	K. Executive
	L. Theft
	M.1960
	N. Culture
	O. High mortality rate

Scanned by CamScanner

SECTION B (20 Marks)

Answer ALL questions in this section

3. Read the following passage carefully and answer the questions that follow:

The process and situation of taking in something or providing to others by using public facility for private gain illegally against the state is an **ignominy**. This tendency is very common in everyday life to our societies; it grew rapidly like mushroom in equatorial region during rainy season.

Corruption in Africa is like a new civilization where by all most every society is connected on it; I ask question myself I don't get an answer, why people should suffer from this disease which is man made? Nigeria, Kenya and Burundi are the leading corrupt states in the continent. Tanzania is not far from this game due to its systematic involvement with highly qualified corrupt people ever seen.

According to the meticulous done by some social scientist they realized that, this element is very common to both government and non government organization like the Judicial system, police forces, during general elections, serious public business contract and when other social services are being provided .

The government and other pressure groups started to find out the root causes of the situation among this are; low wages, poor social services, poverty, nepotism, selfishness and systematic weak institutions. Unable person flow thinking capacity who are given titles of high quality to hold an office without necessary qualifications plus lack of transparency and poor accountability is another loophole. Therefore, serious measures against all proved corrupt people should be taken immediately and social services as well as welfare of the people should be improved.

QUESTIONS

(i)Suggest a suitable title for the passage

(ii)According to the passage what does the word **meticulous** mean?

(iii)According to the author, what are the sources of the problems in the community?

(iv)Mention two most corrupt states in Africa.

(v)For your own view, suggest the best solution of the problem.

4. (a) Briefly outline five (5) significance of foreign investment to Tanzania

(b)State five (5) functions of the president of the united republic of Tanzania

Scanned by CamScanner

SECTION C (60 Marks)

Answer three (3) questions from this section and each question carries 20 marks

5. Examine six basic principles of the democratic state.
6. Briefly explain how culture is a totality of people's ways of life.
7. Discuss six salient features of globalization.
8. Explain six importance of the central government in Tanzania.
9. Identify any six solutions that can be used to solve current problems that hinder development in African states especially Tanzania.
10. Discuss the importance of using life skills in everyday life, six points.

MAELEKEZO

1. Karatasi hii ina sehemu A, B, C, D na E
2. Jibu maswali yote katika sehemu A, B na D swali moja (1) kutoka sehemu C na maswali matatu (3) kutoka sehemu E swali la 15 ni la lazima.
3. Zingatia maelekezo ya kila sehemu na kila swali
4. Simu za Mkononi haziruhusiwi kabisa katika chumba cha mtihani
5. Andika namba yako ya mtihani katika kila ukurasa wa karatasi zako za kujibia

Scanned by CamScanner

SEHEMU A: ALAMA 10

UFAHAMU

Jibu maswali yote katika sehemu hii

1. Soma kifungu cha habari kisha jibu maswali yafuatayo

Kwa muda wa miaka kadhaa iliyopita kumeingiwa na Wimbi kubwa la simu za mikononi. Na Makampuni mbalimbali yamekuwa yakiendesha mitandao ya simu hizo. Simu hizi zimekuwa na faida nyingi, nyingi, nyingi sana. Kwanza ni nzuri kwani zinavutia kwa rangi, maumbo yake ni Murua. Zipo zenye umbo la sabuni sambusa na hata za duara zikiwa katika rangi tofauti tofauti kama vile nyeusi, nyekundu, nyeupe n.k

Jambo kubwa linalowavutia watu wengi katika matumizi ya simu ni kule kutembea nazo, mahali popote mtu kuweza kupiga simu au kupokea tena kwa madaha huku na huko. Jambo lingine linalovutia zaidi ni kule kuhifadhi au kutunza namba na jina la Mtu, na kutuma ujumbe wa maandishi. Kwa mtu aliyembali nae. Kama namba na jina mtu vilihifadhiwa katika simu, anapopiga hujitokeza unapoongea nae ukijua kuwa unaongea na nani. Siku hizi simu zinazopiga na kuhifadhi hata picha za mtu unayeongea nae.

Hakika Wahenga hawakukosea kabisa waliposema, hakuna masika yasiyo na Mbu. Pamoja na Faida hizo zote za simu za Mkononi, kuna hasara pia. Moja ya hasara ni gharama. Mbali na kuuzwa kwa bei ghali, muda wa maongezi hugharimu pesa. Na hivi sasa simu zimebatizwa jina la Mke wa pili kutokana na kuongezeka kwa bajeti. Na wengine hushindwa hata kununua muda wa maongezi wakaishia tu kubipu au kutuma ujumbe wa bure wa tafadhali nipigie.

Mbali na gharama zote hizo watumiaji wa simu wapo katika hatari ya kujeruhiwa, kuporwa na hata kufa. Vibaka huwawindawatu wanapopinga au kupokea simu na kuwapora. Kisha kwenda kuziuza kwa watu wengine. Ni hatari kutembea na simu usiku au vichochoroni, labda izimwe au ifichwe ili isilie na vibaka wasiione.

Tatizo lingine la simu za mkononi ni kuwa wale wanaotumia simu huzungumza uwongo. Kwa kuwa anayepigiwa huulizwa yuko wapi, yeye hutoa jibu lisilo la kweli.Mfano hivi juzi nimeshuhudia ndoa ikivunjika baada ya Mke kumdanganya Mumewe kuwa yupo nyumbani kumbe sivyo. Mke hakujua kuwa Mume alirudi nyumbani kwa dharura na wakati anapiga ile simu alikuwa ndani.

Kwa hiyo tunaona kuwa simu za mkononi ni nzuri lakini sisi watumiaji tunazifanya kuwa mbaya. Kama sote tukajirekebisha na kuwa na tabia nzuri, simu hazitageuka kuwa sumu kwetu leo.

