give one example of each.

(b) Explain any six (6) essential of the rock to human kinds.

9. An agricultural activity in Tanzania is like a light in the darkness for its economic development. Justify this statement by providing eight (8) points.

10. Describe five environmental problems caused by forestry and give four possible ways for forests sustainability.

   x. The president had to think very carefully before he came to a _____ to buy cars for MPS.
   (a) decision (b) judgment (c) proposal (d) resolution (e) conclusion ( )

2. Match the expressions in **list A** with the word in **list B** by writing the correct letter beside the item number in the answers sheet given.

LIST – A		LIST – B	
i.	Look at that ripe _____ of banana	A.	Swarm
ii.	The village was invaded a _____of hungry wolves	B.	School
iii.	We saw a _____ of I was in the park	C.	Pack
iv.	There was a big _____ of people in the meeting	D.	Tree
v.	She was stung by a _____ of bees	E.	Pride
		F.	Group
		G.	Crowd
		H.	Team
		I.	Bunch
		J.	Hordes

SECTION – B (40 MARKS)

Answer all questions in this section

3. Rewrite the following sentences according to the instruction given
   (a) Had you been careful, you would have come here first in the examination. (Begin: If ____)
   (b) Dotto was nervous. Kurwa was equally (Combine into one sentence using "as")
   (c) Nadhifa does not speak as much English as her brother Hassan (Rewrite using "than")
   (d) Zainab had never met a boy as naughty as Zero. (Begin: never …….)

4. Write an appropriate question tag for each of the following statements.
(a) Soldiers don't waste time (b) Nobody phoned
(c) He passed the exam (d) Let's have a party

5. (a) Below is an extract taken from a learner's dictionary. Study it carefully and point out four things you can learn about a word in a dictionary. Give examples in each.

Molest/mZ'lest/verb 1 ~sb to attack sb, especially a child, sexually SYN abuse 2 ~ sb (old fashion) to attack sb physically Molestation /molesteiSn/ NAME/MONY/noun/U/

(b) Fatma and Hellen are doing shipping for their younger brother's birthday party.

Complete their dialogue with the correct article from those given in the box below.
H: Fatma, give me (i) _____ shopping bag and where is (ii)_____ shopping list we made.
F: Here it is.
H: Ok, hold the bag wide while I pick (iii) _____vegetable from the rack
F: Al right, I think we've bought everything we need except (iv) _____candles and (v) _____ cake.
H: Well, don't mind. We'll buy (vi) _____candles from (vii) _____shop across (viii) _____ sheet.

An, a, the, Ø

6. Consider you watched a football match in your school. Use the following words to construct sentences for each to describe the match.
(a) Spectators (b) Competitors (c) Exciting (d) Goal

7. Complete the telephone call in the following conversation.
Ali: Hello:
Maimuna: (a) _____
Ali: Is that Goods supplying Ltd?
Maimuna (b) _____
Ali: Can I talk to the Managing Director?
Maimuna: I'm sorry, he is out
Ali: Oh, when is he expected back?
Maimuna: I don't know really. May I take a message for him?
Ali: (c)_____
Maimuna: Okay, thanks
Ali: (d) _____

8. **Read the following passage carefully then answer the questions that follow it by writing the letter of the correct answer in the answer sheet provided.**

Scientists have learnt a great deal about malaria – carrying mosquitoes. The only importance of the male is the part it plays in helping to produce the young mosquitoes. He is smaller and weaker sex. He feeds not on blood but on plant liquid and lives only about a week. The average lifetime of a female is about a month during which she has a life of fifteen seconds. The eggs go through four development stages and finally the small mosquito appears. They only wait for their wings to be strong enough before they fly off in search of food.
Not until 1940 however, did wiping out of Malaria from the world finally became possible A Swiss Scientific discovered a drug popularly known as DDT which killed most of insect which touched it.

D.D.T. and other sprays made it possible for the world Health organization (W.H.O) to declare total war on mosquitoes. Most of these insects bite human being while in doors having fed herself on blood a female can fly on a short distance before resting and usually lands on the wall or an object in the room not very high up. If the area has been sprayed with one of the long lasting sprays like D.D.T., the poison enters her system and she soon dies. Even if the person she fed upon suffered from malaria. She will be dead long before the end of the ten to fifteen days required to make to infect another person.

If all the mosquitoes that have fed on blood of malaria, - victims die before they can make people ill malaria ends. The disease seldom remains in human blood for more than three years. A nation wide programmed of spraying every inside wall of every house in every place where mosquitoes can breed should over a period of four or five years result in the end of malaria.

Such spraying is a huge task. It requires good organization to say nothing of money. Nevertheless several nation wide programed has been successfully carried out and other are now in progress. In Tanzania the largest yet attempt is in the city of Dar es Salaam and Morogoro region.

QUESTIONS

(a) Suggest the suitable title for the passage with not more than five words

(b) According to the passage how do a person being infected with malaria

(c) Why a male mosquito is likely not cause the spread of malaria?

(d) In your opinion from the experience of the societies especially the coastal regions which measures should be taken to solve the problem of malaria

SECTION C : (45 MARKS)

Answer three (3) questions from this section

9. Write a letter to the editor of the citizen Newspapers P. o. box 1226 Dar-es Salaam. Explain the problem of electricity supply to your street. Sign your name as Mohamed Mpina box 56 Zanzibar

LIST OF READINGS: from questions 10-12

NOVELS AND SHORT STORIES:

1.	Passed Like A Shadow	-	M.B. Mapalala, 2006 DUP

		s)	1945
		t)	1885

SECTION B : (35 marks)

Answer all questions in this section

3. Answer the following questions briefly.
   I. Outline five effects of early contact between East Africa Coast and Far East.
   II. Mention four roles of missionaries in colonization of Africa.
   III. Explain four effects of the First World War on Africa.
   IV. Elaborate four merits of archaeology as a source of constructing history
   V. List four effects of economic slump of (1929-33) in African colonies
   VI. Analyses four consequences of Ngoni invasion in East Africa during 19th century

4. (a) Arrange the following statements in chronological order by writing number 1 to 5 beside the item number

   i. The further they pushed into interior the mote the African societies were affected by this violence

   ii.They killed, enslaved and robbed Africans of their land and cattle

   iii. The African societies in Mfecane area were already affected by two forces coming from European expansionism of the time

   iv.Their contact with African was constantly violent

5. (a) The map below locates the most famous historical sites in Tanzania labeled A,B,C,D,E and Name the following historical sites.

Answer three (3) questions from this section

6. Explain six effects of the discovery of iron technology in Africa societies

7. Explain six factors that enable Tanganyika to get independence earlier before Kenya and Uganda

8. Analyze six factors that made British to use indirect rule policy

9. Explain six achievement of AU to African countries

FORM FOUR (IV) MOCK EXAMINATION-2020.

(For Both School and Private Candidates)

PHYSICS 1

031/1

TIME: 3 Hours **Saturday, 15th August 2020.**

Instructions

1. This paper consists of sections A, B and C. with a total of eleven (11) questions.
2. Answer **all** questions in sections **A** and **B** and **two (2)** questions from section **C**
3. Cellular phones and any unauthorized materials are **not** allowed in the examination room.
4. Non-programmable calculators may be used.
5. Write your **Examination Number** on every page of your answer booklet(s)
6. Where necessary the following constants may be used

(i)	Acceleration due to gravity,	$g = 9.8m/s^2$
(ii)	Specific heat capacity of copper	$= 0.4J/gK$
(iii)	Specific latent heat of ice	$= 336J/g$
(iv)	Specific latent heat of steam	$= 2260J/g$
(v)	Avogadro's number,	$N_A = 6.023 \times 10^{23}$
(vi)	Density of copper	$= 8.8g/cm^3$
(vii)	Density of water	$= 1000kg/m^3$
(viii)	Density of oil	$= 0.85g/cm^3$

SECTION A : (15 MARKS)

Answer ALL questions in this section

1. For each items **(i) – (x)** choose the correct answer among the given alternatives and write its letter beside the item number.

(i) A freely suspended bar magnet always comes to rest
A) With its N pole pointing North and its S pole pointing South
B) With its poles pointing the North South direction
C) With its S-pole pointing to North and its North-pole pointing South
D) In an east-west direction
E) With either the N-pole or S-pole pointing North ( )

(ii) For resistors connected in parallel the following is true
A) Reciprocal of equivalent resistance is the sum of the individual resistances
B) Equivalent resistance is greater than any one of the individual resistances
C) Equivalent resistance is the sum of the individual resistances
D) Equivalent resistance is the sum of reciprocals of individual resistances
E) Equivalent resistance is always less than either of the resistances ( )

(iii) The cost of electricity for a 2000W electric fire used for 10.30 hours at the rate of shs8.00 per KWh is
A) shs 160 B) shs 80 C) shs 168 D) shs 1600 E) shs 3200 ( )

(iv) The weight of an object is
A) The same as its mass when at the poles B) Measured in grams or kilograms
C) Greater at the poles than it is at the equator
D) Greater at the equator than it is at the pole
E) Is measured by means of beam balance ( )

(v) A blue dress with red spots when viewed in red light will appear
A) Completely red B) Completely magenta C) Blue with red spots
D) Magenta with red spots E) Black with red spots ( )

(vi) The use of soft iron cylinder round the neck of a cathode ray tube in television receivers is to Provide
A) Magnetic shielding B)Conduction of electricity C)Mechanical protection D) A strong magnetic field E) Deflection
( )

(vii) When a galvanometer is used to measure electric current in a circuit, it must be connected With.
A) A shunt in series B) A multiplier in parallel C) A shunt in parallel ( )
D) A multiplier in series E) A shunt in parallel and a multiplier in series

(viii) When an object moves around a horizontal circle of centre O with a constant speed its acceleration will be:
A) towards the centre B) away from the centre C) zero
D) along the direction of rotation E) along the tangent to the circle ( )

(ix) Which of the following is correct about a capacitor?
A) Does not need an insulator between its plates
B) Has very high capacitance when air is between its plates
C) Must have metal plates to store a charge D) Has capacitance defined by C = V/Q
E) Has no voltage across it when working in radio receiver ( )

(x) If the resistance is doubled and the potential difference across it is reduced to one third, what is the ratio of old current to new current

2. Match the items in **List A** with responses in **List B** by writing the letter of the correct response beside the item number.

List A	List B
(i) Mass of water vapour which is actually present in a unit volume of air at constant temperature. (ii) Mass of water vapour present in a unit volume of air. (iii) A measure of the extent to which the atmosphere contains water vapour. (iv) Measures temperature of inaccessible structures. (v) Depends on the electrical properties of materials varying with temperature.	A. Absolute temperature B.Thermal expansively C. Bi- metallic strip D.Absolute humidity E. Thermistor thermometer F. Latent heat of fusion G. Thermal conductivity H. Humidity I. Wet bulb depression J. Specific heat capacity K. Leslies cube apparatus L. Relative humidity M.Liquid -in-glass thermometer N. Latent heat O. Bimetallic thermometer P. Hygrometry.

SECTION B : (60 MARKS)

Answer All questions in this section

3. (a) (i) State the principle of reversibility of light ray?
   (ii) Describe with the aid of a diagram how you would produce a pure spectrum experimentally.
   (b) Show that the refractive index of denser medium to rare medium is equal to the reciprocal of refractive index of rare medium to denser medium.
   (c) Three glasses of thickness 2cm, 4cm and 7cm are arranged adjacent. If their refractive indices are 1.5, 1.6 and 1.8 respectively. Find the bottom of the prism to be raised above.

4. (a) What would happen when
   (i) An ebonite rod is rubbed with fur? (ii) A glass rod is rubbed with fur?
   (iii) Explain briefly why are you safer inside a car during lightning?
   (b) (i) State Ohm's law (ii) What are the limitations of Ohm's law
   (iii) How does the change of temperature affect the resistance of metal, Semiconductors and insulators.
   (c) A battery of e.m.f 24V and internal resistance r is connected in a circuit having two parallel resistors of 3Ω and 6Ω in series with 8Ω resistor. The current flowing in 3Ω resistor is 0.8A. Calculate
   (i) Current in the 6Ω resistor (ii) Internal resistance r of the battery
   (iii) The terminal potential difference of the battery

5. (a) Explain briefly why is it easier to pull a lawn roller than to push it?
   (b) The force and its displacement are 300N and 400m along the direction of 70° horizontal. Calculate
   (i) Work done by the force along its direction (ii) Work done by horizontal component
   (iii) Work done by the vertical components

6. (a) (i) Name two elements which are mainly found in the earth's core
   (ii) Briefly explain how the thermal energy is transmitted through different earth's region or layers.
   (iii) Explain why the inner core of the earth is solid while the outer core is liquid, even though the temperature of the inner core is higher.
   (c) (i) Give the meaning of the terms, seismometer, seismogram and seismograph.

(ii) Give three (3) indicators leading to a prediction of earth quake
(iii) Briefly explain the origin of earth quakes and identify its ordinary causes

7. (a) (i) Differentiate between heat and temperature
(ii) With the aid of a sketch graph explain the importance of the anomalous expansion of water.
(b) Give reason for the following
(i) A gap is left between two successive rails
(ii) A glass tumbler breaks when hot liquid is poured
(c) (i) State four ways in which evaporation differ from boiling
(ii) A copper calorimeter of mass 120g contains 70g of water and 10g of ice at 0^0C. What mass of steam at 100^0C must be passed into the calorimeter to raise the temperature to 40^0C.?

8. (a) (i) State the law of floatation
(ii) What are the three main conditions to be satisfied before a body can float
(iii) Why is it easier to swim in sea water than in the river water?
(b) (i) Why it is difficult to stop bleeding from a cut in the body at high altitude
(ii) A tank 5m high is half filled with water and then filled to the top with oil. What is the pressure at the bottom due to these liquids?
(c) (i) What is apparent weight of a fluid.
(ii) A piece of copper having an internal cavity weighs 264g in air and 221g in water. What is the volume of the cavity?

