Candidate's Index Number .....

PRESIDENT'S OFFICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

IRINGA REGION - FORM FOUR MOCK EXAMINATIONS 2020

013 GEOGRAPHY

TIME: 3 HOURS MONDAY 24TH, AUGUST 2020 p.m

INSTRUCTIONS

1. This paper consists of section A, B, and C.
2. Answer all questions in section A, B and only two questions from section C.
3. Write your examination number on every page of your answer sheets.
4. Cellular phones and any unauthorized materials are **NOT** allowed in the examination room but non Programmable calculators are allowed.
5. Map extract of Kasamwa (sheet 32/4) is provided.
6. Programmable calculators are allowed.

SECTION A : (15 MARKS)

Answer all questions in this section

1. For each of the item (i – x), choose the correct answer from among the given alternatives and write its letter besides the item number in the answer booklets provided.

   i. After learning different types of soil texture, the students were asked to identify the best types of soil which can be mixed with cement for building a house. What type of soil will be picked by the students who understood the lesson?
   A. Loam B. Clay C. Sand D. Alkaline soil E. Silt

   ii. What is the social economic advantage of research forests to societies?
   A. Forestry B. Lumbering C. Agriculture D. Tourism E. mining

   iii. Halima was living in Dar es Salaam since 1970 and works as secretary in Prime Minister's Office. In January 2020 she was transferred to a new office in Dodoma region. Identify the type of Halima's movement;
   A. Emigrant B. Emigration C. Immigration D. Migrant E. Immigrant

   iv. When the moon's shadow is cast over the earth's surface the phenomenon is known as;
   A. Solar eclipse B. Equinoxes C. Winter solstice
   D. Lunar eclipse E. Summer solstice

   v. The local time at Washington D.C 96^0C is 05:00pm Friday. Find the time and day at Zanzibar 39^0C.
   A. 02: 00 pm Thursday B. 10:00 pm Saturday C. 10:00 am Thursday
   D. 04:00 pm Wednesday E. 02:00 am Saturday

   vi. When does the summer solstice in the southern hemisphere occurs;
   A. 21st June B. 22nd December C. 21st March
   D. 23rd September E. 21st October

   vii. A student of standard seven asked his brother of form two on what things led to four seasons of the year.
   A. Revolution of the earth B. Solar eclipse C. Evolution of the earth
   D. Lunar eclipse E. Rotational of the earth

   viii. Mdede used to see a group of herdsmen moving seasonally with their cattle between lowlands and highlands in search of water and pasture. What is the general term for such movement?
   A. Nomadic B. Semi–nomadic C. Trans–humance
   D. Zero grazing E. Pastoral movement

   ix. The Surface features in limestobne areas includes;
   A. Grikes, dry valleys, phreatic caves and gorges
   B. Gorges, poljes, stalagmites and stalactites
   C. Caves, Grikes, Stalactites and stalagmites
   D. Dolines, poljes, gorges and clints

Scanned with CamScanner

E. Dolines, Uvalas, clints and caves

x. If the temperature for Dar es Salaam at 100m above the sea level is 30^0C, what is the temperature for Moshi at 3200m above the sea level;

A. 18.6^0C B. 19^0C C. 30^0C D. 49^0C E. 11.4^0C

2. Match the features of coast region in column A with the corresponding descriptions in column B by writing the letter of the correct answer beside the item number in the answer booklet provided:

LIST A	LIST B
i) Shore	A. The strip of land where it meets the sea
ii) Fetch	B. The line where the shore and the water meet
iii) Beach	C. The distance of open water over which the wind blows
iv) Coast line	D. The horizontal distance between two successive crests
v) Shore line	E. Is a part of shore usually covered by pebbles, sand and shingles
	F. A strip of land that lies between high and low water level of the cost margin
	G. The edge of the land along the shore.
	H. The moving ridge of the water
	I. The rise and fall of the sea level

SECTION B: (55 MARKS)

Answer all questions in this section

3. Study the map extract of Kasamwa sheet (32/4) then answer the questions that follows:
   (a) Identify two ways that have been used to show relief features on the map.
   (b) Draw a relief section to connect Nyabubele hill at 383834 and Bungwe hill at 430825.
   (c) Identify the length of the all-weather road in km from grid reference 315844 to 443940.
   (d) Find the bearing of Chabulongo Hill at 367917 to a school at Nyamahuna 349818.

4. (a) The high temperature (in degree Celsius) each day over a three weeks period were as follows;

   17, 18, 20, 22, 21, 19, 16, 15, 18, 20, 21,
   21, 22, 21, 19, 20, 19, 17, 16, 16, 17.

   Compute the following:
   i. Mean
   ii. Median
   iii. Mode
   iv. Range

   (b) The table below shows vehicle moving along the Mafinga - Iringa road. Construct a percentage pie chart to present vehicle along the Mafinga – Iringa road.