1.This paper consists of sections A,B,C and D

2. Answer all questions in sections A,B, and in section C and D as instructed under each section.

3. Cellular phones and calculators are not allowed in the examination room

4. Write your examination number on every page of your answer sheet

Scanned by CamScanner

SECTION A (10 MARKS)
COMPREHENSION AND SUMMARY

1. Read the passage below carefully then answer the questions that follow:-

One day, a young student caught a bus from the centre of Songea Municipal to Namtumbo. It was the height of the rush hour, and the bus was as tightly packed as a sardine can. As the bus left Msamala bus stand, a middle-aged man standing in the gang way suddenly collapsed.

The passengers started to shout immediately. Hearing this, the driver pulled into the side. As soon as the bus stopped, most of the passengers jumped off and ran away. Only five stayed on the bus. 'Don't touch him!" said one. "He may be suffering from a contagious disease!". "In that case we may be stuck here four hours!" said another and left. "Or we may be placed in quarantine in hospital for some days!" said a third passenger, also getting off.

The student ignored them. Calmly he knelt down beside the man, and put his ear against the man's chest. "He is breathing! "he announced, "Are all the windows open? He needs fresh air". The student loosened the man's color and tie, and slowly he began to revive.

When a person faints he loses consciousness. A spell may last for several minutes. It is caused by an insufficient supply of oxygen or blood to the brain. Other causes include a sudden drop in blood pressure, fasting, anemia, exhaustion and emotional upset.

In short, when a person faints, these measures can be taken at first; the patient should be stretched out flat, with the head lower than the rest of the body. Second, all tight clothing should be loosened in order to aid breathing. Also windows should be opened so that there is plenty of fresh air. Place an ear against the left part of the chest to make sure that the heart is beating. If the heartbeat has stopped, the heat should be massaged and if the breathing has stopped, artificial respiration (mouth to mouth) should be started.

However there are things to avoid when someone has fainted, first, do not move the patient until he has fully recovered. Secondly do not throw cold water in his/her face. Third, do not slap him or bury his feet to revive him. Lastly, do not try to pour water or whisky down his throat while he is unconscious.

Questions:

(a) Chose the most correct answer from among the alternatives given and write its letter in your answer sheet.

(i) From the passage, it infers that, in order to administer first aid, you have to:

A. Be a doctor
B. Keep calm
C. Be a student
D. Be an official of the Red Cross Society
E. Be a manager.

(ii) The man probably fainted because:

A. He was drunkard
B. He collapsed
C. His heart stopped beating.
D. He was middle-aged
E. He was short of air.

Scanned by CamScanner

(iii) The driver pulled into the side of the road because.
A. He thought the men had died.
B. He realized the man needed treatment.
C. He heard the passengers shouting.
D. He heard the collapsing.
E. He had the tyre got burst.

(iv) In this particular case, what else might the student have correctly done to assist the man, apart from the things that he did?
A. He might have loosened the man's collar and tie.
B. He might have sat him on a seat.
C. He might have pained him with a newspaper.
D. He might have applied artificial respiration.
E. He might have canned him with bamboo stick.

(b) Complete the following sentences with the right information from the passage.
(i) Why do you think most of the people ran away?
.....
.....
(ii) Write down two important things to be avoided when dealing with the faint person. ....., and
.....

POETRY

-Song of Lawino and OCOL	-	O.P.'Bitek (1979) EAPH
-Growing up with Poetry	-	D. Rubadiri (Ed) (1989 Heinemunn
-Summons	-	R. Mabala (1980) TPH

11. Read the following poem then answer the questions that follow:

Behold!
The sun has risen
And with it the sons of the land have risen too
Forward they go
Well armed.

Singing praises to the beauty of the sunrise
With the determination of long term warriors
Challenging the enemy
With the courage of free mind
And the vigor of a clean purpose

Sit and wait brethren.
Wait and see what glory they bring at sunset.
How they pay homage to the land.
And their people!

QUESTIONS:

i) What is the poem about?
ii) Write the **title** of this poem in one word.
iii) For whom does the poem tell us that the sun has risen?
iv) What does a word 'sunrise' stand for?
v) (a) The poet has employed some words which are not normal word order which are long-term, sunset and forward they go. What do they stand for per each?
(b)What `type of poem is this? Give reasons to support your answer (two (2) reasons)

   (v) In which sites Abushiri-Bwana Heri revolts accursed in Africa

   (b) Mention five motives for application of various colonial administration systems in Africa.

4. Arrange the following statements in a chronological order
   A. (i) There the Boers established the Republic of South Africa and Orange free State.
   (ii) Boers developed anti-British Sentiments
   (iii) South Africa Firstly inhabited by Boers in 1652 under Jan Van Riebeck.
   (iv) The Boers came into clash with the British government in 1795.
   (v) The Boers moved North wards.

   B. Identify the incorrect historical statements in the following items and write its letter beside the item number.
   (i) A. History is the record of human activities
   B. Human activities enabled man to obtain needs from natural
   C. Man enters into definite Social relations with other people
   D. History accounts for Kings and Queens.

Scanned by CamScanner

(ii) A. The plantation agriculture was very distinctive form of cultivation in which specialized crops were grown.
B. The plantation agricultural used a large number of closely unskilled laborers who were supervised by foremen.
C. In central Africa rubber plantation were owned by the Germans and French Settlers.
D. Plantation were scientifically managed and involved the use of machines
F. There was maximum of profit making through super exploitation laborers

(iii) A. Explorers, Missionaries and traders came to Africa to establish colonial rule.
B. Explores supplied important geographical information
C. Missionaries urged Africans not to resist foreign rule
D. Profitable investment areas were another demand of this capital
E. All these could not be obtained if slave trade continued.

SECTION C (60 MARKS)
Answer three (3) questions from this section

5. Show six (6) objectives of the newly re-established East African community (EAC) and show how Tanzania is likely to benefit form it.

6. With conclusive evidences analyze six problems facing African countries that originated from their colonial heritage.

7. Critically examine six (6) contributions of independent church movement and warfare association to the road of independence in East Africa.