SECTION C : (25 MARKS)

Answer ANY TWO(2) questions in this section

9. (a) (i) List two properties of semiconductors.
(ii) How does a conductor differ from a semiconductor in terms of energy levels?
(iii) Explain the statement that a semiconductor have a negative temperature coefficient of resistance.
(b) (i) What is diode?
(ii) Make a sketch of the output voltage against time for half-wave rectification. Explain why the output flows in pulses.
(iii) What is the difference between a diode and commutator
(c) (i) Sketch the simple circuit for npn transistor amplifier.
(ii) In a common base connection, current amplification factor is 0.9. If the emittercurrent is 1mA determine the value of base current.

10. (a) (i) Define the term Scattering of light. (ii) Why does sky appear blue?
(iii) What are the main points of differences between the sound waves and light wave?
(b) (i) Define the term beat (ii) Mention any two applications of beats
(iii) Calculate the speed of sound in a gas in which two waves of wavelength 1.00m and 1.01m produce 30 beats in 10 seconds
(c) (i) State the laws of vibrating strings
(ii) A string of length 1m and mass $5x10^{-4}$kg fixed at both ends is under a tension of 20N. It is plucked at a point situated 25cm from one end. What would be the frequency of vibration of the string?

11. (a) (i) Differentiate natural radioactivity from artificial radioactivity
(ii) State two conditions for stability of nuclides referring to light nuclides and heavy nuclides.
(iii) What is nuclear fusion? Give some equations to support your answer.
(b) (i) When does alpha decay and Beta decay occur?
(ii) How do the mass number and atomic number change in Beta decay?
(iii) How many electrons, Protons and Neutrons are there in 16g of $_8O^{16}$?
(c) (i) Define half-life
(ii) The half-life of a radioactive substance is 30days. What is the time taken for $3/4^{TH}$ of its original mass to disintegrate?

FORM FOUR (IV) MOCK EXAMINATION-2020.

(For Both School and Private Candidates)

CIVICS

011

TIME: 3 Hours **Monday, 10th August 2020.**

Instructions

1. This paper consists of section A, B and C.

2. Answer **all** questions in section A and B and **Only three (3)** questions from section C.

3. Cellular phones are **Not** allowed in the examination room

4. Write your **Examination Number** on every page of your answer booklet(s).

SECTION A

Answer all questions in this section

1. For each of the following items **(i)-(x)**, choose the most correct answer among the given alternatives and write its letter beside the items number in the answer booklet provides.

(i) The predominate type of family in Africa is
A. Nuclear family B. Single parent family C. Couple family D. Isolated family
E. Extended family. ( )

(ii) The president of United Republic of Tanzania releases some prisoners from jail during some national festivals. When he does so he uses his power as a
A. Head of state B. Propagative mercy C. Head of government
D. Chairman of the cabinet E. Commander in chief ( )

(iii) Fortunate is often followed by male students for sexual advice, but she always rejects which type of skills does Fortunate use:
A. Assertiveness skills B. Awareness skills C. Emptily skills D. Communication skills
E. Positive relationship skills. ( )

(iv) In the absence of the speaker and deputy speaker meetings of the parliament are chaired by.
A. Prime minister B. Attorney General C. A chairman of standing committee
D. Chief Justice E. Minister of Home Affairs. ( )

(v) Inequality that existed in job accessibility between two different sexes is referred as:
A. Gender oppression B. Gender equality C. Unemployment D. Gender gap
E. Gender mainstreaming ( )

(vi) The economic entity where by some people do not get high quality and quantity basic needs like food, clothes and shelter in comparison to other is referred as:
A. Absolute poverty B. Object poverty C. Poverty cycle D. Relative poverty
E. Income poverty ( )

(vii) Hygienic environment leads people to:
A. Get HIV/AIDS pandemic B. Be free from rape C. Get cholera easily
D. Get high education E. Get rid of diseases ( )

(viii) Which organ to be blamed when pornography is shown publicly to children and adolescents: ( )
A. National Archives B. National Museums C. National Film Censorship Board
D. National Sports Council E. National Festival and Celebration Council.

(ix) The leader of the government business in the House of Representative of Zanzibar is
A. The Speaker of the House of Representative of Zanzibar
B. The President of Zanzibar
C. The Clerk of the House of Representative of Zanzibar
D. Chief Justice of Zanzibar E. Zanzibar second Vice President. ( )

(x) Which of the following is a negative impact of globalization?
A. Presence of abundant goods and services B. Environmental degradation

2. Match the Items from **List A** to those they best correspond from **List B**. Write only letters against item number.

List A	List B
(i) Where the government seek no consent of the people	A. Republic people government.
(ii) System where the central government shares power with a number of small state government	B. Authoritarian government C. Federal government. D. Revolution government. E. Anarchy government.
(iii) Government led by executive government	F. Communist government.
(iv) Government formed when the majority people overthrow the minority government	G. Monarchy government. H. Liberal government.
(v) Temporarily created government while waiting for general election.	I. Transitional government.

SECTION B:

Answer all questions in this section

3. Read the passage then answer the questions that follow after it.

The accessibility of health service in Tanzania is now better than it was in the past. The government main objectives for the development of health service have been to strengthen measures for the eradication, prevention and control of diseases. Such measures include provision of health education, Protection of environment against health hazard, vector disease control, and immunization against disease early detection and treatment of disease.

Despite the remarkable success obtained toward the promotion of health services, the health condition of women and children is general speaking, poor, women health is weakened because of factors like over work, frequent unplaced birth and upholding some traditions which undermine them. The poor health of Women as mothers affect the health of children. Diseases like diarrhea, dysentery, cholera, anemia and malnutrition claim a greater proportion of lives of women and children.

Furthermore children before five years are vulnerable to attacks of six immunizable diseases which are measles, whooping, cough, diphtheria polio, tuberculosis and tonus. This means that under-five demands special care and protection to reduce the effect of these diseases.

This is important because children are the national builder of tomorrow.

QUESTIONS

a. Propose suitable title for the passage.

b. Name five causes of poor health among women

c. At what age are children mostly affected by disease

d. Name two diseases that affect children

4. Assume that you are the leader of Education Committee in your village. Mention the steps you would follow to solve the problem of poor performance in the school village.

5. Name five points to verify that drug abuse is a social problem.

6. Briefly explain five responsibilities of a father as a head of a family in most of African societies.

7. Tax is a major source of income to any nation informs the public five importance of paying tax.

8. Informal sector is a part of private sector which faces many problems. Use five points to identify the problems that members of informed sector face.

9. Explain five sources where people acquire the required life skills.

10. Use five points to define the view that reproductive health education is beneficial to both sexes.

SECTION C :

Attempt any THREE (3) questions from this section.

11. Road accidents are disasters that claim lives of many people. Discuss five measures to minimize the magnitude of road accidents.

12. Justify the statement that Tanzania is a democratic state. Use five points.

13. Why is Tanzania considered as one among the least developed countries of the world? Use five points

14. **"Cultural change in inevitable"** Use five points to support the statement.

Instructions

1. This paper consists of section A, B and C with a total of **fourteen (14)** questions

2. Answer **all** questions in section A and B and **Only one (1)** questions from section C.

3. Cellular phones and any **unauthorized** materials are **Not** allowed in the examination room

4. Write your **Examination Number** on every page of your answer booklet(s).

5. The following constants may be used:
   Atomic masses: H = 1, C = 12, O = 16, Ca = 40
   Avogadro's number = 6.02×10^{23}
   GMV at s.t.p = 22.4 dm^3.
   1 Faraday = 96,500 coulombs.
   Standard pressure = 760 mmHg.
   Standard temperature = 273K.
   1 litre = 1 dm^3 = 1000cm^3.

SECTION A : (15 Marks)

1. For each of the items **(i) – (x)**, choose the correct answer from the given alternatives and write its letter beside the item number in the answer booklet provided.

(i) As water is added to an acid, the acid becomes.
A. More acidic and its pH goes down. B. More acidic and its pH goes up.
C. Less acidic and its pH goes up. D. Less acidic and its pH goes down.
E. Neutral and its pH becomes 7. (
)

(ii) Over 7 billion people on the Earth use water every day, yet Earth's water supply remains relatively constant. Which statement best explains this?
A. The sea level is rising. B. Water is constantly recycled by the hydrological cycle.
C. Global warming melts ice to replace water that is used.
D. Water exists in three phases on Earth. E. Water is a universal solvent. ( )

(iii) Which of the following is not an organic compound?
A.CO B.$C_6H_{11}O_6$ C. CH_4 D. CH_3COOH E. C_2H_5Br ( )

(iv) A mixture of ammonium chloride salt and sand can be separated by using a method known as:
A.Evaporation B. Fractional distillation C. Sorting D. Sublimation
E. Decantation ( )

(v) What will happen when zinc is placed in aqueous copper (II) sulphate?
A.Copper atoms are oxidized. B.Zinc atoms are oxidized. ( )
C. Copper ions are oxidized. D. Zinc ions are oxidized. E. Sulphur atoms are oxidized.

(vi) A Bunsen burner flame will produce a luminous flame when
A. The air holes of the Bunsen Burner is fully closed
B. Sufficient gas is supplied to the Bunsen Burner
C. The air hole of the Bunsen Burner is fully opened
D. The gas tap is partially opened E. The gas tap is fully opened ( )

(vii) A galvanized iron is the one which is coated by
A.Steel B. Zinc C. Copper D. Nickel E . Silver

(viii) When caring for a victim who has an object impaled in his hand, you should
A. Remove the object, flush with cool water, and transport to hospital.
B. Immobilize the object by placing several dressings around it.
C. Break object off where it sticks out, and bandage injury.
D. Remove the object and flush with warm water.
E. None of the above. ( )

(ix) A chemist should acquire the following skills except
A. Problem identification B. Surgery C. Data analysis D. Observation
E. Experimentation ( )

(x) The oxidation state of manganese in potassium permanganate is?
A.+ 7 B. +3 C. + 2 D. 0 E. - 7 ( )

2. Match the items in **LIST A** with the responses in **LIST B** by writing the letter of the correct response beside the item number.

	LIST A	**LIST B**
(i)	Used for setting fractured bone.	A. Sodium chloride.
(ii)	Used as neutralizing agent (antacid).	B. Iron (II) sulphate.
(iii)	Used as a fertilizer.	C. Calcium sulphate.
(iv)	Used as preservative in pickles and in curing meat.	D. Ammonium sulphate.
(v)	Used to make tablets prescribed to patients who have iron deficiency.	E. Sodium bicarbonate.
		F. Zinc nitrate.

SECTION B : (70 Marks)

Answer all questions in this section

3. (a) State the conditions necessary to start a fire.

   (b) Give a reason for the following:

   (i) Some metals such as aluminum do not rust.

   (ii) Carbon dioxide turns colorless solution of lime water into milky.

   (iii) Chlorine gas is collected by downward delivery.

   (iv) Water is a universal solvent.

4. (a) How many hydrogen atoms are in 22.4 dm^3 of hydrogen molecules at s.t.p?

   (b) Calculate the mass of powder formed when 16 g of calcium buns in air.

5. (a) State four factors affecting the rate of chemical reactions.

   (b) The curves labeled **K** and **M** in the graph below were obtained in an experiment to investigate the reaction of a fixed mass of a metal in different forms with excess dilute hydrochloric acid at 60^0C. Use the graph to answer questions (a) and (b) as follows:

   (i) Using the labels, K and M state when the metal used was in the form of marble or powder

   (ii) Comment on the shapes of the curves with respect to the nature or form of the metal used.

6. (a) The number of protons, neutrons, and orbital electrons in particles A to D are given in the following table: With reason, identify:

Particles	Proton	Neutron	Electrons
A	6	6	6
B	12	12	10
C	6	6	6
D	8	8	10
E	16	16	16

   (i) A negatively charged particle.

   (ii) A positively charged particle.

   (iii) Particles which are isotopes.

   (b) (i) Write the formula of the compound and state the type of bond formed in the compound when A reacts with E.

   (ii) Give two properties of the compound formed in 6 (b) (i).

7. (a) With examples, distinguish between soft water and hard water.
   (b) The formation of lime scale in the water pipes is both advantageous and disadvantageous. Verify this statement.

8. (a) With the aid of balanced chemical equations, explain briefly the reducing and oxidizing properties of sulphur.
   (b) Give three industrial uses of sulphur.

9. (a) State three differences between anode and cathode as used in electrolysis.
   (b) The compound Q has the empirical formula of CH_2O and the molecular mass of 60 $gmol^{-1}$. Calculate the percentage composition by mass of carbon in the Compound Q.

10. (a) Differentiate between elements and compounds.
    (b) Suggest a suitable method used to separate the following mixtures:
    (i) Ink
    (ii) Kerosene and diesel
    (iii) Air
    (iv) Sand and water

11. (a) State three features of homologous series.

    (b) A student gave the following names for various alkanes. The names indicate the structural formula of the alkanes but do not strictly follow the IUPAC rules of nomenclature. Draw the structural formula suggested by incorrect names and indicate where the student made mistake in the original attempts at nomenclature by giving the correct IUPAC name for each compound.
    (i) 2, 4- diethyl butane.
    (ii) 2 - ethyl pentane.
    (iii) 1,1,1,1" tetra methyl methane.

12. (a) Give two examples for each of the following:
    (i) Solid fuel
    (ii) Liquid fuel
    (iii) Gaseous fuel
    (iv) Alternatives sources of energy.

    (b) Which ways can the effects of using fossil fuels be reduced to the environment? Give three points

SECTION C : (15 Marks)

(Answer one (1) question from this section)

13. Explain five ways through which the soil loses its fertility.

14. (a) Briefly describe the chemical reactions taking place in blast furnace for the extraction of iron.

    (b) State four environmental problems associated with mining and extraction of metals.

TIME: 3 Hours **Thursday, 13th August 2020.**

Instructions

1. This paper consists of section **A, B** and **C** with a total of **fifteen (15)** questions.

2. Answer **ALL** questions in section **A** and **B** and only **TWO** questions from section **C**.

3. Read each question carefully before you start answering it.

4. All writing should be in **blue** or**black** ink except for diagrams that must be drawn in pencil.

5. Write your **Examination number**on every page of your answer booklet(s).

0001

SECTION A : (15 Marks)

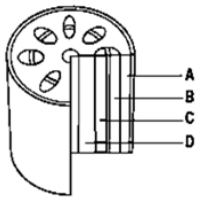

Answer all questions in this section.