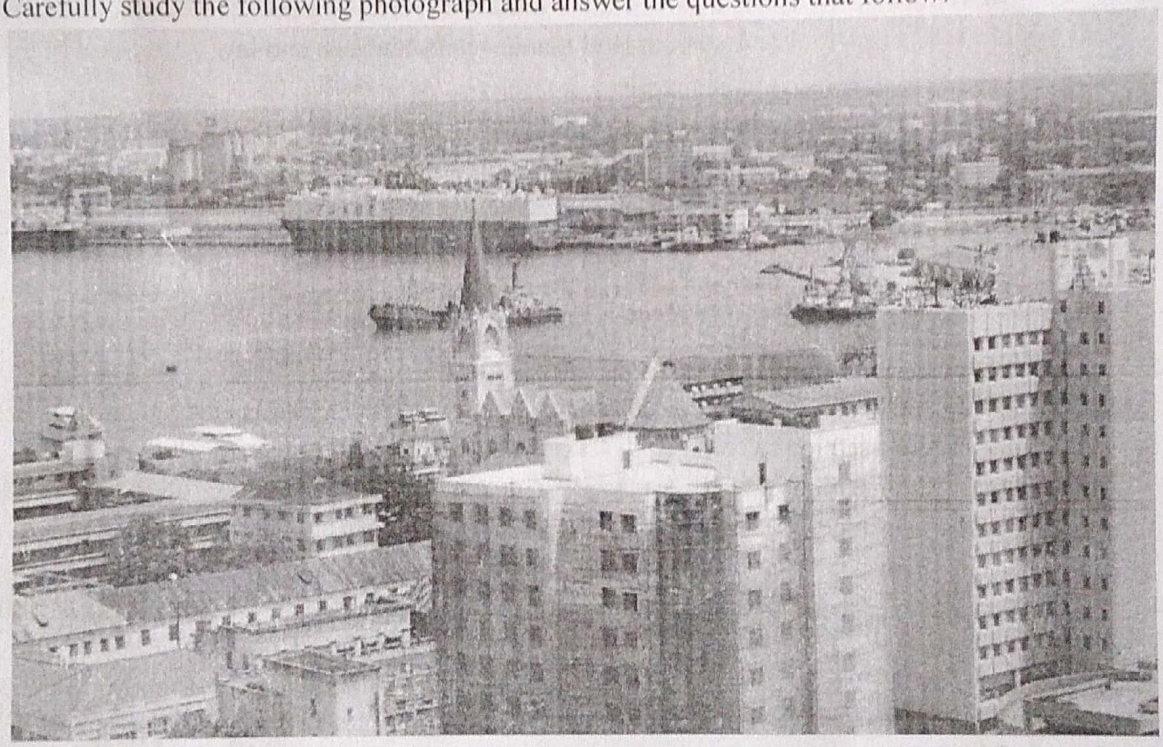

Period	Isuzu	Leyland	Toyota	Nissan	Other
8:30 – 10:30 a.m.	100	150	300	240	80
2:30 – 4:30 p.m.	40	60	70	20	50
6:30 – 8:30 p.m.	120	130	90	140	120
Total	260	340	460	400	250

Scanned with CamScanner

5. (a) Mary is a good cartographer; she intends to produce a contoured map of Lyasa. What type of survey method would you advise her to apply?
   (b) Apart from producing contour maps, what are the other three significant of the type of survey you have mentioned in (a) above.
   (c) Identify four usefulness of levelling.

6. (a) ''Any research is conducted to know the unknown facts about your area of interest'', due to high cost, limited time and size of the population it is not always possible for one to collect data with regard to all elements of population. Give three ways that can be used to select the representative elements of the study population.
   (b) The heads of school wanted to get information on 2019 form four performance on their examination. Identify any four methods used by heads of school to get that research information.
   (c) Give two basic sources of field work information.
   (d) List down any two merits of random sampling.

7. Carefully study the following photograph and answer the questions that follow:

   (a) Name the type of photograph shown above.
   (b) Describe any three characteristics of photograph shown above.
   (c) From the photograph above suggest any three economic activities carried out on that area.
   (d) Give any four values of photographs in geography and daily life.

SECTION C: (30 MARKS)
Answer two (2) questions from this section.

8. ''Despite of the fact that Hydro – Electric Power (H.E.P) is environmental friendly energy it still has damaging effects on the environment''. With six points justify this statement.
9. Analyse six potentials of Rufiji river basin.
10. Describe six contribution of cash crops production to the economy of Tanzania.

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

IRINGA REGION - FORM FOUR MOCK EXAMINATIONS 2020

032/1 **CHEMISTRY 1**

TIME: 3 HOURS **Thursday 27TH, August 2020 a.m**

INSTRUCTIONS

1. This paper consists of section **A**, **B**, and **C** with a total of fourteen (14) questions.
2. Answer all questions in section **A** and **B** and **only one** question from section **C**
3. Cellular phones and any unauthorized materials are **NOT** allowed in the examination room but non Programmable calculators are allowed.
4. Write your examination number on every page of your answer sheet provided.
5. Remove this front page and attach together with your answer sheets
6. The following constants may be used.
   - **Atomic masses:** H = 1, C = 12, O = 16, Na = 23, P = 31, S = 32, Cl = 35.5, K = 39, Ca = 40, Fe = 56, Cu = 64.
   - Avogadro's number = 6.02×10^{23}
   - GMV at STP = $22.4\ dm^3$
   - 1Faraday = 96,500 coulombs
   - 1 litre = $1dm^3$ = $1000\ cm^3$

SECTION A (10 Marks)

(Answer all questions from this section)

1. For each items (i)-(x), choose the most correct answer among the given alternatives and write its letter beside the item number in the answer sheet provided.

(i) What is the proper set of apparati would you use to grind granules of solid substances into fine powder in the laboratory….

(A) Pestle and filter funnel
(B) Mortar and pestle
(C) Pestle and filter paper
(D) Separating funnel and mortar
(E) Thistle funnel and mortar

(ii) An example of homologous series is….