8. Comment on the role played by the colonial social services in consolidating colonialism in Africa any three (3) (points)

9. Discuss six (6) mechanisms used by the colonialist to break up the natural (indigenous) economy in East Africa.

10. Elaborate six (6) draw bark "negative impacts" of Ngoni into East Africa in the 19th Century.

GEOGRAPHY

(For both school and Private candidates)

TIME: 2:30 HRS **TUESDAY 30 April, 2019 (PM)**

INSTRUCTIONS

This paper consists of section A, B, C and D

1. Answer all question in section A, B and C and one (1) question from each part of section D
2. Map extract of Mbeya (sheet 244/4) is provided
3. Calculators and cellular phones are not allowed in the examination room.
4. Write your examination number on every page of your answer sheet (5)

Scanned by CamScanner

SECTION A (25 MARKS)

Answer all questions in this section

PHYSICAL AND MATHEMATICAL GEOGRAPHY

1. For each of the items (I -x), choose the correct answer from among the given alternatives and write its letter beside the item number.

(i) The following are the evidence that proves the earth is sphere except
A. Circum navigation of the earth
B. Ship Visibility
C. Great Circle
D. Sunrise and sunset
E. Day and night

(ii) When water flows naturally out of the ground from the interior of the earth is known as
A. Wells
B. Stream
C. Spring
D. Water table
E. Rejuvenation

(iii) Which of the following is not a renewable resource
A. Water
B. Air
C. Forest
D. Mineral
E. Plastic

(iv) Inselbergs may be formed by process of
A. Volcanicity
B. Folding
C. Erosion
D. Faulting
E. Deposition

(v) The renewed erosive power of the river termed as
A. River piracy
B. River deposition
C. River degradation
D. River process
E. River rejuvenation

Scanned by CamScanner

(vi) The earth's crust is sometime referred to as
A. Mantle
B. Core
C. Lithosphere
D. Troposphere
E. Mesosphere

(vii) If Dar es Salaam at sea level has a temperature of 32C° what is the temperature of Ruvuma which is 1500 M above the sea level?
A. 19
B. 41
C. 17
D. 23
E. 16

(viii) What is the direction of bearing 315°?
A. South East
B. East North East
C. North West
D. South East
E. North North East

(ix) The following feature is a result of depositional and positional activities in the ice regime.
A. Erratic
B. Moraines
C. Cirque
D. Hanging valley
E. A rate

(x) The base of a cliff is undercut by rocks and sand by the process called
A. Hydraulic action
B. Attrition
C. Corrosion
D. Hanging valley
E. Solution

Scanned by CamScanner

2. Match the item in list A with responses in list B by writing the letter of the correct responses beside the item number.

LIST A	LIST B
(i) A long fairly raised part of the ocean floor.	A. Continental shelf
(ii) They are narrow and steep-sided valleys that form on the sea bed of the deep sea plain	B. Submarine plateau
(iii) Is a piece of land that is completely surrounded by water	C. Deep sea plain
(iv) This is the steep slope on the sea ward end of the continental shelf which ends deep inside the ocean.	D. Ocean ridge
(v) Is the shallow part of the sea that stretches out from the coast to where the ocean floor suddenly slopes steeply into the deep sea.	E. Continental slope
	F. Island
	G. Sea level
	H. Oceanic trenches
	I. The continent
	J. Ocean floor

3. (a) What is a flood plain?
   (b) With the aid of diagram explain the formation of a flood plain and associated features.

Scanned by CamScanner

SECTION B (27 MARKS)
(Answer all questions in this section)

APPLICATION OF STATISTICS INTRODUCTION TO RESEARCH AND ELEMENTARY SURVEYING

4. The table below shows cash crops production in Tanzania from 2005 to 2007(in 000 tones).

Crop/year	2005	2006	2007
Coffee	250	280	100
Tea	200	100	275
Tobacco	175	180	50

(a) Outline three steps of constructing a simple line graph.
(b) What are the three merits and three demerits of a simple line graph.

5. (a) What is focus group discussion (FGD) in research
(b) What are the advantages and problems of conducting focus group discussion (FGD) any five (5) (points)

6. (a) Define the term obstacle as used in chain survey
(b) Mention four types of obstacles in chain survey
(c) With the aid of diagram explain how you can overcome an obstacle by using diversion parallel line method (Rectangular method)

SECTION C (28 MARKS)
(Answer all questions in this section)
MAP READING AND PHOTOGRAPH INTERPRETATION

7. Carefully study the map extract of MBEYA sheet 244/4 and then answer the question that follows.
(a) With evidences from the map list down five map marginal information used on a given map
(b) Calculate the area covered by MBEYA forest reserve in km
(c) Basing on evidences from the map suggest the climate of MBEYA town
(d) What are the functions of Mbeya town? Give **three** main functions based on evidence from the map.
(e) Measure the length of TAZARA Railway line in km

8. Answer the following photograph questions.
(a) Define the following photograph terms
(i) Terrestrial photograph
(j) Extra terrestrial photograph
(iii) Close up horizontal photograph
(b) Differentiate close up horizontal photograph from general view horizontal photograph (3 points)
(c) List down four strengths ov vertical photograph over map

Scanned by CamScanner

SECTION D (20 MARKS)
Answer one (1) question from each part

PART 1: REGIONAL FOCAL STUDIES

9. Account for the factors which have promoted dairy farming in Denmark and Netherland (any five points)

10. (a) What is land reclamation
    (b) What were the stages of reclaiming land in Netherland?