1. For each of the items **(i)-(x)** choose the correct answer among the given alternatives and write its letter beside the item number.

i. As a seed begins to germinate, it uses enzymes to speed up the rate of: ( )
A . Digestion. B. Osmosis C. Photosynthesis. D. Transpiration.

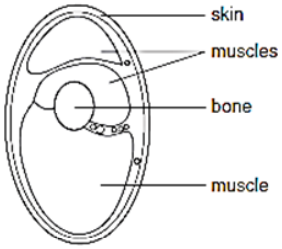

ii. Milk produces a red precipitate when heated with Benedict's solution. A purple color develops. When the biuret test is used on milk. Using these results only, which nutrients does milk contain?
A. Fat and protein B. Fat and starch ( )
C. Reducing sugar and protein D. Reducing sugar and starch

iii. The diagram shows a section of a stem. Which tissue transports sugars and amino acids from the leaves to other parts of the plant?

iv. What are some of the end products and effects of anaerobic respiration in muscle?
A. Carbon dioxide and muscle contraction B. Ethanol and loss of coordination
C. lactic acid and oxygen debt D. Water and muscle relaxation. ( )

v. The diagram shows a cross-section through the arm of a human.

What is the name of the bone?
A. Hummers B. Radius C. Scapula D. Ulna ( )

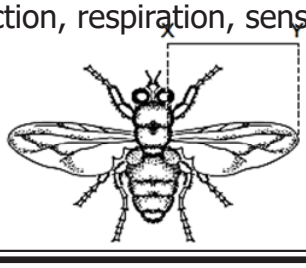

vi. Where the union of male and female nuclei occur in female reproductive system.
A. Ovary B. Oviduct C. Uterus D. Vagina ( )

Vii. Which of the following are genetically identical?
A. Brothers and sisters in the same family B. Cuttings taken from the same plant
C. Gametes from the same parent D. Seeds produced by the same tree( )

viii. What is a correct way of naming a species using the binomial system?
A. Homo sapiens B. Homo Sapiens C. Human being D. sapiens ( )

iX. A living organism X, can make its own food, get rid of toxic materials and detect and respond to stimuli. What other four processes must organism X carry out to stay alive?

A. Excretion, growth, movement, sensitivity
B. Excretion, growth, nutrition, respiration
C. Growth, movement, reproduction, respiration
D. Movement, reproduction, respiration, sensitivity ( )

The line XY represents the length of the wing. The length of line XY is 26 mm. The actual size of the wing between XY is 4 mm. What is the magnification of the image?

A. ×0.15 B. ×6.5 C. ×22 D. ×104

2. Match the responses in **list B** with the phrases in **list A** by writing the letter of the correct response from the **list B** beside the item number of **list A.**

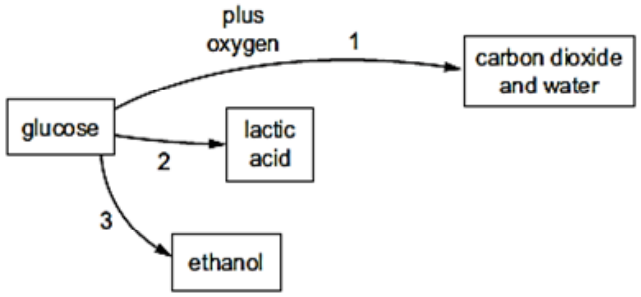

LIST A		LIST B	
i.	Primary stage is accompanied by a flu-like illness.	A.	Candidiasis
ii.	Painless sore on sexual organs.	B.	H.I.V
iii.	Thick white patches in the mouth	C.	Syphilis
iv.	Irregular menstruation	D.	AIDS
v.	Itching all over the body	E.	Gonorrhea
		F.	Genital herpes
		G.	Trichomoniasis
		H.	Hepatitis B
		I.	Chlamydia

SECTION B : (carries 60 marks)

Answer all questions from this section

3. In biology laboratory we use microscope to magnify a very small thing so as to be seen Clear.
   a. Name two types of lenses found in a light microscope and give briefly explanation for each.
   b. State how to care for the light microscope.(3points only)

4. The flow diagram summaries two types of respiration in three different ways that glucose can be broken down to release energy in the living organism.

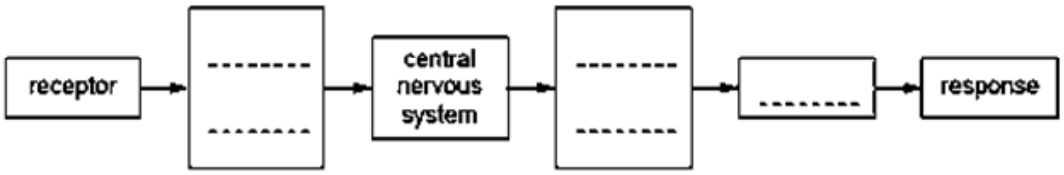

Briefly explain what happen in way 1,2 and 3.

5. (a) What are the similarities and differences between mitochondria and chloroplast?
   (b) Draw a well label diagram of animal cell and label only three main parts.

6. (a) State the basic principles of waste disposal.
   (b) Explain why is waste disposal is a problem in your society?

7. (a) Receptors receive stimuli and convert them into electrical impulses. Figure below Shows the pathway taken by electrical impulses in a reflex action. Complete this Figure by writing the name of the appropriate component on the dotted lines.

(b) With examples, briefly explain how simple reflex action differ from condition reflex action.

8. (a) Name the organism found in the nodules of leguminous plants.

(b) Write five characteristics possessed by this organism.

9. (a) Define food chain

(b) Construct two food chains where all consumers are chordates

(c) State the roles of green plants in a fish pond other than providing food for fish.

10. Briefly describe how the following help to maintain a constant internal environment.
(a) Skin

(b) Kidneys

11. (a) Describe how the structure of a seed that is wind-dispersed differs from the Structure of a seed that is animal-dispersed.

(b) What are the factors that affect the growth of plants?

12. (a) Define the term genetic engineering

(b) List five practical applications of genetics

SECTION C : (carries 25 marks)

Answer two (2) questions from this section. Question 13 is compulsory

13. Imagine you are a guest speaker requested to address the students of Wuhan medical assistance college. The topic is "COVID-19". Write your speech on the following :-

Meaning of COVID-19

Causes of COVID-19

Ways of transmission of COVID-19

Symptoms of COVID-19

Preventive measures of COVID-19

14. (a) The menstrual cycle is controlled by several hormones including FSH and Progesterone. Use your knowledge of the role of these hormones in the menstrual Cycle to suggest explanations for each of the following.

i. FSH is given during fertility treatment to women who experience problems becoming pregnant.

ii. Progesterone is a component of the contraceptive pill.

(b) With reference to named substances, describe the functions of the placenta and the Umbilicalcord.

15. (a) What is analogous structure?

(b) Compare and contrast Lamarck's theory of evolution with Darwin's theory of evolution.

MINISTRY OF EDUCATION AND VOCATIONAL TRAINING

CERTIFICATE OF SECONDARY EDUCATION EXAMINATION

URBAN WEST REGION - ZANZIBAR

FORM FOUR (IV) MOCK EXAMINATION - 2020.

(For Both School and Private Candidates)

BASIC MATHEMATICS

041

Time: 3.00 Hours **Tuesday, 11th August 2020**

Instructions

1) This paper consists of section A and B with total of **fourteen (14)** questions.

2) Answer **all** questions in sections A and B. each question in section A carries **six (6**) marks while each question in section B carries **ten (10)** marks.

3) All necessary working and answers for each question must be shown clearly.

4) NECTA **mathematical tables** may be used.

5) Cellular phones, calculator and any unauthorized materials are **not** allowed in the examination room.

6) Write your **Examination Number** on every page of your answer booklet(s).

SECTION A : (60 Marks)

1. a.) In a school there are 80 boys and 50 girls. On a certain day 10% of the boys were Absent and 12% of the girls were absent. What percentage of pupils in the school were absent on that day?

   b.) A wall is 120cm by 270 cm. I want to cover it with square tiles. What is the largest tile I can use, so that I don't have to cut any?

2. a.) Use logarithms tables to evaluate $\frac{73\times13.1}{0.0029\times0.067^2}$ giving your answer in the form

   $k = 10^n$, where n is any integers and k is the number lies between 1 and 10.

   b.) Evaluate . $\frac{1+\sqrt{5}}{2+\sqrt{5}} + \frac{1-\sqrt{5}}{2-\sqrt{5}}$

3. a.) In a certain school, group of 108 students , 60 liked football, 53 liked tennis and 10 liked neither. Calculate the number of students who liked football but not tennis.

   b.) An integer is chosen at random from 2, 3, … , 10. What is the probability that
   i. it is a factor of 18?
   ii. It is divisible by 3?
   iii. Less than 3 or greater that 7?

4. a.) Find the equation of a line which passes through the point (-3,2) and is perpendicular to the line $5x - 6y = 3.$

   b.) Given that, the vectors $\underline{a} = 5\underline{i} - 2\underline{j}, \underline{b} = -2\underline{i} + \underline{j}$ and $\underline{c} = 3\underline{i} - 4\underline{j}.$ Find
   i. $/2\underline{a} - \underline{b} + 3\underline{c}/$.
   ii. scalars m and n if $m\underline{a} + n\underline{b} = 4\underline{i} - 3\underline{j}$.

5. a.) ΔABC is isosceles, with $AC = AB$, show that $< B =< C.$

   b.) The sides of two regular octagons are in the ratio 4:5.
   i. Write down the ratio of the areas.
   ii. If the smaller octagon has area $72\ cm^2$, find the area of the largest octagon.

6. a.) At low speeds, the air resistance experienced by a moving body is proportional to its speed. When moving body is $2\ m/s,$ a body experiences an air resistance of $5N.$ Calculate the air resistance when the body is moving at $6\ m/s.$

   b.) An American tourist changed $2,500 when he was in Zanzibar at a rate of 2,100/- per US dollar(s). He spent 1,350,000/- then changed the rest back to dollars at a rate of 2,500/- per dollar. How much did he get back, to the nearest dollar?

7. a.) When A gains 5/-, B gains 7.5/- and when B gains 10/-, C gains 12.50/-. Compare the gains of A, B and C.

   b.) Use the balance sheet equation to fill in the gaps in this table.

Assets	**Capitals**	**Liabilities**
20,544/-	-	13,400/-
-	12,500/-	8,700/-
86,500/-	66,100/-	-
180,000/-	-	100,000/-

8. a.) The sum of the first five terms of an A.P is 65/2. Also, five times the 7th term is the same as six times the 2nd term. Find the first term and common difference of the A.P.

b.) The common ratio of a G.P is -5 and the sum of the first seven terms of the progression is 449. Find the first three terms.

9. a.) If $Sin\theta = \frac{12}{13}$, find the value of . $\frac{Sin^2\theta - Cos^2\theta}{2Sin\theta\, Cos\theta}$

b.) A town X is $40\ km$ on a bearing of 035^0 from a town Y. A town Z is $80\ km$ on a bearing of 135^0 from Y. Calculate

i. the distance between Z and Y.

ii. the bearing of Z from Y

10. a.) Factorize

i. $6x^2 + 11xy - 7y^2$.

ii. $b^2 - a^2 - (a - b)$

b.) The sum of two digits is 10 and the sum of their squares is 58. Find the digits.

SECTION B : (40 Marks)

11. a.) The distribution of the diameters of a sample of 30 tubes produced in a factory are given as follows:

Diameters in mm	48 – 50	51 – 53	54 – 56	57 – 59	60 – 62
Number of tubes	4	3	14	8	1

Estimate,

i. Mean diameter to the nearest mm using assumed mean method.

ii. The median size of the diameter of the tubes.

b.) The mean wage of the eight office workers of a firm is 36,000/-. The mean wage of the 25 laborers is 16,000/-. Find the mean wage of all employees.

12. a.) An aircraft travelling at 260 km/h leaves town $A(25°N, 15°E)$ to town. $B(25°N, x°E)$ If it takes four hours to reach B, what is the value of x ?

b) The figure 12.1b below shows a wedge in which AB = 10 cm, FA = 10 and BC = 8cm. Angle FAB is a right angle

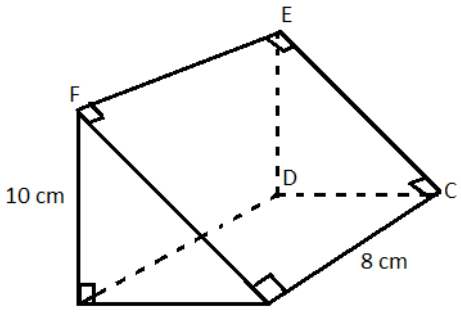

Figure 12.1b

Find

i. the angle between the lines FB and FC.

ii. the angle between the planes $AFED$ and $BCEF$.

13. a.) The determinant of the matrix $\begin{pmatrix} 3 & 2 \\ x & -1 \end{pmatrix}$ is – 9.

i. Find the value of x.

ii. Write down the inverse of the matrix in 13.a.

b. i. Draw the triangle $(0,0),(2,2)and\ (4,0)$ and its image under transformation with matrix $\begin{pmatrix} 2 & 2 \\ 1 & 2 \end{pmatrix}$.

ii. Calculate the area of the object and its image.

14. a. Ali wishes to buy two types of machines, type A and type B. A type A machine needs five operators and takes up 3 m^2 of floor space. A type B machine needs four operators and 5 m^2 of floor space. There are at most 80 operators and 60 m^2 of space available. The income per hour when type A is used is 1,200/- and 1,400/- when type B is used. Find the number of machines of each type that should be installed in order to maximize income per hour.

b. Given that $f(x) = \begin{cases} -3 & if\ x < -1 \\ -1 & if\ -1 \leq x \leq 1 \\ x+1 & if\ x > 1 \end{cases}$,

i. find $f(-2), f(0)and\ f(\sqrt{2})$.

ii. sketch the graph of $f(x)$.

iii. find the range of

BIBLE KNOWLEDGE.

014

TIME: 3 Hours **Tuesday, 18th August 2020.**

Instructions

1. This paper consists of section A, B, and C with a total of thirteen **(13)** questions.

2. Answer all questions in section A, **five** (5) questions in section B and **two** (2) questions from section B.

3. Section A carries twenty five **(25)** marks, section B forty five **(45)** marks and section C thirty **(30)** marks.