(A) Butane, propane and methane
(B) Methane, Ethane and Propane
(C) Methane, Ethene and butane
(D) Methane, Ethene, and Propyne(E) Ethane, Ethene and ethyne

(iii) Which carbonate is not decomposed by heat?

(A) Sodium carbonate (B) Calcium carbonate (C) Lead carbonate (D) Copper carbonate (E) Zinc carbonate

(iv) They are considered as macronutrients in plants nutrition……

(A) Zinc, Calcium and Phosphorous
(B) Lead, Tin and Potassium
(C) Nitrogen, Phosphorous and Potassium
(D) Cobalt, Nitrate and Zinc
(E) Potassium, Calcium and Cobalt

(v) 1.4g of KOH was dissolved in water to form 250ml of solution. What is the molarity of this solution?

(A) 0.01M (B) 1.4M (C) 5.6M (D) 0.1M (E) 6.0M

(vi) Solvent can be obtained from solution by….

(A) Evaporation followed by decantation
(B) Filtration and condensation
(C) Evaporation and filtration
(D) Evaporation followed by condensation
(E) Crystallization followed by sublimation

(vii) Ionic bond is formed between…

(A) Metal atom and metal ion
(B) Metal atom and metal atom
(C) Metal and non-metal atom
(D) Oxygen and hydrogen
(E) Molecule and ion

(viii) What real takes place during sacrificial protection of iron from rusting?

(A) The reactive metal remains uncorroded
(B) The reactive metal is corroded
(C) The reactive metal and iron are corroded
(D) Iron is corroded
(E) Iron and reactive metal are not corroded.

Scanned with CamScanner

(ix) Which of the following action would result into an increase in the temperature of the world?
(A) Increase in carbon dioxide content in the atmosphere
(B) Removal of noble gases from atmosphere
(C) Increase in cloud cover
(D) Increase in distance from the sun
(E) Removal of water from the atmosphere

(x) .....Is a general term used to explain a mixture of different metals?
(A) Amphoteric (B) Allotrope (C) Isotope
(D) Alloy (E) Amphoteric

2. Match the items in **List A** with the response in **List B** by writing the letter of the correct answer response beside the item number in the answer booklet provided. **(05 Marks)**

LIST A	LIST B
(i) Its hydride is only alkaline gas.	A. Hydrogen chloride gas
(ii) Burns with lilac flame.	B. Silver
(iii) Produce a white precipitate of silver chloride in a drop of solution of silver nitrate.	C. Sulphur
	D. Platinum
(iv) An element which is extracted by Frasch process.	E. Sodium
(v) The hardest allotrope of carbon.	F. Oxygen
(vi) A least reactive metal in the reactivity series.	G. Fluorine
(vii) Its extraction is done using Hall-Heroult method.	H. Nitrogen
(viii) Its extraction is done in Down's cell.	I. Carbon
(ix) The most electronegative element.	J. Graphite
(x) Forms an oxide which is yellow when hot and white when cold.	K. Potassium
	L. Diamond
	M. Zinc
	N. Hydrogen gas
	O. Aluminium
	P. Copper
	Q. Mercury
	R. Iron

SECTION B (70 Marks)

(Answer all questions from this section)

3. (a) An element X has number of neutron 16 and mass number of 31, element Y has a total number of 19 electrons in its shells.
(i) Write a nuclide notation of element X
(ii) How many neutrons are there in element Y?
(iii) Write the electronic configuration and draw its electronic structure of element X
(iv) Using the actual symbol of element, write the chemical formula formed when element X and Y reacts, and state the type of bond formed.

Scanned with CamScanner

(v) Using the letter given above, write a balanced equation formed when element Y react with oxygen.

4. (a) Briefly give one reason to each of the following observations.
   (i) Sugar turns to brown and finally black colour when concentrated sulphuric acid is added on it.
   (ii) Iron turns brown when exposed outside for more than two days.
   (iii) Industrial concentrated sulphuric acid is neutral to litmus paper.
   (iv) Water is a universal solvent
   (b) State the best method that can be used to separate the following mixtures
   (i) Ethanol from water
   (ii) Sand and iron fillings
   (iii) Kerosene and water

5. (a) 0.5 Faradays were used during the electrolysis of Copper (II) Sulphate solution using Copper electrode. Calculate the mass of copper liberated at cathode.
   (b) Briefly explain three application of electrolysis in daily life.

6. (a) With the aid of example give the meaning of the followings
   (i) Precipitation reaction
   (ii) Decomposition reaction
   (b) Write a net balanced ionic equation for the following reactions.
   (i) Reaction between Zinc granules and dilute hydrochloric acid
   (ii) The displacement of copper from copper (II) Sulphate solution by zinc metals
   (c) Three gas jars A, B and C was found to have three gases. The gas present in each gas jar was tested and the following results were obtained. Gas jar A gave a pop sound with a glowing wooden splint, gas jar B turned lime water milky and gas jar C re-lighted the wooden glowing splint. Determine the gas present in each gas jar A, B and C.

7. (a) With the aid of examples explain the following terms;
   (i) Homologous series
   (ii) Saturated hydrocarbons
   (iii) Isomers
   (b) Write the structural formula of the following IUPAC names of organic compounds
   (i) Prop-1-ene
   (ii) 2-methylbutan-1-ol
   (iii) 1-chloro-3,3-dimethylbutane

8. (a) With the aid of chemical equation, explain four stages involved in the manufacture of sulphuric acid by contact process.
   (b) Explain why in contact process sulphur trioxide (SO_3) is not direct dissolved in water to form sulphuric acid.