PART II: ENVIRONMENTAL ISSUES, POPULATION AND SETTLEMENT

11. Describe seven (7) natural hazards which may bring environmental problems.
12. Explain the following terms
    (a) Infant mortality rate
    (b) Dependency ratio
    (c) Population age structure
    (d) Fertility
    (e) Adult mortality rate

DISTRICT FORM FOUR MOCK EXAMINATION 2019

LINDI REGION

041 **BASIC MATHEMATICS**

Time: 2:30 Hours TUESDAY 30 April, 2019 (AM)

INSTRUCTIONS

1. This paper consists of sections A and B
2. Answer all questions in section A and any four (04) questions from section B
3. All necessary workings and answers must be shown clearly
4. Mathematical tables and graph papers may be used where necessary
5. Cellular phones and electronic calculators are strictly prohibited in the examination room
6. Write your examination number on every page of your answer sheet(s) used
7. The following constants may be used
   (i) R= 6400 km
   (ii) л= 3.14

(This paper consists of 06 printed pages)

Scanned by CamScanner

SECTION A (60 Marks)

Answer all questions in this section, show all necessary workings and answers

1. a) Write 20.0374 correct to:
   (i) Three (3) decimal places
   (ii) Three (3) significant figures
   (iii) standard for

   b) Write $0.\dot{6}\dot{4}$ in the form of $^{a}/_{b}$ where $b \neq 0$

2. (a) Rationalize the denominator: $\frac{3+\sqrt{3}}{\sqrt{2}+\sqrt{5}}$

   (b) Solve the equation $\left(\frac{1}{3}\right)^{x+1}\left(\frac{1}{9}\right)^{2-x} = \frac{1}{81}$

3. (a) Simplify $\frac{\log x^4 - \log x}{\log x^3 - \log x}$

   (b)In a class of 40 students, 12 enrolled for both English and German. 22 enrolled for German. If the students of the class enrolled for at least one of the two subjects, then how many students enrolled for only English and not German?

4. (a) Let $\underset{\sim}{a} = 3\underset{\sim}{i} + 2\underset{\sim}{j}$ and $\underset{\sim}{b} = 4\underset{\sim}{i} - 3\underset{\sim}{j}$. Find the value of m and n if

   $ma + nb = 10i + j$

   b) Given that $\sin A = \frac{3}{5}$, find the values of
   (i) $CosA$

   (ii) $\frac{\tan A - \sin A}{1 + \cos A}$

5. (a) The operation $x * y$ is defined as $2x + y^2$. Find the value of the following
   (i) $3 * 2$
   (ii) $(2 * 1) * (2 * 3)$

   (b) The length of a rectangle is twice its width. Its perimeter is 42cm. What is its width?

Scanned by CamScanner

6. (a) M is proportional to the square of N. When $N = 4$ then $M = 2$, Find N when $M = 4.5$

(b) 25kg of salt cost 600/=. How much does 8kg cost?

7. (a) Find the rate on the principal of Shs 6200/= for period of $4\frac{1}{2}$ years.
If the interest is Shs. 930/=

(b) A chair is bought for 20,000/= and the sold for 24,000/=. Find the percentage profit.

8. (a) How many terms of the series $1 + 3 + 5 + 7 + ...$ are needed for the sum to reach 169?

(b) Hamis deposits Tshs 2500/= in a bank at the rate of 6% compounded annually, after how many years will he receive a total of Tsh 4411.35?

9. (a) Verify that $\sin(90^0 + 30^0) = \sqrt{3}/2$

(b) Prove that $\tan A = \frac{\text{Sin A}}{\text{Cos A}}$

10. (a) (i) Factorize $5x^2 - 9x - 18$

(ii) Solve $(2x-3)^2 = 4$

(b) If $2x^2 + 8x + 15 = q(x+r)^2 + s$. Find the value of q, r and s.

Scanned by CamScanner

SECTION B (40 marks)
Answer four (4) questions from this section.

11. A firm makes curtains which are either ordinary or deluxe. Each ordinary curtain takes 3 hours to produce and uses 6m of material and deluxe curtain takes 6 hours to produce and uses 7m of material. The workers of the firm can work for a total of 60 hours, and there are 90m of material available. If the profit on ordinary and deluxe curtains is 4,000Tshs and 6,000Tshs respectively. Find how many each should be made to maximize profit.

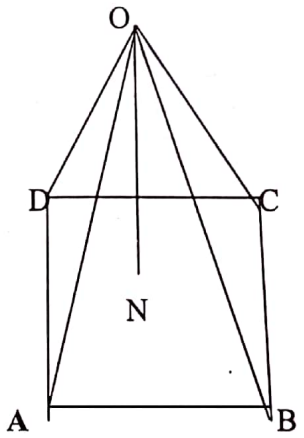

12. The marks below were obtained by 40 students in physics test.

14	23	12	16	14	17	42	21	22	49
36	18	14	12	23	24	23	33	29	31
32	33	29	44	31	32	17	48	23	25
28	27	15	16	48	26	27	30	42	40

(a)Make a frequency distribution table by grouping the marks with class intervals 10 – 14, 15 – 19, 20 – 24.....

(b) By using the grouping data in (a) above, find
- (i) The mean mark of 40 students
- (ii) The median
- (iii)The mode

13. (a) The figure represents a pyramid with a square base ABCD of side 5m. OA = OB = OC = OD = 8m.

Calculate the height, ON, of the pyramid.

(b) Find the distance between the points A (76°S, 38°E) and B(60°S,38°E) Measure along the meridian.

Scanned by CamScanner

14. The following trial balance was extracted from the businessman book's of Mr. Lumuliko at 30th June 2015.

S/N	NAME OF ACCOUNT	Dr. (Tshs)	Cr (Tshs)
1	Sales		385,000
2	Purchases	300,000	
3	Rent	24,000	
4	Light expenses	18,000	
5	Fixture and fittings	56,000	
6	Debtors	50,000	
7	Creditors		91,000
8	Bank	108,000	
9	Cash drawings	70,000	
10	Capital		200,000
11	Returns out wards		10,000
12	Opening stock	60,000	
	Total	686,000	686,000

Prepare trading, profit and loss account for the year ended 30th June 2015.
NOTE: Closing stock was valued at 30,000/=

15. (a) Find the image of (5, 6) when rotated through 270° clockwise followed by reflection in the line $y = -x$.

(b) If $A=\begin{pmatrix}2 & 1\\ 4 & 5\end{pmatrix}$ and $B=\begin{pmatrix}k & -2\\ 1 & k\end{pmatrix}$ find two values of k such that $|A|=|B|$

(c) Find the inverse of matrix $A=\begin{pmatrix}9 & 4\\ 2 & 1\end{pmatrix}$ hence use the results to solve the system ofequations.

$$\begin{cases}9x+4y=17\\ 2x+y=4\end{cases}$$

Scanned by CamScanner

16. (a) A bag contains 5 Red and 4 Blue balls. Two are drawn in succession, without replacement

Find the probability that;-

(i) Both are red

(ii) They have different colours.