4. All communication devices, Bibles and any unauthorized materials are **not** allowed in the examination room.

5. Write your examination number on every page of your answer booklet (s).

0001

SECTION A: (25 marks)

Answer all questions in this section

1. For each of the items **(i- xx)**, choose the correct answer from among the given alternatives and write its letter besides the item number in the answer booklet(s) provided.

i) Repent and be baptized every one of you in the name of Jesus Christ for the forgiveness of your sins, and you shall receive the gift of the holy spirit….." (Acts 2:38), How did the audience respond to this message of Peter on Pentecost days?
A. They ran away from Jerusalem B. They stoned him and all the believers
C. They were forced to repent and be baptized
D. They repented and were baptized

ii) What justifies that Moses disobeyed the lord at the waters of Meribah?
A. Striking the rock instead of commanding it.
B. Commanding the rock instead of striking it.
C. Striking the rock twice instead of striking once
D. Striking the rock with hands instead of the rod.

iii) From the beginning the "word of God" has been the foundation of everything, which evidence do we have from God himself in the first story of creation (Genesis 1:1 – 2:4b)?
A. He created man and woman by using his word
B. He created tree of life by using his words.
C. He created the four rivers in the garden by using his words
D. He created all living creatures by using His word except man.

iv) In the book of the Acts of the Apostles, there are qualifications set to those who were to be chosen as deacons, what do we learn from this election process?
A. We must have some guiding qualifications in the selection of leaders.
B. We must chose more powerful leaders to help us in our lives
C. We must look for spiritual leaders only in order to get good ones.
D. We must choose leaders who have ability to pray.

v) What did God promise to Abraham
a. To make him rich, be loved by people and people to help him
b. To give him land and off spring, make him a great nation and bless him
c. To make him a father of faith, a great nation and give him a son
d. To give him a son, a family and make him a king.

vi) Paul was strick and displeased while Barnabas was sympathetic and persistent in dealing with John Mark; who had not stayed, with them to the end of their mission (acts 15:36 – 41). What does Barnabas teach you as members in your society?
A. We need and depend on one another despite our weakness
B. We should accept only good people
C. We should pay evil against those who err against us
D. We should not be too harsh but somehow judgmental.

vii) What did the Israelites do which was of the highest value of appreciation as a reminder for what God did (the lord's saving act) when Pharaoh refused to let them go?
A. Consecrating of the first – born of Israel B. Possession of Egyptians first born
C. Offering of the first born animal D. Circumcision of the first born of Israel.

viii) According to Paul's speech to the church elder's at Ephesus (Acts 20: 33 – 35), what notable thing can you recommend from his life and ministry to inspire Tanzanians in implementing the motto "Hapakazitu"?
A. Paul was devoted in preaching the gospel with all efforts
B. Paul planted more churches than any other apostle
C. Paul worked with his own hands to support his life, ministry and the needy
D. Paul relied on the churches to support his life and ministry and the needy.

ix) Which one is a correct set of methods used by pharaohs to reduce the number of the Hebrew in Egypt?
A. Killing Hebrews and casting male babies away from their mothers

C. Providing poor services to Hebrews and casting their male babies into river
D. Stop helping Hebrew mothers from giving birth and leave them to die

ix) Which one is a correct set of methods used by pharaohs to reduce the number of the Hebrew in Egypt?
A. Killing Hebrews and casting male babies away from their mothers
B. Making the lives of Hebrew male babies difficult and killing them
C. Providing poor services to Hebrews and casting their male babies into river
D. Stop helping Hebrew mothers from giving birth and leave them to die

x) After wrestling with a man for the whole night, Jacob was given a new name. what was the meaning of the name given?
A. The one who has striven with Angels and God and still prevailed.
B. The one who has striven with angels and soldiers and God and still prevailed
C. The one who has striven with God and men and still prevailed
D. The one who has striven with angels and men and still prevailed

xi) Lydia said, "If you have judged me to be faithful to the lord, come to my house and stay," (Acts 16:15) what is the interpretation of the verse?
A. The act of kindness as a result of knowing Paul
B. The act of generosity as a result of faith is Jesus Christ.
C. The Acts of generosity as a result of friendship with Paul
D. The act of pretending that she was very generous to the guest.

xii) God finished his work of creating in six days and saw that everything he made was good. What did God do on the Sabbath?
A. God rested from all his work, blessed it and made it holy
B. God finished creating and rested from all his work
C. God made it holy and blessed it D. God finished creating.

xiii) God planted a garden in the East, known as paradise and put a man he had formed. Man was allowed to eat from any tree in the garden except……
A. The tree of life and of the knowledge of good and evil
B. The tree of the knowledge of good and evil C. The tree of life
D. The tree in the middle of the garden

xiv) After the flood men decided to make bricks and build a city with a tower that would reach heaven. For which reasonsdid men build a tower?
A. They wanted to make a name for themselves
B. They did not want to scatter all over the world. C. The wanted to reach the sky
D. They wanted to become famous,did not want to scatter and wanted to reach the place where God stayed.

xv) ……..may your silver perish with you, because you thought you could obtain God's gift with your money, you have no part or share in this for your heart is not right before God" (Acts 8:20-21) which two groups of people were involved in this dialogue?
A. An apostle and a magician B. A magician and a disciple
C. An apostle and a disciple D. A magician and a disciple

xvi) ……."Set apart for me Barnabas and saul for the work to which have called them:"(Acts 13:2). Who said these words and to whom.
A. The holy spirit spoke to the prophets and teachers in the church of Antioch
B. The holy spirit spoke to the teachers at Antioch
C. The holy spirit spoke to the prophets in the church of Antioch
D. The holy spirit spoke to the members of the church

xvii) There was famine in the land of Canaan. So Jacob sent his sons to look for food in Egypt except……
A. Simon and Judah B. Reuben and Dan C. Benjamin D. Joseph

xviii) In each plague pharaoh asked for forgiveness. God said……"Yes one plague more will bring upon Pharaoh and upon Egypt. A. God said to Aaron
B. God said to Moses C. God said to Pharaoh D. God said to Joshua

xix) Which of the duties of the pastors of today would you consider to relate to that of the Levites as revealed in Joshua 8:33?

A. Preaching and teaching people with spiritual problems
B. Preaching and teaching the gospel of prosperity from God
C. Preaching and teaching people the word of God
D. Preaching and teaching the Gospel of miracle of God.

2. Match the descriptions of persons in **List A** with their corresponding names in **List B** by writing the letter of the item number in the answer booklet provided.

LIST A	**LIST B**
i. A prominent member of the Jerusalem church (Acts 15: 22,32) and a Roman citizen (Acts 16:38) who was sent by the church with Paul ii. A resident of Philippi who was converted by Paul in Europe. She was a worshiper of God and her household was baptized (Acts 16:14-15) iii. A good man and full of the Holy spirit and faith and he was sent by the Jerusalem church to Antioch church Acts 11:22-26) iv. A great apostle to the Gentile is Hebrew name is always used in Acts until his clash with Bar- Jesus at Paphos (Acts 13:6-10) v. A man trained by the Apostles Paul and remained in Ephesus to solve problems of those who refused to see their own condition in the light of God (Acts 16:1-5)	A. Timothy B. Paul C. Barnabas D. Silas E. Lydia G. Pricilla

SECTION B : 45 (MARKS)

Answer five questions from this section. Question three and four are compulsory.

3. Give three incidences where Abrahams faith was tested by God

4. (a). The disciples waited as Jesus told them just before his ascension into heaven. How did the disciples prepare themselves for the coming of the Holy spirit on the Pentecost day
(b). what were the consequences of the coming of the Holy spirit on the Apostles on The Pentecost day

5. Explain the charges brought against Jesus by Jewish leaders before PontiusPilate LK 23: 1-3

6. In Luke 21: 5-28 we read the coming of the son of man. Explain five signs which Jesus said would show that his coming is near.

7. Saint Luke portrays Jesus as a person who taught in parables during his ministry in LK 10:29-37, we read the narration of the parable of the good Samaritan.
a. How did Jesus answer the question about "who is my neighbor?
b. What was the answer of the lawyer concerning a neighbor?
c. Mention the groups of the people who by passed the injured man
d. What lesson do we learn from the parable of the good Samaritan?

8. St. Luke portrays Jesus as a person who performed miracles
a. What is a miracle
b. Mention any seven miracles taught by Jesus according to the Gospel of St. Luke

9. (a). Explain the reason that prompted Jesus to forgive the sinful woman (LK 7. 36-50)
(b). Give three reasons why Jesus was able to overcome temptations (LK 4:1-13)

10. (a). State the golden rule as stated in (LK 6:31)
(b). Explain the newness of life in Christ as show in the sermon on the plain (LK 6:17-49)

SECTION C : (30 MARKS)

Answer two questions from this section.

11. Explain the main events that took place at Philippi during the second missionary journey of Paul (Acts 16:11-40)

12. With reference to number 27; 12-23, Deuteronomy 31: 1-9 and 34: 1-9.
a. Explain how Moses's leadership and Moses' attitude towards handing over of this office to Joshua and Moses' death.
b. Give three lessons which leaders of today can learn from Moses

13. Describe the judges and their roles in the society of Israelites

MUDA: Saa 3 **Jumanne, 18- 08- 2020.**

Maelekezo:

1. Karatasi hii ina Sehemu A, B na C zenye jumla ya Maswali Kumi na Tatu **(13).**

2. Jibu Maswali **yote** Katika Sehemu A na B. Na Maswali **Matatu (3)** kutoka katika sehemu "C".

3. Zingatia Maelekezo ya Kila sehemu na ya kila Swali.

4. Simu za Mkononi na Vitu vyote visivyoruhusiwa haviruhusiwi katika Chumba cha Mtihani.

5. Andika Namba yako ya mtihani katika kila Ukurasa wa kijitabu chako cha kujibia.

SEHEMU A : (Alama 20)

JIBU MASWALI YOTE KATIKA SEHEMU HII.

1. Katika kipengele **(i)-(xv)** Chagua jibu sahihi kisha Andika herufi yake katika kijitabu chako cha kujibia.

(i) Ni mambo yapi ya kuzingatia kabla ya utoaji wa zaka.
A. Uwe na mali, Duka na Muuzaji B. Muda, Nisabu na Kiwango. C. Mtaji, Pahala na Ushuru
D. Uaminifu, Ukweli na Upendo E. Leseni, Mali ya halali na kuwasaidia watu. ( )

(ii) Kumkubali au kumkataa msimulizi wa hadithi hujulikana kwa jina gani ?
A. Dhaifu na maudhui B. Qudus na Ahad C. Jarah na Taadil D. Mur-sal na Gharib
E. Sahihi na Hasan

(iii)Tunapotaka kuchinja tunatakiwa tuchinje kwa ajili ya Allah (s.w) na wala si vyinginevyo. Maelezo haya yanapatikana katika sura gani?
A. Suratul-Faat-hat B. Suratul-Fiil C. Suratul-Bayyina D. Suratul-Masad
E. Suratul-Kawthar ( )

(iv) Ipi ni maana sahihi ya shifaa.
A. Uombezi utakaotolewa na Allah (s.w) kuwaombea watu mbalimbali.
B. Kupandikizwa uongofu katika nafsi ya mwanaadamu. C. Watu wema waongofu.
D. Kufutiwa madhambi siku ya kiama. E. Kuna maisha ya milele baada ya kufa. ( )

(v)Nisabu ya mazao ya shambani ni wastani ni wasaki 5 sawa na kilo 666kg. kwa hivyo, wasaki moja ina kilo ngapi ?
A. 133.2 kg B. 139.8 kg C. 250.4 kg D. 145.6 kg E. 132.3 kg ( )

(vi) Ukoo wa baba yake Mtume Muhammad (s.a.w) unaitwa?
A. Bani Asad B. Bani Tamimu C. Bani Zuhra D. Bani Muttalib E. Bani Hashim

(vii) Aina ya hija ambayo hufanywa na wakaazi wa makka pekee ni:
A. Qudus B. Ifraad C. Qiran D.Tamatui E. Widaa ( )

(viii) Kuna hadithi isemayo "Rakaa mbili za mtu aliyeoa ni bora kuliko rakaa sabiini za mtu kapera (asiyeoa)". Kwa mujibu wa mgawanyo wa hadithi, hadithi hii ni:
A. Maudhui B. Sahihi C. Qudusi D. Nabawi E. Dhaifu. ( )

(ix) Moja ya mafunzo yafuatayo yanapatikana katika suratul kawthar:
A. Dini ni utaratibu wowote ule wa maisha anaofuata mtu.
B. Maingiliano ya mataifa kibiashara ni katika neema za Allah (s.w).
C. Hakuna neema kubwa kama kujaaliwa, kuupokea uislamu, kuuelewa, kuufata vilivyo na kuufikisha kwa wengine.
D. Nusra na mafanikio hutoka kwa Allah (s.w) pekee
E. Muumini wa kweli ni Yule aliyemwepesi, hutoa misaada kwa wanaadamu wenziwe na mwenye kujali matatizo ya wengine. ( )

(x) Mara tu baada ya taarifa ya kifo cha Mtume Muhammad (s.w) kutolewa. Answari walikutana sehemu inayoitwa:
A. Daaru An-nad-wa B. Banu Umayyah C. Banu Qadasiya D. Masjid Qubah
E. Thaqifah bani saidah. ( )

(xi) Kiongozi aliyechukua dhima ya kuzichuja hadithi zilizo sahii anaitwa.
A. Abuu Huraira (r.a) B. Imamu Muslim C. Omar bin Abdul-Aziz D. Imamu Bukhari
E. Imamu Malik bin Anas

(xii) Katika mirathi neno " Tarka " lina maana:
A. Matayarisho ya mazishi ya marehemu. B. Kauli ya wasia wa marehemu
C. Warathi wake marehemu walio haiD. Mali au vitu alivyoviacha marehemu.