9. (a) With the aid of example explain what meant by the following terms;
   (i) Fertilizer
   (ii) Macronutrients
   (iii) Liming
   (b) Briefly explain four methods of fertilizer application

10. (a) Define the following terms;

Scanned with CamScanner

(i) Molar solution
(ii) Dilution

(b) When 2.5g of solid sample Z was strongly heated, $560cm^3$ of a certain gas Y measured at S.T.P was evolved and the remaining solid X weighed 1.4g.
(i) Calculate the molar mass of the gas evolved from solid sample Z.
(ii) Name the gas evolved
(iii) State two commercial uses of the gas evolved.

11. (a) What would be the molarity of the solution if 4g of Sodium hydroxide (NaOH) were dissolved in $2000cm^3$ solution?
(b) 8.5g of a sample of impure iron required just $75cm^3$ of 3.00M HCl to dissolve it and give a neutral solution. Calculate the percentage purity of sample of iron.
(c) Mention three application of volumetric analysis in daily life.

12. (a) A piece of marble (Calcium carbonate) was placed in a beaker containing excess dilute hydrochloric acid, standing on a direct reading balance. The mass of beaker and its content was recorded after every two minutes as shown in the table below when the reaction was proceeding.

Time (sec)	0	120	240	360	480	600
Mass	126.44	126.31	126.19	126.09	126.00	126.00

(i) Why there was a loss of mass as time goes?
(ii) Write a balanced chemical equation for the reaction which took place between the pieces of marble and dilute hydrochloric acid.
(iii) Why did the mass remain constant after 480th seconds?

(b) Clearly describe three factors affecting the position of chemical equilibrium.

SECTION C: (15Marks)

Answer **only one** question from this section

13. (a) Briefly describe how sodium metal is extracted in Down's cell. Write all necessary equations.
(b) Briefly explain why calcium chloride is added in the Down's cell?
(c) Why sodium is stored under organic solvent?

14. Environment supports the life of all organisms. Its pollution has led to some major catastrophic effects. Clearly describe three causes, two effects and measures respectively to be taken to fight against this problem.

041 **BASIC MATHEMATICS**

TIME: 3 HOURS **Tuesday 25TH, August 2020 a.m**

INSTRUCTIONS

1. *This paper consists of sections A and B with a total of fourteen (14) questions.*
2. *Answer all questions from section A and B. each question in section A carries six (6) marks while each question in section B carries ten (10) marks.*
3. *All necessary working and answers for each question done must be shown clearly.*
4. *Mathematical tables may be used unless otherwise stated.*
5. *Cellular phones, calculators and any other unauthorized materials are not allowed in the examination room.*
6. *You are advised to spend at most 100 minutes (1hour and 40 minutes) on section A and the remaining (that is at most 80 minutes/1 hour and 20 minutes) on section B.*
7. *Write your Examination Number on every page of your answer booklet(s)/sheet(s)*
8. *Remove this front page and attach together with your answer sheets*
9. *The following constants may be used.*
   (a) The radius of the Earth R = 6400km
   (b) $\pi = {}^{22}/_{7}$

SECTION A (60 MARKS)

Answer all questions this section

1. (a) Express the number 0.002615

   i. Correct to three (3) decimal places

   ii. Correct to three (3) significant figures

   iii. In standard form

   (c) Using mathematical tables, evaluate the expression $\frac{(28.32)^2 \times 0.3574}{\sqrt{8.732}}$. Give the answer to two decimal places.

2. (a) Find the value of the following expressions:

   i. $2\log 40 + log\sqrt{81} - 2\log 12$

   ii. $\sqrt{50} - 2\sqrt{18} + \sqrt{8} + \sqrt{2}$

   iii. Find the value of m in $\left(\frac{3}{4}\right)^{m+1} = \left(\frac{9}{16}\right)^{2m-1}$

   (b) If $a\sqrt{\left(\frac{x^2-n}{m}\right)} = \frac{a^2}{b}$ write x as a subject of the formula

3. (a) Given the figure below

   Find (i) $M' \cap N$

   (ii) $n\,(M' \cup N')$

   (b) Find the probability that a number selected at random from the numbers $-3, -2, -0, 3, 4$ *and* 6 will be a solution set of the equation $x^2 - x - 6 = 0$

   (c) Solve for x if $\sqrt[3]{(x-1)} + 3 = 0$

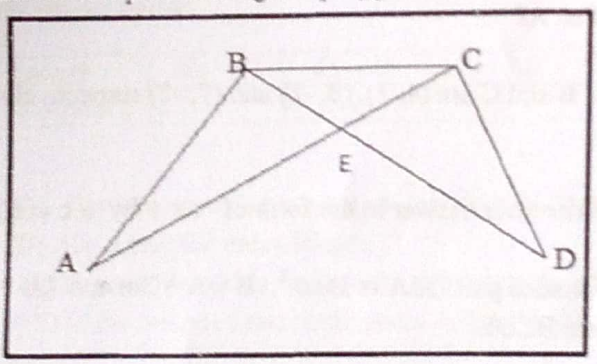

Scanned with CamScanner

(a) Find the area and the perimeter of the parallelogram ABCD given in the figure below if $B\hat{A}D = 45^0$

(b) If $\bar{A}$ and $\bar{B}$ are two vectors such that $\bar{A} = 2\underline{i} + 5\underline{j}$ and $\bar{B} = -4\underline{i} + \underline{j}$, find the position vector $\overline{OM}$ where M is the midpoint of $\overline{AB}$.