(b) The function f is defined as follows:

$$f(x)=\begin{cases} x-1 if x\le -1 \\ x+1 if -1<x\le 0 \\ x if x>0 \end{cases}$$

(i) Sketch the graph of $f(x)$

(ii) State the domain and range of $f(x)$

031/1 PHYSICS PAPER 1

TIME 3:00 FRIDAY 3 May, 2019(AM)

INSTRUCTIONS

1. This paper consists of sections A, B and C
2. Answer all questions in sections A and B and one (01) question from section C
3. Calculators and cellular phones are not allowed in the examining room.
4. Write your Examination Numbers on every page of your answer sheet.
5. Remember to write the number of every question you have attempted.
6. Where necessary the following constants may be used:
   (i) Acceleration due to gravity $g = 10mls^2$ or 10N/kg
   (ii) Specific heat capacity of ice = 2100J/kg
   (iii) Specific latent heat of fusion of ice $=3.2 \times 10^5$ J/Kg
   (iv) Average density of air $=1.25kg/m^3$
   (v) Density of fresh water $= 1000kg/m^3$
   (vi) Density of mercury $=13600kg/m^3$
   (vii) Relative density of sea-water =1.03
   (viii) Electronic charge, $e = -1.602 \times 10^{-19}$ C
   (ix) Pie, $\pi = 3.14$

Scanned by CamScanner

SECTION A (30 MARKS)

Answer all questions.

1. For each of the item (i) – (x) choose the correct answer from among the given alternatives and write its letter beside the item number

(i) In a laboratory , the diameter of a piece of wire can accurately be measured by:-
A. Vernier calliper
B. Micrometer screw gauge
C. Engineer's calliper
D. Rate meter
E. A thread wound round it once.

(ii) Which of the following are non – magnetic materials?
A. Iron and steel
B. Aluminium and Zink
C. Nickel and cobalt
D. Nickel and steel
E. Iron and cobalt

(iii) A body is said to be in equilibrium if
A. The body moves with uniform speed
B. The net force acting on the body is zero
C. The upward forces on the body counter – balance some of the downward forces.
D. Its centre of gravity is low positioned
E. Its centre of gravity is high

(iv) When using measuring cylinder, one precaution to take is to
A. Check for zero error
B. Look at the meniscus from below the level of water
C. Obtain more readings by looking from more than one direction
D. Position the eye in the line with the base of the meniscus
E. Make sure that the measuring cylinder is clean

(v) What hold, the planets in their orbits and makes them move (revolve) around the sun?
A. Force of attraction between the sun and the planet
B. Force of attraction between the planet
C. Force of gravity that attracts all bodies
D. Force of attraction between the sun and the earth
E. Force of attraction between the earth and planet.

Scanned by CamScanner

(vi) Pin hole camera gives a sharp image

A. Because the image is small
B. If the hole is small
C. If the hole is extremely small
D. Because the object is a long way from the hole
E. Because the screen is in a short distance from the hole

(vii) The destruction of O-zone layer in the atmosphere has led the world to disasters caused by:

A. Absorption of the background radiation
B. Poor handling of the radioactive materials
C. The increase of the ultra – violet radiations on the earth
D. Poor utilization of radioactive materials
E. Poor disposal methods of radioactive remains

(viii) Racing cars rarely get accidents despite their high, speed because they.

A. Have greater momentum
B. Have big tires with big treads
C. Have wide bases and low centre of gravity
D. Exert greater frictional force
E. Have less mass.

(ix) An air ship is floating high above the ground. In this case the air.

A. Density outside the airship is less than the air density inside
B. Density outside the airship is greater than the air density inside.
C. Up thrust is greater than the airship weight
D. Temperature inside the airship is equal to the air temperature outside
E. Up thrust is lower than the weight of the air ship

(x) Ocean tides are caused by

A. Rotation of the earth about the sun
B. Rotation of the moon about the earth
C. Gravitational force of the earth on the moon
D. Rotation of the earth about its axis
E. Gravitational force of the moon on sea water.

Scanned by CamScanner

2. Match the items in list A with the responses in list B by writing the letter of the correct response beside the item number.

LIST A		LIST B
(i)	Beta particle	A. Number of protons plus number of neutrons
(ii)	Gamma radiation	B. Splits into two or more smaller nuclei
(iii)	Alpha particle	C. Is the time required for a half of the initial number of nuclei to decay
(iv)	Isotope	D. Same number of protons but different number of neutrons
(v)	Mass number	E. Bombarding the target nucleus with high-energy x-rays or gamma rays
(vi)	Nucleons	F. Gold leaf electroscope
(vii)	Photonuclear reactions	G. Electron
(viii)	Fission	H. Thermostat.
(ix)	Half-life	I. Join together to form a heavier nucleus.
(x)	Fusion	J. High penetrating power but stopped by Lead sheath
		K. Protons and Neutron
		L. Deflected towards South pole of the magnet
		M. Spectrometer
		N. Resistor

3. For each of the items (i) – (x), fill in the blank spaces by writing the correct answer in the answer sheet provided.
   (i) The product of force and time is known as .....
   (ii) The study of stationary electric charges is called.....
   (iii) Which process involves heat transfer through gases .....
   (iv) What physical quantity is obtained by the ratio of distance moved by effort to distance moved by the load? .....
   (v) Which category of the material whose electrical conductance lie between an insulator and a conductor .....
   (vi) What instrument is used to measure the density of liquid .....
   (vii) The process of mixing coloured lights by reflection from a white surface is called.....
   (viii) What name is given to the fixed path along which planets travel around the sun? .....
   (ix) The nature of earth quake is usually described by measuring its magnitude and.....

Scanned by CamScanner

SECTION B (60 MARKS)

Answer all questions in this section.

4. (a) (i) State the law of floatation
   (ii) Mention two conditions that can make an object float
   (b) (i) Draw a well – labelled diagram of a hydrometer
   (ii) Explain how a hydrometer is used to measure the density of a liquid
   (c) An empty density bottle has a mass of 25g. its mass when full of water is 50g and 45g when full of another liquid. What is the relative density of the liquid.