(xiii) Sanda ya mtoto wa kike au wa kiume huvishwa:
A. Majamvi Manne B. Majamvi matatu C. Majamvi matano D. Majamvi sita
E. Majamvi mawili na kanzu. ( )

(xiv) Siku ya mwezi 8 (dhul-hija) (yaumu Tar-wiya) mahujaji huondoka wapi kuelekea wapi na muda gani ?
A. Huondoka Makka kuelekea Arafa kabla ya saa moja Asubuhi
B. Huondoka Madina kuelekea Makka kabla ya Magharib
C. Huondoka Makka kuelekea Minna kabla ya Adhuhuri
D. Huondoka Makka kuelekea Muzdalifa baada ya sala ya Adhuhuri
E. Huondoka Minna kuelekea Madina kabla ya Magharib. ( )

(xv) Ipi ni eda ya mwanamke ambaye mume wake amezama baharini wala hakuonekana:
A. Akae kwao mpaka atakapoonekana. B. Akae miezi minne na siku kumi
C. Akae miaka minne kwanza bila kukaa kizuka.Halafu kama bado hajaonekana akae miezi minne na siku za ufiwa.
D. Akae mwaka mmoja kwanza halafu akae miezi minne tu.
E. Arudi kwao akatoe taarifa kwanza halafu akae mwaka mmoja na miezi sita. ( )

2. Oanisha maelezo ya Vita na Matukio mbali mbali katika orodha **"A"** na majina ya vita na misafara yaliyomo katika orodha **"B".** Kisha andika herufi ya jibu sahihi kwa kila kipengele katika kijitabu chako cha kujibia.

ORODHA "A"	**ORODHA "B"**
(i) Katika msafara wa Tabuk, Kiongozi wa waliojiadhibu wenyewe.	A. Msafara wa Tabuk
(ii) Waislam walikuwa elfu kumi na mbili (12,000).	B. Vita vya Hunaini
(iii) Vita vya tatu kupiganwa katika Uislamu.	C. Vita vya Badri
(iv) Vita vya kwanza katika uislamu.	D. Mkataba wa Hudaibiya
(v) Katika mkataba wa Hudaibiya, alitia saini kwa upande wa Makraishi.	E. Vita vya Ahzaab
	F. Suhail bin Amri.
	G. Abuu Lubabah.
	H. Omar bin khattab.

SEHEMU B : (Alama 35)

JIBU MASWALI YOTE KATIKA SEHEMU HII.

3. Tofautisha kati ya Mahari na Maharimu

4. (a) Taja nguzo mbili za funga.

(b) Bainisha mambo matatu yanayo haribu funga kwa mtu na mke wake.

5. (a) Eleza aina kuu mbili za faradhi.

(b) Taja masharti matatu ya swala ya jeneza.

6. (a) Eleza hoja mbili kwa nini hatuwezi kufata vitabu vilivyopita kinyume na Qur-an.

(b) Kwa nini Qur-an ni kitabu pekee kitukufu (Nukta mbili)

7. Bainisha mambo matano ya kuzingatia unapoandaa khutba ya ijumaa.

8. Toa fat-wa juu ya mambo yafuatayo:
(a) Mtu aliyehirimia ibada ya hija halafu akamkumbatia mkewe na akatokwa na manii na Yule ambaye hakutoka manii.

(b) Mtu aliyetoa wasia kwa jamaa zake kuwa akifa Tsh. Milioni moja (1,000,000/=) apewe mke wake wa kwanza

9. (a) Taja sababu tatu (3) zilizopelekea kutoandikwa hadithi wakati wa Mtume (s.a.w)

(b) Zitaje aina kuu mbili za Isnadi.

SEHEMU C : (Alama 45)

JIBU MASWALI MATATU (3) KATIKA SEHEMU HII.

10. Mtume Muhammad (s.a.w) kabla ya kupewa utume aliandaliwa awamu kuu mbili (Kiil-ham na Kimafunzo). Elezea Mafunzo matano (5) yatokanayo na maandalizi ya kiil-hamu.

11 Toa maelezo mafupi juu ya aina kuu mbili za dini. Kisha fafanua kwa nini hakuna mtu asiye na dini?

12. Elezea Udhaifu wa dai la Salman Rush-die lisemalo "Qur-an ni aya za shetani" (Nukta nne).

13. Fafanua hoja tano za kihistoria zilizomo ndani ya Qur-an kuthibitisha kuwepo kwa ufufuo (siku ya malipo).

033/2A

TIME: 2:30 Hours

Friday, 14th August 2020.

URBAN WEST REGION MOCK EXAMINATION URBAN WEST REGION MOCK EXAMINATION URBAN WEST

Instructions

1. This paper consists of **TWO (2)** questions.

2. Answer **all** questions, Each question carries **25 marks**

3. All writing should be in **blue** or **black** ink Except for diagrams which must be drawn in pencil.

4. Cellular phones are **Not** allowed in the examination room

5. Write your **Examination Number** on every page of your answer booklet(s).

1. You have been provide with specimens S1, S2 and S3, a beaker, test tube and the table of reagent, Use them to carry out the experiments instructed in **(i) – (ix)**, then answer the questions that follow .

(i) Take specimen S2, peel it to remove the outer cover and cut it into small pieces

(ii) Take a little amount of peeling specimen S2 and grid Specimen S2 by using a mortar and pestle to obtain the paste.

(iii) Put the paste in a beaker and then add 30ml of water and steer a mixture.

(iv) Put 2ml of solution contain from Specimen S2 into the test tube.

(v) Add 2ml of Benedicts solution into the test tube contain solution S2 and boil the content

(vi) Add 1ml of dilute hydrochloric acid into the test tube contain solution S2 and boil the mixture, After cooling, add 2mil of sodium hydroxide solution slowly until the fizzing stops followed by 2mil of Benedicts solution and boiling the mixture again.

(vii) Cut the specimen S1 into two equal halves. Add two drops of Iodine solution on side of the Cut Surface.

(viii) By using Scalpel Cut the Specimen S3 into equal halves, Take one the halves and squeeze into the beaker.

(ix) Add 1mil of sodium hydroxide solution into the test tube, Followed by 2-3 drops of copper Sulphate solution while shaking the mixture.

Questions

a. (i) What was the aim of the experiment?

(ii) Based on the Experimental observations, which among specimens S1, S2 and S3 Contain starch? Give one reason to support your answer.

(iii) What will be the End products of digestion food substance Identified in the Specimens S1?

b. (i) What is the result obtained after adding Iodine solution on the cut surface of the Specimen S1.

(ii) Why boiling and cooling are important in procedure (vi)?

(iii) What is the importance of the food substance Identified in Specimen S1 to the human body?

c. (i) Name the Nutritional problems a child is likely to suffer if fed with a diet deficient / lacking the food substances you have identified in Specimen S3.

(ii) What is the Symptoms of Nutritional problem you named (c) (i) above

(iii) Why sodium hydroxide solution and dilute hydrochloric acid were used in the experiment?

2. You have been provided with Specimen B1, B2, B3, B4 and B5 Carefully Observe the Specimens, then answer the following questions:

(a) (i) Identify the Specimens B1, B2, B3, B4 and B5 using their Common names.

(ii) Classify the Specimens B3, B4 and B5 to the class level

(iii) Why the Specimens B3 and B4 were formally placed in the same phylum but different classes?

(b) (i) Name three diseases commonly Spread by the Specimen B4

(ii) Identify two observable features which enable the specimen B1 to adapt to its habitat

(c) (i) Remove the petals and stamen then draw and label the remaining part of the specimen B2.

(ii) What is the biological name of the remained part of the specimen B2?

(iii) Name the process which follows in the life cycle of the flowering plants after pollination

(For Both School and Private Candidates)

BIOLOGY 2B (ACTUAL PRATICAL)

033/2B

TIME: 2:30 Hours **Wednesday, 19th August 2020.**

Instructions

1. This paper consists of **TWO (2)** questions.

2. Answer **all** questions, Each question carries **25 marks**

3. All writing should be in **blue** or **black** ink Except for diagrams which must be drawn in pencil.

4. Cellular phones are **Not** allowed in the examination room

5. Write your **Examination Number** on every page of your answer booklet(s).

1. You have been provide with specimens, Carefully follow the instruction given then answer the questions that follow :

(a) Heat some water in a beaker to boiling point and then turn off the source of heat.

(b) Use forceps of dip the leaf in hot water for about 30 seconds.

(c) Remove the leaf from hot water.

(d) Then push the leaf into bottom of the test tube and cover it with methylated sprit / alcohol.

(e) Place the tube in hot water until the alcohol boils together with the leaf.

(f) Remove the leaf from the test tube containing ethanol and deep it into hot water.

(g) Spread the decolorized leaf on a white tile and pour few drops Iodine solution on it.

Questions.

i. Identify the specimen X using their common name.

ii. What was the aim of the Experiment?

iii. Why was the leaf dipped in hot water for 30 sec?

iv. Give reason why the Leaf was boiled in methylated Sprit / ethanol.

v. Why was the leaf dipped in hot water once again

vi. Give the Interpretation of the result observe when few drops of Iodine Solution were poured into the decolorized leaf

vii. Mention the Physiology process investigated in the Experiment

viii. Define the process mentioned in (vii) above

ix. Write the chemical reaction which show the process named in (viii) above.

2. Study Specimen A1, A2, A3, A4, A5 and A1 which belong to the same taxonomic group, then answer the following questions:

(a) (i) Identify the Specimens by their Common names.

(ii) State the habitat of Specimen A1.

(iii) Classify the Specimen A1, A2, and A5 to class level

(b) (i) In which way(s) is Specimen A4 similar and yet different from Specimen A5.

(ii) Name two (2) diseases Commonly Spread by the Specimen B4.

(iii) Give two (2) ways by which you can prevent the Spread of this disease.

(c) (i) List four economic Importance of Specimen A4

(ii) Name the mode of feeding of Specimen A1.

(d) Draw and label of Specimen A1.

2. Answer **all** questions, Each question carries **25 marks**

3. All writing should be in **blue** or **black** ink Except for diagrams which must be drawn in pencil.

4. Cellular phones and Unauthorized material are **Not** allowed in the examination room

5. Write your **Examination Number** on every page of your answer booklet(s).

0001

1. You have been provided with Potassium Permanganate Crystals, beaker and water.
   (a) Pour about 100cm^3 of water into a clean beaker and leave it for some time so that the water settles Completely

   (b) Using a Spatula, drop Crystal of Potassium permanganate into the beaker of water.

   (c) Leave the Mixture Completely Undisturbed for about 10 minutes, Observe and record what happens.

Questions

   i. What was the aim of the Experiment?

   ii. What happened to the Potassium Permanganate when it was put in water

   iii. Explain why the changes you observed occurred?

   iv. Draw a Conclusion from the Experiment.

   v. Name the physiological process Investigated in this Experiment.

   vi. Define the Process mentioned in (v) above.

   vii. Mention any two Importance of process in nature.

2. You have been provided with Specimen V1, V2, V3, V4, V5 and V6 Carefully Observe the Specimens, then answer the following questions:

   a. (i) identify the Specimen by their Common names.

   (ii) Classify Specimen V3, V4 and V5 into their respective class level.

   (iii) Name the growth movement (response) shown by Specimen V1 to the stimulus of water and gravity.

   b. (i) Specimen V1 is said to be a destructive Organism, Justify this Statement.

   (ii) State the economic Important of Specimen V3.

   (iii) Give two Similarities and Difference between Specimen V3 and V4.

   c. Draw and Label of Specimen V3.

FORM FOUR (IV) MOCK EXAMINATION - 2020.

(For Both School and Private Candidates)

PHYSICS 2B (ACTUAL PRATICAL)

031/2B

TIME: 3:00 Hours **Saturday, 22th August 2020.**

Instructions

1. This paper consists of **two (2)** questions. Answer **all** questions.

2. Where calculations are involved show your work clearly.

3. Mathematical tables and non-programmable calculators may be used

4. Marks for questions are indicated at the end of question

5. Cellular phones and unauthorised materials are **not** allowed in the examination room

6. Write your **Examination Number** on every page of your answer booklet(s)

7. Use π = 3.14

1. The aim of this experiment is to determine the acceleration due to gravity, g, by means of a pendulum bob, B

1.1 Tie a thread to the given pendulum bob. Make a knot at a short distance from the bob. This distance should be of the order of 10cm. Measure and record the distance, b, between the knot N and the pendulum bob B.

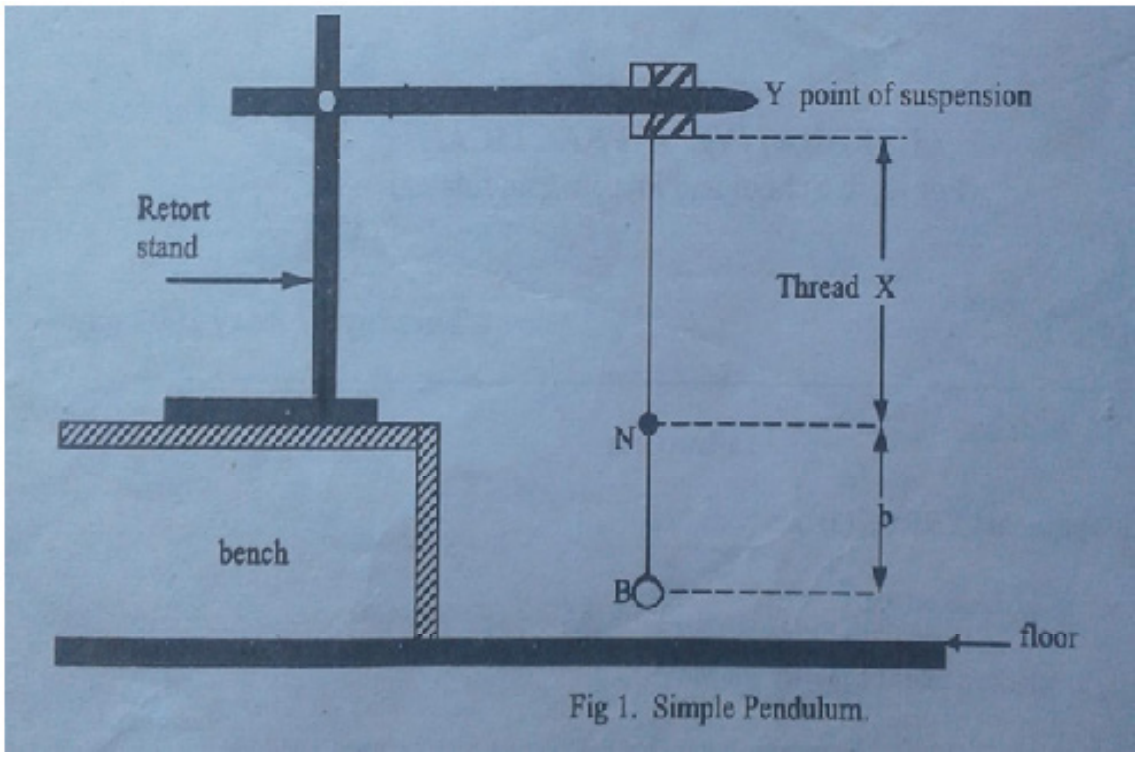

Fig 1. Simple Pendulum.