5. (a) ABCD is a part of a regular polygon. Show that the triangles ABC and BCD are congruent

(b) The middle angle of a triangle exceeds the smallest angle by 20^0 and the largest angle is twice the middle angle. Find the size of the largest angle.

6. (a) Juma bought motor vehicle spare parts from Japan worth 5,900,000 Japanese yen. When he arrived in Tanzania he was charged custom duty of 25% on the spares parts. If the exchanges rate were as follows;
1US dollar = 118 Japanese yen
1US dollar = 76 Tanzania shillings. Calculate the duty he paid in Tanzania shillings.

(b) The distance of horizon d km varies as the square root of the height h metres of the observer above sea level. An observer at a height of 100m above sea level. Sees the horizon at a distance of 35.7 km.

Scanned with CamScanner

Find; (i) The distance of the horizon from an observer 70m above sea level.

(ii) An equation connecting d and h

7. (a) A certain worker used his salary as follows 20% on house rent, 45% on food, 10% on refreshment and 15% on school fees. If he/ she was left with Tsh. 22,000 determine

(i) The salary of this worker

(ii) The amount of money which he/ she spent on food.

(b) From 1st January to 29th January 2006 Mr. Paul decided to keep record of his business as follows:

Jan	1	Mr. Paul started a business with capital cash	500,000.00
	5	Purchased goods	254,000.00
	6	Sold goods	290,000.00
	9	Purchased goods	204,000.00
	10	Expenses	24,000.00
	29	Sold goods	320,000.00

You are required to:

a) Prepare the trial balance

b) Open capital and cash account

NB: All payment and receipt were made in cash.

8. (a) The first, third and eighth terms of an arithmetic progression are the first three terms of a geometric progression. The first term is 2. Find:-

(i) The common difference of an AP

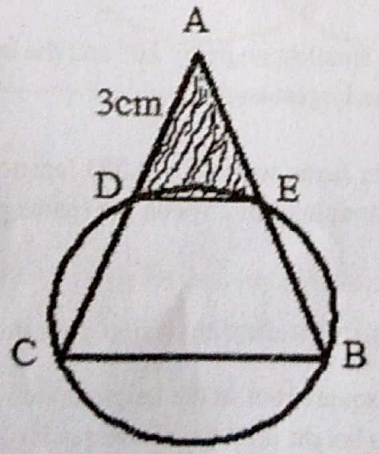

(ii) The common ratio of a GP.

(b) The coordinates of the points A, B and C are (4, 3), (3, -2) and (7, -1) respectively. From this information find the:

(i) Length of AB

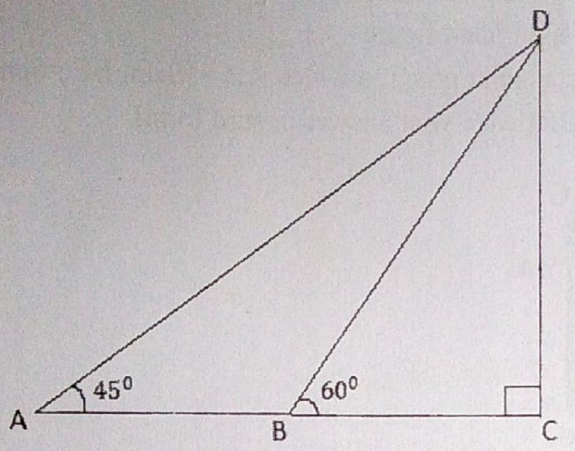

(ii) Equation of the line BC. (Write your answer in the form of $ax + by + c = 0$).

9. (a) In figure below the area of the shaded part DEA is $15cm^2$. If DA = 3m and AB = 6m. Find the area of the quadrilateral BCDE.

Scanned with CamScanner

(b) In the figure below, find $\overline{AB}$, if $\overline{AC} = 24cm$

10. (a) Solve the following inequality and show its solution the number line $4 - x < x + 8 < 5 - 2x$

(b) Find the values of 'r' and 's' in the following system of equations; $\begin{matrix} 3r + s = 17 \\ 27 - 3r - 6s = 0 \end{matrix}$

SECTION B (40 MARKS)

Answer all questions

11. (a) The frequency distribution of the length of a sample of 100 nails, measured to the nearest mm is shown below

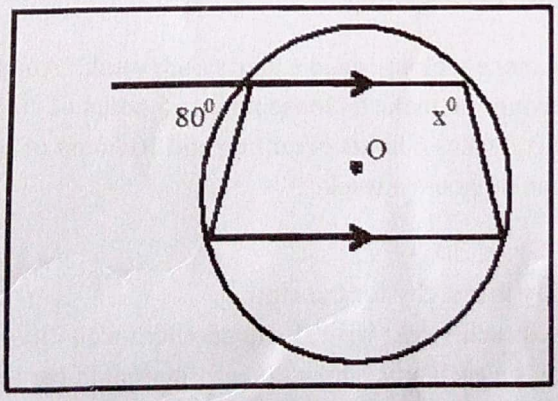

Length	40 – 42	43 – 45	46 – 48	49 – 51	52 – 54	55 – 57	58 – 60
Frequency	4	9	13	20	34	18	2

(i) How many nails have length less than 51.5mm?