5. (a) (i) What is friction
   (ii) State three laws of friction

   (b) (i) Write four methods of reducing friction in machinery
   (ii) How static friction differ from dynamic friction

   (c) A concrete block of mass is 10kg rests on a table. It is found that when horizontal forces of 40N pulls the mass, it is just beginning to slide on the table, find the coefficient of static friction

6. (a) (i) What is meant by a transformer ?
   (ii) Why does a transformer work with alternating current (a.c) only?
   (b) State two ways in which power is lost in a transformer.
   (c)A 240V main transformer 1000 turns in primary and N turns in secondary. It is used to supply energy to a 12V, 24W lamp.
   (i) How many turns are there in the secondary?
   (ii) What is the efficiency of the transformer if the current drawn from 240V supply is 125mA?

7. (a) Define the following terms
   (i) Star
   (ii) Planet
   (b) (i) What is constellation ?
   (ii) Mention two examples of constellations
   (iii) What is the importance of constellation
   (c) (i) Give two types of ocean tides
   (ii) Explain the cause of ocean tides.

8. Explain the term potential energy and kinetic energy
   (b) State the principle of conservation of energy
   (c) A pendulum bob of mass 50g is pulled aside to a vertical height of 20cm from the horizontal and then released. Find
   (i) The maximum potential energy
   (ii) The maximum speed of the bob
   (iii)The potential energy of a bob at a height of 10cm after being released.

Scanned by CamScanner

9. (a) Define the following terms
   (i) Force
   (ii) Pressure

(b) (i) Briefly explain when does a force become weight?
(ii) A car of mass 1200kg is brought to rest by a uniform force of 300N in 80sec. What was the speed of the car?

(c) A rectangular log of wood of density 200kg/m^3 has dimensions 0.3m x 0.5m x6.0m.
   (i) Calculate the maximum pressure it can exert on the ground
   (ii) Calculate the minimum pressure it can exert on the ground.

SECTION C (10 MARKS)

Answer one question

10. (a) (i) Name three basic radiations that occur naturally
   (ii) Discuss briefly the properties of the radiations mentioned in 8 (a) (i) above in terms of penetrating power

   (b) (i) Define mass number and atomic number
   (ii) Thorium disintegrate in the following manner

$$^{232}_{90}Th \longrightarrow {}^{228}_{88}Ra \longrightarrow {}^{228}_{89}Ac \longrightarrow {}^{228}_{90}Th \longrightarrow {}^{224}_{88}Ra$$

State the particles emitted at each part of the disintegration

(c)A thorium 228 radioactive source placed in a polythene bottle decayed into a radioactive gas thoron. The decay process was recorded by the Geiger- muller tube as follows.

Time in minutes	0	4	8	12	16	20
Count rate	40	30	20	14	10	7

Draw the graph of the count rate against time.

11. (a) (i) Define thermionic emission
(ii) What are X-rays?
(iii)Mention two uses of x – rays
(b) With the aid of a diagram explain how x – rays are produced
(c) Draw a well labeled diagram of a cathode ray oscilloscope.

DISTRICT FORM FOUR MOCK EXAMINATION 2019

LINDI REGION

032/1 **CHEMISTY 1**

TIME: 2:30 Hours MONDAY 6May, 2019 (AM)

INSTRUCTIONS

1. This paper consist of section A,B and C
2. Answer all question in this paper
3. Calculators and cell phones are not allowed in the examination room
4. Write your examination number on every page of your answer sheet
5. All writing must be in blue or black in, except for diagrams which must be used.
6. The following constants may be used
   Atomic masses, H = 1 C= 12, 0=16, AL =27 S = 32 Na = 23 Cu = 64
   Avogadro's number 6.02×10^{23}
   G.M.V at S.T.P = $22.4dm^3$
   1 Faraday = 96,500coulombs
   1 litre = $1dm^3 = 1000cm^3$

Scanned by CamScanner

SECTION A (20 Marks)

1. For each of the items (i) – (x) choose the correct answer among the given alternatives and unite its letter beside the item number in the answer sheet.

i) Separation of the constituent of a mixture by fractional distillation is possible because the constituents in the mixture differ in their.
   A. Vaporing point
   B. Freezing point
   C. Boiling points
   D. Melting points
   E. Sublimation points.

ii) If element M of Group I combines with element X of Group VI the formula of the compound formed is.
   A. X_2M
   B. MX 6
   C. MX_2
   D. X_3 M
   E. M_2 X

iii) During chemical reactions bonds are broken and are formed. If the total energy required to break the bonds is higher than the energy required to form the bonds. The reaction will be termed as
   A. Exothermic reaction
   B. Endothermic reaction
   C. Polymer action
   D. Hydrogenation
   E. Neutralization

iv) One disadvantage of hard water is that it
   A. Causes the corrosion of water pipes
   B. Causes increased tooth decay
   C. Requires more soap for washing
   D. Contains minerals which are harmful
   E. Boils above 300°C

v) An example of a salt which is insoluble in cold water but dissolve by warming is
   A. Sodium chloride
   B. Lead chloride
   C. Calcium carbonate
   D. Silver chloride
   E. Copper carbonate

vi) Ammonia is manufactured by the process called:-
   A. Le Black process
   B. Hess process
   C. Contact process
   D. Kuhlman process
   E. Haber's process

Scanned by CamScanner

vii) Equivalent weight of an element is the mass liberated by
A. 1 coulomb of electricity
B. 96500 coulombs of electricity
C. 2 faradays
D. 96500 coulombs of electricity
E. Electrolytic process

viii) In the periodic table ionization energy
A. Decreases towards the leftt hand side
B. Increases down the group
C. Increases toward the left hand side
D. Decreases down the group
E. Follows the diagonal relation ship

ix) The loss in mass when 100g of calcium carbonate is strongly heated to constant mass is
A. 100g B. 56g C. 54g D. 40g E. 44g

x) Substance L has a percentages composition 54.6% carbon 9.1% hydrogen and the rest is oxygen. The empirical formula of substance L is
A. C_2H_4O
B. CH_4
C. CH_2O
D. C_2H_6O
E. C_2HO_2

2. Match the items in list A with the responses in List B by writing the letter of the correct response beside the item number in the answer sheet.