The distance between the knot N and the point of suspension Y is denoted by X as indicated in Fig 1. Adjust X to be 10cm. Displace the pendulum by a small angle and then release it so that it swings to and fro with a small amplitude of vibration. Find the time t for 30 oscillations and hence determine the periodic time T for one oscillation.

1.2 Repeat this process for the values of X = 30 ,50, 70 and 90cm

1.3 Tabulate the values of X, t, T and T^2

(a) Plot a graph of T^2 against X

(b) Find the slope of your graph

(c) Calculate a value of the acceleration, g, due to gravity

(d) Read and record a value of the x-axis intercept

(e) What is the physical significance of the x-axis intercept?

(f) Read and record the T^2-axis intercept, Y_o

(g) Show that, Y_o is related to b by $Y_o = \frac{4\pi^2 b}{g}$

(h) Calculate a value of b, using the value of g calculated in 1(c) above

(i) Use a metre rule to a accurately measure the value of b_o between N and B on the simple pendulum.

(j) Calculate the percentage error resulting from the true value b_o and the experimental value b as follows: % age error = $\frac{(bo-b)\times 100}{bo}$

Where:

b_o is the experimental value obtained from 1. (d), the x- axis intercept

b is the experimental value obtained from 1. (h), a quantity deduced from the T^2- axis intercept.

1.4 List down any two possible sources of errors and its precaution.

2. You are provided with a switch **K**, an ammeter **A**, the variable resistor **P**, unknown resistor **R**, voltmeter **V** and a battery **E**.

(a) Connect a switch, variable resistor, unknown resistor and an ammeter in series with a battery. Connect voltmeter across the unknown resistor R.

(b) Close the switch K and adjust the rheostat by sliding slowly from one end, read and record the value V of the voltmeter and current $\mathbf{I}$ of the ammeter.

(c) Repeat the experiment by changing the rheostat slider to obtain about five pair of readings.

NB: Adjust the rheostat until when the pointer is exactly on the division of the metre scale.

Questions

(i) Draw a well labelled diagram of the circuit you connected.

(ii) Tabulate the results of values of voltage **V** and the current

(iii) Plot the graph of **voltage V** against the **current.**

(iv) From your graph determine the slope **S**

(v) Use the graph obtained in 2 (iii) to write the equation relating the voltage V and the current and comment on the equation you obtained.

(vi) What is the physical meaning of the slope of the graph?

(vii) Comment on the nature of the graph.

(viii) What is the aim of performing this experiment?

(ix) Name any two possible sources of errors and its precautions in your experiment.

URBAN WEST REGION MOCK EXAMINATION URBAN WEST REGION MOCK EXAMINATION URBAN WEST

FORM FOUR (IV) MOCK EXAMINATION - 2020.

(For Both School and Private Candidates)

PHYSICS 2A (ACTUAL PRATICAL)

031/2A

TIME: 3 Hours **Tuesday, 18th August 2020.**

Instructions

1. This paper consists of **two (2)** questions. Answer **all** questions.
2. Where calculations are involved show your work clearly.
3. Mathematical tables and non-programmable calculators may be used
4. Marks for questions are indicated at the end of question
5. Cellular phones and unauthorised materials are **not** allowed in the examination room
6. Write your **Examination Number** on every page of your answer booklet(s)
7. Use π = 3.14

1. The aim of this experiment is to determine the acceleration due to gravity, g, by simple pendulum.

Proceed as follow:

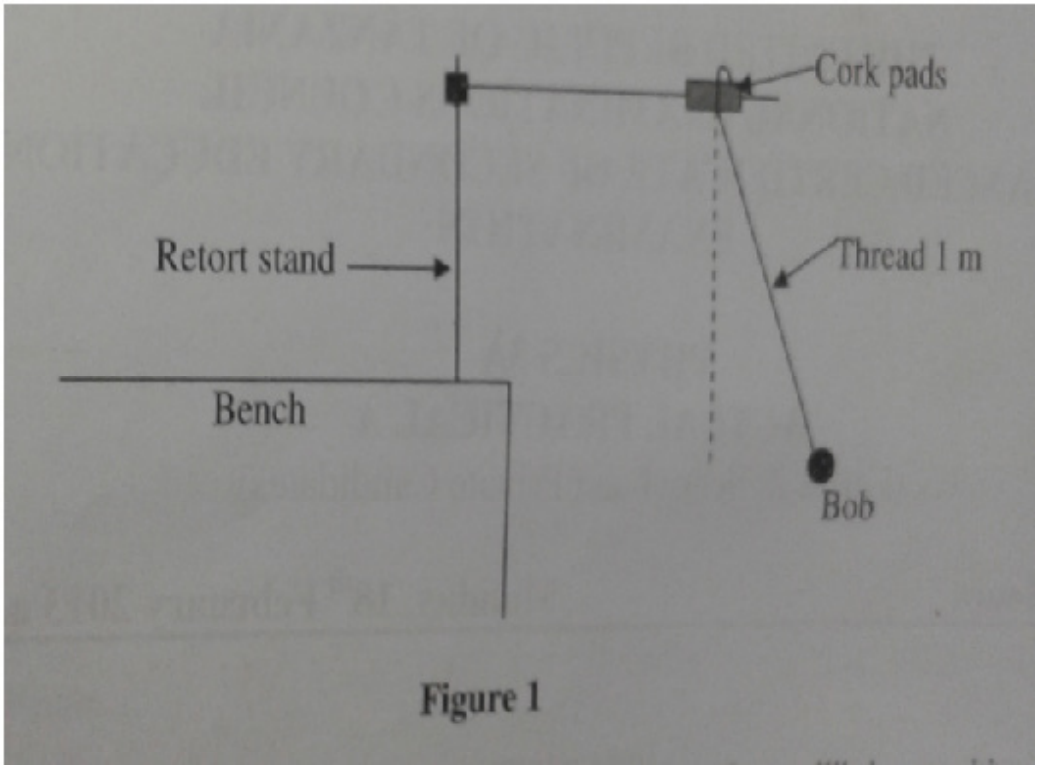

Figure 1

(a) Using a pointer, place a reference mark at the equilibrium position of the bob. Set the bob to oscillate through a small angle and begin counting the number of oscillations through the equilibrium position of the bob. Find the time for 30 complete oscillations.

(b) Measure the length, l, of the thread from the point of suspension to the point of attachment of the bob and record the result in metres (m).

(c) By raising the thread each time, shorten the length of the pendulum by about 10cm, 20cm, 30cm and 40cm.

(d) On each occasion, find the length of the thread in metres and the time for 30 complete oscillations. Tabulate your results

(e) Plot the graph of l against T^2, where T is the period of the oscillations related by the equation: $T = 2\pi\sqrt{\frac{l+c}{g}}$ and c is the small constant length from the point of attachment of the bob to the centre of gravity of the bob.

(f) Determine the acceleration due to gravity, g.

(g) Mention any two sources of errors.

2. You are provided with a dry cell **E**, switch **K**, an ammeter **A**, resistance box **R** and several pieces of connecting wires.

Proceed as follows:

(a) Connect a dry cell E, switch K, an ammeter A and resistance box R in series.

(b) Draw a well labelled diagram of your circuit you connected.

(c) Using the resistance box adjust R so that it is $\mathbf{1}_{\Omega}$. Put the switch, **K ON** and immediately read and records the current $\mathbf{I}$, in the circuit. Switch **OFF**.

(d) Repeat the procedure in 2(c) for the values of R equal to 2Ω, 4Ω ,5Ω , and 6Ω

(e) Tabulate the values of R, I and $\frac{1}{I}$

(f) Plot the graph of **R** against $\frac{1}{I}$

(g) Determine the slope, p from your graph.

(h) Disconnect **R** from the circuit and connect the wire, **W** in place of it. Switch **ON** and record the current corresponding to **W** and call this as I_w and then switch **OFF**.

(i) Use the graph to compute the value of E.m.f of the cell and internal resistance.

(j) From your graph, find the resistance of the wire, **W**

(k) What is the aim of doing this experiment?

(l) State any two possible sources of error and its precaution in your experiment

(For Both School and Private Candidates)

CHEMISTRY 2A (ACTUAL PRACTICAL)

0132/2A

Time: 2:30 Hours **Monday, 17th August 2020**

Instructions

1. This paper consists of **two (2)** questions. Answer all questions.
2. Each question carries **25** marks
3. Cellular phones and any **unauthorized** materials are not allowed in the examination room
4. **Mathematical tables** and non-programmable calculators may be used.
5. Write your examination number on every page of your answer booklet(s).
6. For calculations you may use the following constants:
   - **Density of solution=1.0gcm^{-3}**
   - **Atomic masses: H = 1,O = 16, Na = 23, Cl = 35.5,C = 12.**

1. You are provided with the following solutions:

BB: Is a solution containing 1.46g of the pure hydrochloric acid in 0.4dm^3 of aqueous solution

M.O: Methyl orange indicator

Procedure:

(a) Pipette 25cm^3 of solution **AA** into a 250cm^3 titration flask

(b) Add two drops of methyl orange indicator

(c) Titrate this solution against solution **BB** from the burette until a colour change is observed

(d) Record the first titre value

(e) Repeat your titrations procedure (a) – (d) above to three times and record your results in the table of results.

The volume of the pipette used was _____cm^3

The volume of the burette used was_____cm^3

Burette readings

Titration number	Pilot	1	2	3
Final reading (cm^3)				
Initial reading(cm^3)				
Titre (cm^3)				

Questions

_____cm^3 of solution **AA** required _____cm^3 of solution **BB** when MO was used

The colour change during titration from_____ to _____

(a) Calculate the concentration of solution **BB** in mole per litre

(b) Calculate the concentration of solution **AA** in moles per litre

(c) Calculate the percentage purity of the solution **AA**

2. You are provided with the following:

C_1: Metal M

C_2: 1M Hydrochloric acid, HCl

C_3: 2M Hydrochloric acid, HCl

Procedure:

(a) (i) Using a measuring cylinder, place 50cm^3 of **C_2** solution into a100 cm^3 beaker

(ii) Add **C_1** provided on a watch glass to the **C_2** in the beaker and immediately start a stop watch

(iii) Stir to dissolve it as quickly as possible. Record the time taken for the $\mathbf{C_1}$ to disappear in solution in a table provided below

(b) Repeat the above experiment using $\mathbf{C_3}$ provided in a beaker in place of $\mathbf{C_2}$.

Results

Experiment	Time (second)
Initial 1 A (When $\mathbf{C_2}$ used)	
Highest B(When $\mathbf{C_3}$used)	

Questions

(i) Which experiment was fast? Explain your answer

(ii) State the products formed when the acid reacts with a metal

(iii) If metal M is magnesium; state the word equation for the reaction between magnesium and hydrochloric acid

(iv) State a research question

(v) State hypothesis that was tested in this investigation (experiment)

TIME: 2:30 Hours **Thursday, 20th August 2020.**

Instructions

1. This paper consists of **two (2)** questions. Answer all questions.

2. Each question carries **25** marks

3. Cellular phones and any unauthorized materials are not allowed in the examination room

4. Mathematical tables and non-programmable calculators may be used.

5. Write your **examination number** on every page of your answer booklet(s).

6. For calculations you may use the following constants:

   - Density of solution=1.0gcm^{-3}
   - Atomic masses: H = 1,O = 16, Na = 23, Cl = 35.5,C = 12.

1. You are provided with the following solutions:

BB: Is a solution containing .1g of the impure hydrochloric acid in 250cm^3 of aqueous solution

M.O: Methyl orange indicator

Procedure:

(f) Pipette 25cm^3 of solution **AA** into a 250cm^3 titration flask

(g) Add two drops of methyl orange indicator

(h) Titrate this solution against solution **BB** from the burette until a color change is observed

(i) Record the first titer value

(j) Repeat your titrations procedure (f) – (i) above to three times and record your results in the table of results.

The volume of the pipette used was _____cm^3

The volume of the burette used was_____cm^3

Burette readings

Titration number	Pilot	1	2	3
Final reading (cm^3)				
Initial reading(cm^3)				
Titre (cm^3)				

Questions

_____cm^3 of solution **AA** required _____cm^3 of solution **BB** when MO was used

The colour change during titration from_____ to _____

(a) Calculate the concentration of solution **AA** in mole per liter

(b) Calculate the concentration of solution **BB** in moles per liter

(c) Calculate the percentage purity of the solution**BB**

2. You are provided with:

S_1: 0.5M Sodium thiosulphate, $Na_2S_2O_3$

S_2: 0.1M Hydrochloric acid, HCl

S_3: Distilled Water

S_4: stop watch

S_5: Piece of white paper marked "X"

PROCEDURE

(1) Place a 100 cm^3 beakeron top of (S_5) the mark X in such a way the mark is clearly.. seen through the bottom of the conical flask.

(2) Using 10 ml measuring cylinder (or burette) measure out 10mls of S_1 and pour in a beaker on top of the mark S_5

(3) Using another 10 mls measuring cylinder (or burette) measure out 10 mls of S_2 and at the convenient time pour S_2 in the conical flask containing S_1 and immediately start a stop watch. Record the time taken for the mark to disappear due to formation of the precipitate.

(4) Repeat the experiment for different sets of concentrations as shown in a table below.

Experiment	**Sodium thiosulphate (cm^3)**	**Water**	**0.1 M HCl**	**Time**
A	10	0	10	
B	8	2	10	
C	6	4	10	
D	4	6	10	
E	2	8	10	

From the experiment

(a) Which experiment was fast? Explain your answer

(b) What caused the precipitate to occur in the reaction?