(ii) Calculate the mean length.

(iii) Draw a histogram and use it to estimate the modal length.

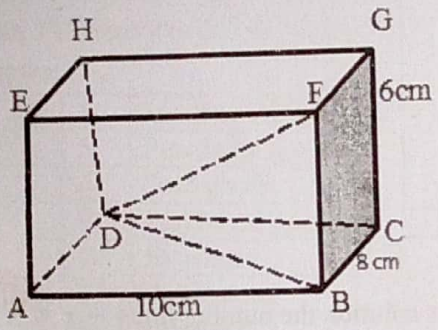

(b) If O is the centre of the circle given below, find the value of x

Scanned with CamScanner

12. (a) IFUNDA and MGAMA are two villages on latitude 60^0s. The distance between IFUNDA and MGAMA measured along the parallel of latitude is 1111km. Find the difference between their longitudes in two significant figures.

(d) The figure below shows a rectangular prism in which AB =10cm. BC =8cm and CG = 6cm. Calculate the length of DF [leave your answer in surd form]

13. (a) Given matrices A = $\begin{pmatrix} 3 & 5 \\ 4 & -2 \end{pmatrix}, B = \begin{pmatrix} 3 & -1 \\ -3 & 2 \end{pmatrix}$ and $C = \begin{pmatrix} K & -4 \\ 3 & -2 \end{pmatrix}$

Find (i) $A^2 + 2A$

(ii) t and y such that $B^2 = tB + yI$ when I is an identity matrix.

(iii) The value of k if the determinant of C is 5.

(b) A linear translation Q carried point $(y,\ x)$into(x', y') such that $x' = 5x - 3y$ and $y' = 2x + 4y$

i. Determine the transformation matrix Q

ii. Find Q (3,3)

iii. Find the image of the point obtained in part (b) (ii) under Q.

14. (a) Given f(x) = $\begin{cases} -4\ when\ x < -1 \\ x^2\ when\ -1 \leq x < 2 \\ 5\ when\ x \geq 2 \end{cases}$

(i) Sketch the graph of f(x)

(ii) State the domain and range of f(x)

(iii) Is f(x) a one to one function? Give reason(s)

(b) Anna and Mary are tailors. They make x blouses and y skirts each week. Anna does all cutting and Mary does all the sewing. To make a blouse it takes 5 hours of cutting and 4hours of sewing. To make a skirt it takes 6 hours of cutting and 10 hours of sewing. Neither tailor works for more than 60 hours a week.

i. For sewing, show that $2x + 5y \leq 30$

ii. Write down another inequality in x and y for the cutting.

iii. If they make at least 8 blouses each week, write down another inequality

iv. Using 1cm to represent 1 unit on each axis, show the information in parts (i), (ii) and (iii) graphically, shade only the required region.

v. If the profit on a blouse is Tshs. 3,000 and on a skirts is Tshs. 10,000. Calculate the maximum profit that Anna and Mary can make in a week.

7. Study Asha's timetable that is given and then compose four grammatically correct sentences

Activities	Time
Wake up	5:00 a.m
Take a bath	12: a.m
Go to school	7:00 a.m
Do school activities	8:am- 12:00 noon
Return back	1: 30 p.m

   For example: Asha wakes up at 5:00 a.m
   a) .....
   b) .....
   c) .....
   d) .....
8. Read the passage below carefully and then answer the questions that follow.

   There are approximately 100 million children throughout the world who should be in school but are not. Girls make up 55% of this unfortunate group. Although this sad state of affairs is to be found in many parts of the world, it is most prevalent in Africa.

   There are many reasons why a larger number of girls are not in school or not doing well enough in school. One of the reasons is prejudice against girls, mainly as a result of negative customs and beliefs. This is what makes some parents favour male children at the expenses of female

Scanned with CamScanner

children. This favouritism is complicated by poverty when money is not enough. Some parents choose to educate boys instead of girls while holding the belief that girls can do with just a little or no education.

According to such parents, a girl only needs sufficient education to enable her to be a good housewife.

This might explain why some parents marry off their daughters when they are very young. This has forced some daughters to run away from their homes. For example, the pastoral woman council estimates that about 3 Maasai girls run away from their homes everyday to escape early marriage.

QUESTIONS.

a. Suggest the suitable title for the passage.
b. Write down one example of sexual prejudice against girls.
c. According to the passage what makes many Maasai girls run away from their homes?
d. In your own opinion, what do you think should be done to promote education for girls? (Give one point)

SECTION C (MARKS 45).

Answer three (3) questions from this section.

9. Argue for the statement "**Mobile phone technology is more helpful to students than harm.**'' Use six points in not more than 250 words.

LIST OF READINGS FOR QUESTIONS 9-12

NOVELS AND SHORT STORIES.