List A		List B
(i)	Its sulphide is insoluble in water but soluble in dilute hydrochloric acid.	A. Ammonium hydroxide
(ii)	It is used to identify the presence of nitrate ions.	B. Iron (II) sulphate
(iii)	It is used to identify the presence of calcium ions	C. Blue and white respectively
(iv)	It burns to give a brilliant yellow flame	D. Calcium hydroxide
(v)	It is used to identify sulphate ions	E. Hydrogen sulphide
(vi)	It is used to identify carbonate ions	F. Silver nitrate
(vii)	It is used to identify halide ions	G. Zinc
(viii)	It gives a brick red colour when placed in a non-luminous flame.	H. Ammonium oxalate
(ix)	The term that inaccurately used for aqueous ammonia.	I. White and blue respectively
(x)	Appearance of anhydrous $CuCl_2$ and $CuSO_4$.	J. Sodium
		K. Calcium
		L. Nitrogen
		M. Carbon dioxide
		N. Barium chloride
		O. Ammonium chloride

Scanned by CamScanner

SECTION B. 54 (Marks)
Answer all questions

3. (a) (i) What is soil fertility?
   (ii) Briefly explain why a fertile soil is not necessary productive.

   (b) Kawago was washing his school uniform using river water and a bar soap. He took a long time to make his clothes look clean as usually water form a scum
   (i) What term used to describe such kind of water?
   (ii) Define the term you have named in (b) (i) above.
   (iii) Which substance are likely to cause such problem in river water? (**two** substances)

4. (a)(i) Write down the condensed structural formula and IUPAC names of the isomers whose molecular formula is C_4H_{10}
   (ii) Name the homologous series of organic compound which is represented by the general formula
   $C_nH_{(2n+2)}O$ (in each case n= 1,2,3 .....).Write the molecular formula of fifth member.

   (b) Write down structural formula and give the IUPAC names of each organic compound formed as product in each reaction equation.

   (i) $CH_3CH_2OH + CH_3COOH \rightleftharpoons$

   (ii) $CaC_2 + 2H_2O \longrightarrow$

5. (a)(i) Define the term valences.
   (ii)Briefly explain three properties of electrovalent compounds.

   (b) Calculate the oxidation state of the underlined element below:
   (i) $K\underline{Cl}O_3$(ii) $\underline{C}_2O_4^{2-}$

6. Consider the diagram below, then answer the questions that follow

Scanned by CamScanner

(a) (i) Name and define Q, R and S in the above cell.

(ii) State the function of P.

(iii) If the above cell was an electrolytic cell for copper (II)sulphate solution using platinum electrodes,

Write the half equation at each electrode and give the balanced overall reaction equation.

(b) A current of 0.1A flows through a solution of copper (II) sulphate solution for 100 seconds. How many grams of copper will be deposited?

7. (a) Starting from sulphur, using chemical equations where appropriate, outline the manufacture of sulphuric acid by the contact process.

(b)State two commercial uses of sulphuric acid

8. (a) Name and give the formula of

(i) An amphoteric oxide

(ii) Acidic oxide

(iii)Basic oxide

(iv)Neutral oxide

(b) Write down four points to support the idea that air is a mixture of gases.

9. (a) What is mole?

(b) $Al_2(SO_4)_3 + 6NaHCO_{3(aq)} \longrightarrow 2Al(OH)_{3(s)} + 3Na_2SO_{4(aq)} + 6CO_{2(g)}$

From the above equation, calculate

(i) The mass of aluminium hydroxide precipitated by the action of exist sodium hydrogen carbonate on solution containing 34.2g of aluminium sulphate.

(ii) The volume of carbon dioxide formed at S.T.P when the same reaction is completed.

10. (a) Suggest one good method for the separation of each of the following mixtures.

(i) Sodium chloride and water

(ii) Iodine and sand

(iii)Alcohol and water

(iv)The green solution from the leaves

(b) State what is observed in the following experiments.

(i) Dilute hydrochloric acid is added to sodium carbonate

(ii) Carbon dioxide is passed through lime water for a long time

Scanned by CamScanner

11. (a) (i) Differentiate between hygroscope and deliquescence and give an example in each case.
(ii) State the modern periodic law.

(b) Use the following elements to answer the questions that follow.

Element	Atomic number
P	3
Q	8
R	9
T	12
U	16
V	10

State with reason(s) which of these elements is/are:-
(i) Inert gas
(ii) Alkali metal
(iii) Halogen

SECTION C (26 Marks)

Answer all questions in this section

12. (a) Carbon exists in several physical forms. What name is given to such phenomenon?
(b) Differentiate between graphite and diamond. (Five points)
(c) Outline one significance of each of the following
(i) Animal charcoal
(ii) Wood charcoal
(iii) Lampblack
(d) Some oxides of non-metals are beneficial to human. Justify the statement by using one oxide of carbon.

13. Describe the extraction of iron from the hematite ore including all the chemical equations for the reaction. Diagram is not necessary.

UNITED REPUBLIC OF TANZANIA

PRESIDENT'S OFFICE REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

DISTRICT FORM FOUR MOCK EXAMINATION 2019

LINDI REGION

033/1 **BIOLOGY 1**

TIME: 3HOURS THURSDAY2 May, 2019 (AM)

INSTRUCTIONS:

1. This paper consists of sections A, B, and C.
2. Answer **ALL** questions in section A and B and **ONLY ONE** question from section C
3. All writings should be done using blue or black pen, except for diagrams that must be drawn in pencil
4. Write your **EXAMINATION NUMBER** on every page of your answer booklet(s)/sheets.
5. Calculators and cellular phones are not allowed in the examination room

Scanned by CamScanner

SECTION A (20 Marks)

Answer **ALL** questions in this section

1. For each of the items (i)-(x) choose the correct answer from among the given alternatives and write its letter besides the items number.