(c) Write the ionic equation between the acid and sodium thiosulphate

(d) State a research question

(e) State hypothesis tested in this investigation (experiment)

FORM FOUR (IV) MOCK EXAMINATIONS -2020.

(For Both School and Private Candidates)

CHEMISTRY 2C - ACTUAL PRACTICAL

032/2C

TIME: 2:30 Hours **Monday, 24th August 2020.**

Instructions

1. This paper consists of **two (2)** questions. Answer all questions.

2. Each question carries **25** marks

3. Cellular phones and any unauthorized materials are **not allowed** in the examination room

4. **Mathematical tables** and non-programmable calculators may be used

5. Write your **examination number** on every page of your answer booklet(s).

6. For calculations you may use the following constants:
   - Density of solution=1.0gcm^{-3}
   - Atomic masses: H = 1,O = 16, Na = 23, Cl = 35.5,C = 12.
   -

1. You are provided with the following solutions:

BB: Containing 1.825g of hydrochloric acid per half litre of solution.

AA: A solution made by dissolving 2g sodium carbonate which mixed with some sodium chloride crystals in 0.25L of the solution
Methyl orange indicator

Questions

(a) Titrate **BB** (in burette) against **AA** (in conical flask) using two drops of indicator and obtained three titre values. Record your data in a tabular form.

(b) (i) Find the mean titre volume.

(ii) Write the summary of the experiment

(iii) What was the colour change during your experiment?

(c) Showing your procedures clearly calculate the percentage by mass of sodium chloride in the solution **AA**

2. You are provided with the following:

C_1: 4g of anhydrous copper (II) sulphate.

C_2: 4 g of Ammonium chloride.

C_3: Distilled water.

Procedure:

(a) (i) Using a measuring cylinder, place 50cm^3 of distilled water in a 100 cm^3 beaker and record the initial temperature of water (I).

(ii) Add salt **C_1** provided on a watch glass to the water in the beaker and stir to dissolve it as quickly as possible.

(iii) Record the highest temperature (II) of the solution and hence the temperature change (I-II)

(b) Repeat the above experiment using 4 g of **C_2** provided on a watch glass in place of **C_1**.

Results

	Anhydrous copper (II) sulphate	Ammonium chloride
Initial temp of water /^{0}C (I)		
Highest/ lowest temp of solution / ^{0}C (II)		
Change in temperature (^{0}C)		

Questions

(a) Define the following:

(i) Endothermic reaction

(ii) Exothermic reaction

(ii) Explain the differences in the values of temperature change obtained for the two forms of the salt.

(iii) Use the results obtained above, name salt which undergo exothermic reaction and endothermic reaction

(iv) The salt $\mathbf{C_1}$ used to test the presence of certain solvent, name the solvent

(v) Mention the three uses of the solvent named above

BOOK KEEPING

062

TIME: 3 Hours **Friday, 14th August 2020.**

Instructions

1. This paper consists of section A, B and C with a total of **nine (9)** questions.

2. Answer **all** questions in section A and B and **Only two (2)** questions from section C.

3. Non programmable calculators may be used.

4. Cellular phones and any unauthorized Materials are **not** allowed in the examination room.

5. Write your **Examination Number** on every page of your answer booklet(s).

SECTION A : (20 Marks)

Answer all questions in this section.

1. For each of the items **(i) – (xv)** choose the correct answer among the given alternatives and write its letter beside the item number.

i) The column in the account which show the page of the ledger is called
(A) Particular (B) Folio (C) Ledger account (D) Details ( )

ii) A seller sells goods at a profit of 25% on sales. In a particular month, he sold goods costing TZS 45,000. Sales value of goods will be.
(A) TZS 56,250 (B) TZS 65,000 (C) TZS 55,000 (D) TZS 60,000 ( )

iii) Is an allowance given to a customer who settles his bills within a given period of time?
(A) Trade discount (B) Cash discount (C) Discount allowed (D) Discount received

iv) Which one among the folllowing books of original is considered part of the ledger
(A) Cash book (B) Sales Journal (C) Purchases Journal (D) The Journal ( )

v) The document sent by supplier to check the over charge on the original invoice is called
(A) Debit note (B) Credit note (C) An invoice (D) Bank statement ( )

vi) X and Y entered into a joint venture sharing profit and losses equally. X provides goods from his stock TZS 20,000. He pays expenses amounting to TZS 2,000. Y incurs further expenses on carriage TZS 3,000. He received cash for sales TZS 35,000. He also takes over goods to the value of TZS 10,000. What will be the amount to be remitted by X to Y?
(A) TZS 34,500 (B) TZS 32,000 (C) TZS 17,500 (D) TZS10,000 ( )

vii) Manyota bought goods worth TZS 4,000. He was given 10% cash discount and 5% trade discount. How much does Manyota required to pay?
(A) TZS 3,200 (B) TZS 3,400 (C) TZS 3,420 (D) TZS 3,600 ( )

viii) Which of the following errors a trial balance will disclose
(A) Compansating error (B) Error of Commission (C) Casting error
(D) Error of complete reversal ( )

ix) Is a periodical statement sent by the bank to its customers showing the details between the bank and the account holder ( )
(A) Statement of account (B) Bank statement (C) Credit statement (D) Debit statement

x) Are those entries in which same account is debited and credited.
(A) Contra entry (B) Double entry (C) Compound entry (D) Single entry ( )

xi) If a purchases return of TZS 1,000 has been wrongly posted to the debit of sales returns account, but has been correctly entered in the supplier's account, the total of the
(A) Trial balance wiould show the debit side to be TZS 1,000 more than the credit
(B) Trial balance wiould show the credit side to be TZS 1,000 more than the debit
(C) The debit side of the trial balance will be TZS 2,000 more than the credit side
(D) The credit side of the trial balance will be TZS 2,000 more than the debit side( )

xii) The decrease in provision for doubtful debts would result in

xiii) A cheque which a bank deny to make payment is known as

(D) Bank cheque ( )

xiv) If del-credere commission is given, the loss of bad debts will be
(A) Born by consignor (B) Ignored (C) Shared between consignor and consignee
(D) Bron by consignee ( )

xv) Goods worth TZS 10,000 taken by propriator should be credited to
(A) Proprietor's account (B) Purchases account (C) Drawings account
(D) Sales account ( )

2. Match the items in the **Column A** with the responses in the **Column B** by writting the letter of the correct response beside the item number in the answer booklet provided.

Column A	**Column B**
(i) Is used to record goods bought on credit for resale.	A. Purchases ledger
(ii) Is used to record goods reurned from credit customers.	B. Purchases journal
(iii) Is used to record goods sold on credit.	C. Sales return Journal
(iv) Is used to record goods returned to credit suppliers.	D. General journal
(v) Is used to record goods sold on prompt payment.	E. General ledger
	F. Sales journal
	G. Sales ledger
	H. Purchases return journal
	I. Cash book

SECTION B : (40 Marks)

Answer all questions in this section

3. Briefly explain the following:
   (a) Accrued expenses
   (b) Work-in-progress
   (c) Provision for doubtful debts
   (d) Del-credere commission
   (e) Error of principle

4. (a) Wahat is bank reconciliation statement.
   (b) Mention and explain four (4) items which may cause the Cash book balance to differ from that of the Bank statement.
   (c) Mention five (5) reasons for banks to dishonour a cheque even if the drawer has enough money in the account.

5. Saving Investment Ltd purchased plant for TZS 1,000,000 on 1 January, 2017. On 1 July in the same year additional plant was purchased costing TZS 500,000. On 1 July 2018, the plant which was purchased on 1 January 2017 become obsolete and was sold off for TZS 400,000. Saving Investment Ltd provide for depreciation on its plants at the rate of 10% per annum on original cost at 31 December every year.Prepare the Plant, Provision for Depreciation on Plant and Plant Disposal Accounts for the two years ended 31

6. Enter the following transactions in the two column cash book and bring down the balances on 1 December, 2017.

November	TZS
1 Mr Jemzi started a business with	60,000
4 Bought furniture from Mohammed Furniture	5,000

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.

2. Answer **all** questions in sections A and B and **two (2)** questions from section C.

3. Calculators and cellular phones are **not** allowed in the examination room.

4. Write your **Examination Number** on every page of your answer booklet(s).

SECTION A : (20 Marks)

Answer all questions in this section.

1. For each of the items **(i) – (xv)** choose the correct answer from among the given alternative and write its letter beside the item number in the answer booklet provided.

i) The label which shows the price of a particular goods in a shop is called
A. Price list B. Price tag C. Invoice D. Branding ( )

ii) Ezden Trader's daily sales volume is 4 tones, minimum stock is 9 tones, and delivery time is 20 days. What will be his order point?
A. 56 tones B. 89 tones C. 71 tones D. 184 tones
( )

iii) Which of the following is the best feature of the multiple shops?
A. Providing self service to customers.
B. Stocking variety goods from different producers.
C. Stocking similar goods and often similar in appearance.
D. Stocking similar goods under one roof and one management. ( )

iv) The art of selling goods to the final consumer is called
A. Retails trade B. Wholesale trade C. Retailing D. Wholesaling ( )

v) The shops which sell products of one manufacturer only are called
A. Supermarket shops B. Tied shops C. Retailing D.Wholesaling ( )

vi)A type of demand for which a commodity serves the same purpose as served by other commodity is regarded as: ( )
A. Composite demand B. Joint demand C. Competitive demand D.Derived demand

vii) A warehouse where imported goods are kept waiting for customs clearance is called
A. Specialized warehouse B. Bonded warehouse C. Public warehouse
D. Private warehouse ( )

viii) The movement along a demand curve is caused by:
A. Change in price of a commodity B. Change in consumer's income
C. Change in quantity demanded D. Change in consumer's taste ( )

ix) An art of making goods and services known to the public is known as
A. Marketing B. Sales promotion C. Advertising D. Communication ( )

x) Any price above equilibrium price for a given commodity leads to: ( )
A. Excess supply B. Decrease in supply C. Decrease in demand D.Excess demand

A. Direct services B. Public services C. Personal services D. Indirect services ( )

xiv) By using the theory of demand, which factor influences the buying decision of a consumer
A. Preference and test B. Number of producers C. Cost of production

xv) Which factor of production is characterized by value appreciation
A. Machine B. Labour C. Capital D. Land ( )

2. For each of the items **(i) – (v)**, match the descriptions of different types of trade in Column Awith their corresponding names in Column B by writing the letter of the correct response beside the item number in the answer booklet provided.

LIST A		LIST B
i)	Buying and selling of goods and services inside or outside the country.	A. Foreign trade B. Barter trade
ii)	Buying and selling of goods and services inside the country.	C. Retail trade
iii)	Buying of goods in bulk from the producer and selling them in reasonable quantity to retailers.	D. Wholesale trade E. Export trade
iv)	Buying and selling of goods whereby exchange involves goods by goods.	F. Import trade G. Home trade
v)	Selling of goods and services to other countries.	

SECTION B : (50 Marks)

Answer all questions in this section.

3. Briefly explain the following terms:
(a) Durable goods
(b) Consumer goods
(c) Indirect production
(d) Extractive industries
(e) Departmental store

4. (a) Define partnership deed.

(b) Mention five (5) contents of partnership deed

5. (a) Define elasticity of demand.

(b) Use the following demand and supply schedule to answer the questions below:

PRICE PER kg (TZS)		QUANTITY DEMANDED (kg)	QUANTITY SUPPLIED (kg)
P1	5	5,000	1,000
P2	10	4,000	2,000
P3	15	3,000	3,000
P4	20	2,000	4,000
P5	25	1,000	5,000

(i) Draw the demand and supply curves in the same pair of axes.

(ii) Indicate the equilibrium price and quantity.

(iii) Calculate the elasticity of supply of the commodity from P2 to P3.

(iv) Comment on the results you obtain in 5 (b) (iii) above.

6. (a) Complete the following table

Fixed Assets	Current Assets	Long term Liabilities	Current liabilities	Owner's Equity	Working Capital
300,000	60,000	180,000	30,000	(i)	(ii)
(iii)	120,000	90,000	(iv)	375,000	75,000
480,000	(v)	(vi)	195,000	300,000	45,000

7. The success of a retailer depends not only on the function he performs but rather personal qualities. Mention and briefly explain five (5) qualities of a good retailer.

SECTION C : (30 Marks)

Answer any two (2) questions in this section

8. (a) Give the meaning of a sole trader.

(b) Explain five reasons whya sole trader may wish to enter into partnership.

9. (a) What is meant by "specialization"?

(b) Mr. Yussuf is arguing that, specialization has only advantages. As a form four student, explain five disadvantages of specialization to Mr. Yussuf.

10. (a) Define international trade

INSTRUCTIONS

1. This paper consists of **three (3)** sections A, B and C

2. Answer all questions from section A and B, and any **one (1)** question from section C.

3. Cellular phones are **not** allowed in the examination room.

4. Write your **examination number** on every page of your answer sheet (s).

SECTION A : (15 marks)

1. and For each of the items **(i) – (x)** choose the correct answer among the given alternatives write its letter beside the item number.

i. Each cell in a spreadsheet has a unique
A. Row B. Column C. Address D. label ( )

ii. Absolute reference are created by adding
A. #sign B. $sign C. %sign D. @sign ( )

iii. What happens if you type = A1+A2 in to worksheet cell?
A. Data is interpreted as a label B. Excel interpreted four characters as number
C. Data is interpreted as a date function D. Data is interpreted as a formula ( )

iv. Deleting a character to the left of the cursor is accomplished by pressing
A. Del key B. backspace C. end key D. ctrl+del keys ( )

v. When starting word, the default document window name
A. WPD1 B. file C. document1 D. word1 ( )

vi. Which of the following cannot be set using the format command
A. Line spacing. B. Margins. C. Tabs and indents. D. Alignment. ( )

vii. Nasra wants to enter Computer Studies test marks in a spreadsheet. Which of the following keys will make the data entry faster?
A. Control keys B. Function keys C. Document keys D. Numeric keypad ( )

viii. Which of the following software will be loaded first to the memory when the computer is switched on?
A. Spreadsheet B. Word processor C. Operating system
D. Web page browser ( )

ix. The acronym GUI stands for
A. Game Using Interface. B. Google User Interface. C. Graphical User Interface.
D. Graphical Unique Interface. ( )

x. Which of the following files is an image?
A. rain.jpeg B. image.doc C. picture.exe D. project1.xls ( )

2. Match the items in list A with the responses in list B by writing the letter of the correct response beside the item number.