A Wreath for Fr. Mayer –	**S.N Ndunguru(1977), Mkuki na Nyota**
Unanswered cries –	**Osman Conteh, Macmillan.**
Passed Like a Shadow –	**B.M Mapalala(2006), DUP.**
Spared -	**S.N Ndungunu (2004) , Mkuki na Nyota.**
Weep not Child –	**Ngugi wa Thiong'o (1987).**
The Interview –	**P.Ngugi (2002), Macmillan.**

PLAYS

Three Suitors One Husband -	**O.Mbia (1994), Eyre Methun.**
The Lion and the Jewel –	**W. Soyinka (1963), DUP**
This Time Tomorrow -	**Ngugi wa Thiong'o (1972),Heinemman**

SEHEMU A: (Alama 15)

Jibu maswali yote katika sehemu hii

1. Chagua herufi ya jibu sahihi katika vipengele (i) hadi (x), kasha andika herufi ya jibu hilo katika kijitabu chako cha majibu.

i) Ni maneno yaliyoorodheshwa katika kamusi na kuandikwa kwa chapa iliyokoza
A. Kiswahili B. Kamusi C. Kitomeo
D. Vidahizo E. Msamiati

ii) "Serikali imeweka mikakati ili kupunguza umaskini". Neno "ili" katika sentensi hii ni aina gani ya neno?
A. Kielezi B. Kiunganishi C. Kiwakilishi
D. Kihisishi E. Kivumishi

iii) Jozi ipi ina vipengele sahihi vinavyounda umbo la nje la kazi ya fasihi simulizi?
A. Mtindo, muundo, wahusika, madhari
B. Madhari, msimamo, ujumbe, mazingira
C. Ujumbe, msimamo, dhamira, wahusika
D. Lugha, mgogoro, falsafa, mtindo
E. Ujumbe, mtazamo, migogoro, dhamira

iv) Neno "**kupasi**" limeundwa kwa kutumia njia ipi ya uundaji wa maneno?
A. Kutohoa maneno kutoka lugha nyingine B. Kuangalia hali ya kitu
C. Kuambatanisha maneno D. Kufananisha sauti, sura au tabia
E. Kudondosha baadhi ya herufi za maneno

v) Sentensi ipi ni sahihi katika ngeli ya U – I?
A. Wembe umekatika B. Mpapapi umekatwa C. Uuaji unapigwa vita
D. Wimbo umeimbwa E. Ungo umetoboka

vi) Ni tungo inayotoa taarifa kamili ambayo imeundwa kwa kiima na kiarifa
A. Chagizo B. Sentensi shurutia C. Sentensi
D Kirai E. Kishazi

vii) Hushughulikia mpangilio wa maneno katika tungo ili yalete maana iliyokusudiwa.
A. Sarfi Maumbo B. Sarufi miundo C. Sarufi maana
D. Sarufi matamshi E Sarufi

viii) Ni jambo gani linalodhihirisha upekee wa kazi ya kifasihi?
A. Muundo wa kazi husika B. Wahusika wa kazi husika
C. Jina la kazi husika D. Jina la mtunzi wa kazi husika
E. Mtindo wa kazi husika

ix) "Kitanda cha kwanza kushoto ndicho amelalia" Neno "cha kwanza kushoto" katika sentensi hii ni aina gani ya neno?
A. Kiwakilishi B. Kivumishi C. Kielezi
D. Kiunganishi E. Kitenzi

x) Ni masimulizi yenye kueleza visa vya kweli au vya kubuni vyenye kutumia wahusika.
A. Soga B. Tarihi C. Visasili
D. Hadithi E. Ngonjera

Scanned with CamScanner

Oanisha maana za dhana za uandishi zilizo katika orodha A kwa kuchagua herufi ya dhana husika katika orodha B, kasha andika herufi husika katika kijitabu chako cha kujibia.

ORODHA A	ORODHA B
i) Falsafa ii) Alikula akalala iii) Predicketa iv) Simo v) Mtoto mkorofi mwenye vurugu nyingi	A. Kishazi tegemezi B. Mfano wa kirai nomino C. Huzuka na kutoweka D. Sentensi changamano E. Kitenzi kikuu F. Sentensi ambatano G. Mwelekeo wa imani H. Aina ya maneno

SEHEMU B: (Alama 40)

Jibu maswali yote katika sehemu hii

3. Kwa kutumia mifano dhahiri eleza kwa kifupi maana ya istilahi zifuatazo kama zinazotumika katika somo la Kiswahili.
   i) Urudu kamili
   ii) Upatanisho wa kisarufi
   iii) Kiarifu
   iv) Sentensi shurutia
   v) Neno

4. Kila lugha huunda maneno mapya ili kukidhi haja ya mawasiliano. Kwa kutumia mifano ya maneno ya Kiswahili jadili tofauti iliyopo kati ya kuunda mameno kwa njia ya kuambatisha maneno na kutohoa maneno. Dhihirisha jibu lako kwa mifano miwili kwa kila njia.

5. Mojawapo ya kazi ya kamusi ni kutoa maana ya vidahizo. Taja maana tano za kidahizo <u>Babu</u> kama zinavyotumika katika Kiswahili sanifu.

6. Waingereza waliiandaa Tanzania kujitawala kisiasa, kiutamaduni, kiuchumi na kijamii. Kwa kutumia hoja tano fafanua jinsi shughuli mbalimbali katika utawala wa waingereza zilivyoimarisha Kiswahili hapa nchini Tanzania ili kitumike katika Nyanja mbalimbali katika jamii.