	LIST A		**LIST B**
i.	The first generation is based on	A.	Arrow key.
ii.	Save	B.	Transistor
iii.	Output device is used to get result from the	C.	Shift + Enter.
iv.	A set of program	D.	Software.
v.	Move up one cell.	E.	Computer.
		F.	Vacuum tube
		G.	Ctrl + c
		H.	Ctrl + S.
		I.	Light pen.
		J.	Ctrl + page up.

SECTION B : (75 marks)

Answer all questions from this section

3. Arrange the given technology with their relevant generation by writing the number that correspond to the generation **(1 mark each).**

   (i) Very Large scale integrated circuits

   (ii) Artificial intelligence

   (iii) Transistors

   (iv) Integrated circuits

   (v) Vacuum Tubes

4. Your friend wants to open stationary somewhere to do the following task. Advice him the devices that can use to do so.

   i. Play video game, flight simulator, training simulator and controlling industrial robot.

   ii. To take maps, pictures and drawing in computer.

   iii. To take text information into spoken sentence.

   iv. To produce high quality hard copy output.

   v. To take direct data entry into computer system from source document.

   b. A washing machine has a small display screen built into it. The use of display screen is to show an error code when a problem has occurred with a washing cycle. State whether the display screen is an output or storage.

5. Mr.kato wants to start a cyber café that offer the following services:burning programs, movies,music and wedding videos; movie watching, playing games,typing services, designing cards,adverts; and printing services at a fee.State hardware and software specifications of the computers to be used.

6. (a)What are the 4 differences between function and formula? (4 marks)

   (b) State the purpose of spreadsheet charts (1 mark)

   (c) Give three uses of spread sheet (3 marks)

7. A Many HTML developers like to use Frames in designing websites. Write down one Advantage and one disadvantage of using frame in HTML document. **(2 marks).**

   b. The table below is developed using html tags. Write down HTML code for the table shown below. (6 marks)

name	subject	mark	SEX
ALI	chemistry	90	M
HAJI	physics	78	M
ALI	mathematics	100	M
Vuai	Geography	98	M
FUAD	Biology	86	M
sisi		mimi	

8. (a)define the term 'database query'

   (b) By using a diagram, explain three types of relationship between tables in a relational database.

   (c) A garage is specialized in selling a second hand cars uses an electronic database to store information as shown below:

Product Detail

Eng-no	model	No. doors
001	NADIA	05
002	GX-1	05
003	NOA	04
004	HIACES	06

Sales-Table

Sales-ID	Eng-No	Price	Discount
S01	001	$500	20%
S02	002	$600	10%
S0	003	$400	15%
S04	004	$700	20%

i) Identify the primary key for each table

ii) Which field is a foreign key

iii) What type of relation exists between the two tables

iv) Write the data type for each field in sale table

9. Mr.Jonathan wants to invite school committee to discuss the development of the school. He preferred to use invitation card rather than letter. He needs some help to the following:

a. Mention 2 examples of software he can use to create invitation card?

b. Give 3differences between DTP and ms word.

c. Name the categories of DTP software.

SECTION C : (10 marks)

Answer any one (1) question from this section.

10. Operating system is software used to manage all activities done by a computer. With examples give a detailed elaboration of the classification of operating systems based on number of user and user interface.

11. (a) Describe the components of a computer system in term of input devices, output devices, processing devices and storage devices.

(b) Explain with examples how some of the devices you have described in (a) above can

PARENT'S NAME
PHONE NUMBER

Dear TITLE

RE: REQUEST TO RELEASE YOUR CHILD ON SAT 16th NOVEMBER

As the annual Inter-House MDD competitions draw nearer, our house is devising means of increasing time for practice.

I hereby request you to release your GENDER on the above mentioned date, to enable us polish his/her performance as CATEGORY.

We will be grateful for your positive response.

.....
Mrs. Luutu Betty
HOUSE MISTRESS-MBOIZI HOUSE

Student's Number	Parent's Name	Phone Number	Title	Gender	category
1. Okech Kate	Mr. Okech Moses	0703-232 522	Sir	Daughter	Dancer
2. Kale Angel	Ms. Nankya Percy	0772-545 333	madam	Daughter	Actress
3. Ssali Ben	Mr. SsaliJames	0752-562 418	Sir	Son	Actor
4. BbaaleTonny	Mr. Bbuye Bob	0712-214 555	Sir	Son	Singer
5. NambiAnnet	Ms. Sonko Sally	0783-655 631	madam	Daughter	Actress
6. Ladii Robert	Mr. Okidi Fred	0752-989 536	Sir	Son	Drummer

a. Type the letter and save it as **Permit Letter** (06 Marks)
b. Create the table and save it as **Permit table** (03 marks)
c. Include a footer of your index No on the letter (03 Marks)
d. Using an appropriate Word processing feature link the table to the letter so as to generate 6 letters to be the respective parents of the participants in Mr. Lubanga's House.(08 Marks)
e. Print all the 6 letters. (03 Marks)
f. Set the left and right page margins to 1.5 inches. (01 Marks)
g. Insert a printed watermark of the name of your school in the entire document.(02 Mark)

2. Using HTML code, design a four pages website about your personal information as shown below:

a. Create a home page for your personal information with navigation link to all other pages and a moving a marquee heading:
WELCOME TO XXX'S WEBSITE, Where XXX IS YOUR Examination number.

b. The other three pages should be as follows:

i. Page I: Bio-Data i.e. Date of birth, Nationality and Language spoken.
Other description:

Use bullets to list the languages spoken.

The heading shall be "Welcome to XXX's Bio-data".

The link name shall be "Bio-date".

Arrange your Bio-Data in a proper order. For example My examination number:S.0309/25

Date of birth: 12/3/1989

ii. Page II: Educational Background i.e. a table with border five (5) which shows a period of attendance and qualifications acquired.

Other descriptions are:

The heading shall be "My educational background".
Use "Educational" as the link name for this page.

iii. Page III: Responsibilities Held i.e a bullet list of two responsibilities held e.g. Monitor and head prefect.

Other descriptions are:

The heading shall be "Responsibilities held"
Use the "Responsibilities" as the link name for this page.

NB:

Use "form four examinations" as the title for all pages.

Use silver as the background color for all pages.

Save your web folder as "XXX website", and print out your codes.

c. Copy and paste in Microsoft office word, the **educational background** page. Save as background word.

3**.** Set up a new presentation consisting of 5 slides

a. **The first slide** must have a very light yellow back ground and your number and today's date in small black font placed in the top left corner. It must also contain clipart of a poll box as a logo placed in the bottom right corner. The logo must be resized so that it will note overlap any text or graphics on any slide.
Include the slide number in the center of the footer.

b. set the following styles of text throughout the entire presentation:
Heading: Dark green, center aligned, large font (between 55 and 75 point)
Subheading: Bright blue, left aligned, medium font (between 38 and 56 points)
Bulleted list:Bright blue, left aligned, small font (between 26 and 42 points). Use a bullet of your choice.

On the second slide:

1. Enter the heading Zanzibar electoral commission.

2. Enter the subheading presidential election below the heading:

3. Add the following presenter notes to this slide:

Introduce yourself and your role within the commission as electoral officer.

On the third slide:

4. Enter the heading the poll stations in the same style as the first slide.

5. Enter the following bulleted list on the right side of the slide:
   - Kijitoupele
   - Biashara
   - Kiembesamaki
   - Jangombe
   - Kwerekwe c

6. create a pie chart from the following data:

Poll stations	**votes**
Kijitoupele	59920
Biashara	73295
Kiembesamaki	138993
Jangombe	63665
Kwerekwe	137709

Place the chart on the left side of the slide. Do not display a legend.
Add a thick dark blue horizontal line between the heading and the rest of the slide content.

On the fourth slide:

Write the advantages of fair election and conclude about an election at the last slide.

Enter the link that will enable to open each slide on other slide.

c. Save your file as an election.

d. Print all slides on one page.

(iv)	Si j étais riche	D.	J'achèterai un appartement à Zanzibar.
(v)	Si je gagnais à la loterie	E.	J'achèterai une voiture.
		F.	Je resterai à l'hôtel.
		G.	Je réussirai à mes examens

SECTION B : (70 Points)

COMPREHENSION ET USAGE DE LA LANGUE.

3. Lisez le texte suivant et répondez aux questions.

Les deux jeunes gens ont passé toutes la matinée dans la ville. Ils ont marché au bord du lac victoria.A midi, ils sont rentrés dans un petit restaurant pour déjeuner. Ils ont trouvé une table libre près de la porte. Sur la porte. Sur la table, il y avait des verres, des assiettes, des cuillères, des tasses, des fourchettes et des couteauxaux. Apres le déjeuner, ils onto pris un autobus pour aller au stade Nyamagana

Quelle foule énorme devant i entrée du stade ils ontfait la queue et ils y ont attendu une demi-heure. Enfin, ils ont pu acheter les billets et entrer dans le stade. Vous avez qu'à ces réunions sportives tout le monde parle et crie, et personne n'écoute. C'est comme une mer, un océan de gens

Ill est trois heures juste. Des acclamations s'élèvent de tous cotes, car les deux ont paru sur le terrain au milieu des cris. 'Aaakidedea! yeboyebo!

Les capitaines ont tiré à pile ou face. Le simba a gagné et il a décidé de jouer contre le vent Pour le premier mi –temps. Enfin, c est le coup d'envoi. Tout de suite, la foule a poussé des Cris terribles, car un des avants de Simbaa réussi à percer la défense de Mtibwa et a presque Marque un but, mais le gardien a bien joué, il a donné un magnifique coup de pied, qui a renvoyé le ballon par-dessus les têtes jusqu'à l'autre bout du terrain.

Après ce début dangereux, Mtibwa a pu garder le ballon presque toujours dans le camp des Adversaires. Mtibwa a marqué un but, avec un coup formidable. Juste avant la mi-temps, d'avant centre de Simba est tombé et s'est blessé au bras cela lui a fait mal et il a dû quitter le terrain.

A quatre heures moins le quart a arbitre a siffle pour indiquer la fin de la première mi-temps

Pendant la deuxième mi-temps, l'allier droit de Mtibwa a marqué un autre but mais peu après

Il a reçu un coup de pied à la jambe. Ses amis l'ont aidé à quitter le terrain et nous n'avons

pas vu la fin du match, mais nous avons lu dans le journal que ces deux équipes ont égalise deux à deux.

Questions

a) Ce dimanche- la, les deux cousins, qu'est-ce qu'ont voulu voir ?
b)Qui a gagné le match ?
c)Est-ce que Soka et Luoga ont vu la fin du match ? Pourquoi ?
d)Comment était le match ?
e)Soka et son cousin, qu'est-ce qu'ils ont fait le matin ?

(4) Complétez le dialogueentre Mrohoet le Docteur
Mroho : Bonjour docteur.
Docteur : (1) .....?
Mroho: Comme ci comme ça !
Docteur: (2).....?
Mroho: Parce que, je ne sens pas bien
Docteur : (3).....?
Mroho : Hier, je suis passé une nuit blanche.
J'avais mal au ventre.
Docteur : (4)..... ?
Mroho : Ouïe, j'ai mangé trop de pilaf
Docteur : (5).....

5. Arrangez ces phrases en ordre pour donner le sens logique en écrivant le numéro 1-5 dans votre livret (papier).
a) Puis il se dépêcheparés qu'il ne vent pas rater son bus.
b) Il s'en va de chez lui à huit heures.

6. Résumez le texte suivant en 70-80 mots.

En France On n'a pas le droit de travailler avant seize ans. Mais mon correspondant anglais, ben, a déjà un pâtitboulot. Il livre des journaux dans les rues près de chez lui. Il doit se lever trèstôt –vers six heures du matin-pour faire ça avant d'aller au collège. D'abord, il lui faut aller chercher les journaux à la papeterie, puis il fait ses livraisons àvélo. Ça lui prend une heure et il fait ça sept jours sur sept. Il dit que c'est souvent très fatigant. Cependant, il est assez bien payé, il gagne trente livres par semaine et ànoël, il reçoit un pour boire de certains de ses clients. Malgré cela, je ne voudrais pas faire un tel travail, surtout en hiver ou grand il pleut. De plus, je n'aimerais pas me lever de si bonne heure. Je préférerais rester au lit.

7. Robert explique à un copain ce qu'il a appris sur la CE (communauté Européenne). Complétez son explication par une expression de la liste suivante.

mondiale produits amélioré ouvriers dira économique la manche parlement s'unir union

FREDERIC : Alors, qu'est-ce que c'est,cette CE ?

ROBERT : C'est une sorte d'…(i)…….. Politique et… (ii)…… . On décide ensemble des prix des …… (iii)……..
industriels et agricoles et pour protéger les …. (iv)…..et les cultivateurs, Et les Européens n'ont même besoin d'un pays à l'autre. Il y a aussi un ……(v)…… européen qui se réunit à Strasbourg et qui à développé beaucoup de programmes. Par exemple, la CE aide avec la construction d'un tunnel sous….. (vi)…….

FREDERIC : La CE existe depuis long temps ?

ROBERT : On a commencéà en parler après la deuxième guerre ……(vii)……, on voulait éliminer la guerre
et…… (viii)…… la vie de tous les habitants d'Europe.

FREDERIC : Hmm ! c'est un projet ambitieux, ton cousin François, pense-t-il, que les Européens arriveront a ……(ix)…… ?

ROBERT : Je ne sais pas, l'avenir le……(x)……..

8. Mettez les verbes entre parenthèses à l'imparfait.

Il (être) une petite fille qui (s'appeler) Sarah. Elle (avoir) sept ans. Elle (vivre) avec ses parents et son frère. Sarah (posséder) un chat. Ce chat (être) petit et beau. Ses oreilles (être) pointures. Il (dormir) toujours dans Le petit lit de Sarah. Sarah (donner) a son chat du lait et des morceaux de viande. Le matin et le soir, elle (jouer) avec son chat. Et les deux amis (s'amuser) bien. Ils (être) toujours heureux.