7. Kwa kutumia tamthilia ya kilio chetu na Orodha, eleza kwa kifupi mambo manne ya kufafanana kwa tamthilia hizo.

8. Soma kifungu cha habari kifuatacho kisha jibu maswali yanayofuata.

   Kati ya lugha rasmi za jamii Fulani moja inaweza kutuliwa kuwa ni ya taifa kwa desturi, mbali na kutambuliwa kwa kwa matumizi ya aina mbalimbali lugha ya taifa huwa ni kitambulisho cha taifa. Mathalani kitu cha kwanza kinachomtambulisha mngoni ni kingoni chake. Hivyo basi kitambulisho cha mtu wa taifa Fulani ni lugha ya taifa hilo. Kwa jinsi hii, lugha ya taifa huakisi na kuchukua utamaduni wa taifa. Hivi ni kusema kwamba lugha ya taifa, hueleza ufasili wa taifa, kujenga umoja pamoja na kuwafanya watu wa taifa hilo wajihisi kuwa wamoja.

   Ingawa lugha rasmi inaweza kuwa ya kigeni, haitokani na kundi lolote kati ya makundi yanayoikamilisha. Lakini lugha ya taifa mara nyingi huwa na mzizi ndani ya taifa lenyewe au huwa ni lugha inayozungumzwa na watu ndani ya nchi hiyo.

Scanned with CamScanner

Kwa mfano ni muhali kusikia nchi moja ya kiafrica kutangaza kireno au kiingereza kuwa lugha ya taifa. Linaloyamkinika hapa ni kuwa mataifa yaliyotawaliwa na Wareno yatalazimika walau kwa miaka ya mwanzo kukitambua kireno kuwa miongoni mwa lugha rasmi za taifa jipya.

Miongoni mwa sababu zinazofanya mataifa kuteua lugha asilia kuwa lugha ya taifa lenyewe ni kwamba lugha hiyo haina budi kuwa inatumiwa na watu wengi au inaweza kufundishika kwa urahisi.

MASWALI

i) Pendekeza kichwa cha habari hii kisichozidi maneno matatu.
ii) Kwa mujibu wa habari hii lugha ya taifa inapatikanaje?
iii) Baini sifa mbili (2) za lugha ya taifa.
iv) Taja dhima mbili (2) za lugha

SEHEMU C: (Alama 45)

Jibu maswali matatu (3) katika sehemu hii.

9. Wewe ni mwanafunzi wa shule ya sekondari Changarawe, S.L.P 70, Mafinga Andika barua kwa mhariri wa gazeti la nipashe ili kuishukuru serikali ya awamu ya tano inayoongozwa na Mh. Rais Dr John Pombe Joseph Magufuli, juu ya mambo matano tu, aliyowatendea watu wake wa Tanzania tangu aingie madarakani 2015. Jina lako liwe Agness Msafiri Mtandi.

10. Wanaume wengi katika jamii wamekuwa na mchango hasi na chanya katika maendeleo ya jamii kutokana na matendo yao. Kwa kutumia hoja tatu kutoka kila riwaya, jadili nafasi ya mwanaume katika jamii.

11. Msanii bora huteua wahusika wanaofikisha ujumbe kwa jamii. Thibitisha ukweli wa kauli hii kwa kutumia wahusika watatu katika kila tamthiliya mbili ulizosoma.

12. Waandishi wa diwani wamekuwa ni walimu wema katika jamii yetu. Kwa kutumia hoja tatu kwa kila diwani jadili mambo mbalimbali wanayoifundisha jamii yetu ya sasa.

SECTION A: (15 marks)

(Answer all questions from this section)

1. For each items (i)-(x), choose the most correct answer from among the given alternatives and write its letter beside the item number in the answer sheet provided.

(i) Which of the following is not suitable parameter to use to estimate growth in plant?
(A) Shape (B) Length (C) Mass
(D) Height (E) Water

(ii) Which of the following process is involved in regulation of the body temperature in human being:-.
(B) (A) Urination (B) Painting (C) Deamination
(D) Sweating (E) Aestiration

(iii) The following are the reasons why waste disposal is a problem except:-.
(A) Inadequate waste bins
(B) Excessive packaging of items
(C) Excessive punishment to discourage littering
(D) Failure of the cleaners to collect waste from the public places
(E) Failure of local authorities to enforce effective punishment on those who litter public places

(iv) The loss of water by evaporation from the plant is called
(A) Plasmolysis (B) Evaporation (C) Transpirational pull
(D) Transpiration (E) Osmosis

(v) Herbivores (plant eaters) are primarily consumers which form
(A) The 1st trophic level (B) The 2nd trophic level (C) The 3rd trophic level
(D) The 4th trophic level (E) The 5th trophic level

(vi) The central nervous system mainly composed with two (2) parts which are
(A) Sympathetic and parasynpathetic (B) Cranial and autonomic
(C) Brain and Spinal cord (D Peripheral and sensory neurones
(E) Brain and sympathetic

(vii) Which part of the flower does the pollen grains lands during pollination?
(A) Petal (B) Anther (C) Ovary (D) Stigma (E) Stamen

(viii) One among the following organisms is a vector of blood flukes pathogens causing bilhazia
(A) Water snail (B) Housefly (C) Tsetse fly
(D) Ticks (E) female anopheles mosquito.

(ix) Deformalaties of bones in children is due to deficiency of which minerals in the diet?
(A) Sodium and calcium (B) Phosphet and Calcium (C) Sodium and Sulphur
(D) Copper and zinc (E) Nitrogen and my salt

(x) Epihytes are organisisms that grown on tree branches and normally do not harm the tree. Therefore these organisms undergone which mode of feeding?
(A) Holozoic (B) Parasitism (C) Sapro phytism
(D) Mutualism (E) Commensalism