(i) The following are examples of water borne diseases:-
- A. Yellow fever and Typhoid
- B. Bilharzia and Malaria
- C. Cholera and Bilharzia
- D. Plaque and Cholera
- E. HIV and AIDS

(ii) The regions of most active growth in plants are found mainly in the:-
- A. Stem and Leaves
- B. Leaves and flower
- C. Cotyledons and endosperms
- D. Root hairs and shoot
- E. Root and stem apices

(iii) The function of sunlight energy in the human skin is to stimulate the systhesis of:-
- A. Vitamin A
- B. Vitamin K
- C. Vitamin B
- D. Vitamin D
- E. Vitamin C

(iv) Which of the following is common to both animals and plants?
- A. Respiration
- B. Cellulose
- C. Reproductive system
- D. Digestion
- E. Excretory system

(v) A grasshopper ventilates its gaseous exchange sub surface by:-
- A. Beating of cilia
- B. Opening of spiracles
- C. Removing of spiracles
- D. Moving its rib cage
- E. Moving the diaphragm

Scanned by CamScanner

(vi) A cross between an offspring and one of the original parent is called:-

A. Black cross
B. Cross over
C. Pedigree
D. Back cross
E. Test cross

(vii) One of the following is not part of a microscope:-

A. Magnification
B. Base
C. Mirror
D. Stage
E. Arm

(viii) The function of the white blood cells is:-

A. Carry diseases
B. Fight against diseases
C. Destroy the liver cells
D. Regulate water
E. Regulate growth

(ix) Which method is advised for disposing hazardous materials?

A. Recycling
B. Make pit latrine
C. Use of land fill
D. Dump site
E. Use of an incinerator

(x) Which one of the following part normally fertilization of ovum and sperm occur?

A. Uterus
B. Urethra
C. Oviduct
D. Vagina
E. Cervix

Scanned by CamScanner

2. Match the responses in List B with the phrases in List A by writing the letter of the correct responses beside the item number in list A;

LIST A		LIST B
i)	Allows movement in one plane only	A. Voluntary muscles
ii)	A joint found between Atlas and Axis	B. Suture joint
iii)	A joint has two bones separated by a pad of cartilage	C. Slightly movable joint
iv)	Type of joint that has several small bones glide over each other	D. Cardiac muscles
v)	An example of immovable joint	E. Pivot joint
vi)	A joint that allows movement in all direction	F. Gliding joint
vii)	A joint filled with synovial fluids	G. Smooth muscles
viii)	The thumb joint	H. Hinge joint
ix)	Skeletal muscles	I. Ball and socket joint
x)	Involuntary muscles	J. Synovial joint
		K. Saddle joint
		L. Articulate joint
		M. Cervical joint
		N. Skeleton
		O. The skull

SECTION B (60 Marks)
Answer **ALL** questions from this section

3. (a) Mention three ways in which mitosis is important to Living things.

   (b) List down different factors that influence growth in animals.

4. (a) Name the parts of the cell described in each of the following statements.
   (i) The site of respiration in the cell
   (ii) The semi permeable membrane that encloses the cytoplasm of the cell
   (iii)A large cellular organelle that contains hereditary information
   (iv)A small sac inside the cell that digests food,cell debris,bacteria and other foreign substances.
   (v) A jelly like mixture consisting mostly of water,located between the cell membrane and the nucleus

   (b) (i) What do you understand by the term Binomial nomenclature.
   (ii) Identify any three (03) rules of writing scientific names.

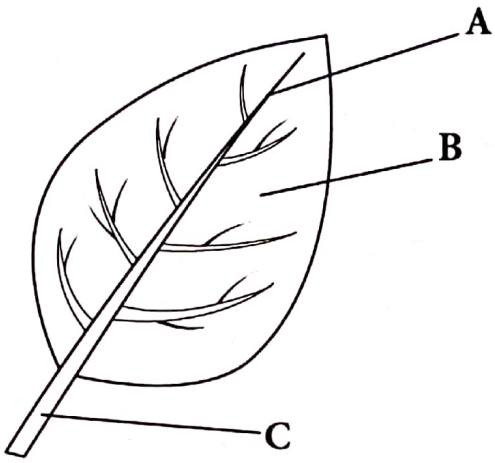

5. (a) (i) Define the term tropism
   (ii) Outline the biological importance of hydrotropism and phototropism

   (b) How is accommodation brought about in the human eye?

Scanned by CamScanner

6. (a) Explain what is meant by the following terms
   (i) Heterotrophic nutrition
   (ii) Autotrophic nutrition

   (b) Using the external structure of a leaf:

   (i) Name the parts labeled A, B and C
   (ii) What is the function of part labeled C?
   (iii) Give the external features which enable figure 1 to perform its photosynthetic role.

7. (a) (i) List the kingdoms into which organisms are placed
   (ii) Determine the distinctive features of members of the kingdom to which a malaria vector belongs.
   (b) (i) Identify any two flat worms found in the alimentary canal of living organism by using common name
   (ii) To which kingdom does organisms in (b) (i) above belongs?

8. You have given animal A whose body temperature changes due to change of environmental temperature and animal B whose body temperature does not change due to change of environmental temperature.

   (a) (i) What happens to the body temperature of animal A as the external temperature increases?
   (ii) State with reason(s) which type of animal you would expect to be more widely distributed.

   (b) What term is used to describe
   (i) Animals of type A
   (ii) Animals of type B

9. (a) Define the following terms
   (i) Food chain
   (ii) Food web

Scanned by CamScanner

(b) Use the following organisms to answer the question that follows:
Grass, Rabbit, Vulture, Snake, Toad and Grasshopper.

9. (c) Diagram of food web

(i) State three food chains from the food web above.
(ii) What would happen if the rabbit doubled in number?

10. (a) Differentiate between continuous and discontinuous variation.

(b) What will be the genotype, percent and phenotypic ratio of the off springs if an albino marries a heterozygous skinned woman.

SECTION C (20 Marks)
Answer only **ONE (1)** question from this section

11. Discuss family planning using the following guidelines
(a) Meaning of family planning
(b) Outlines any four methods of family planning
(c) Name any two advantages of each selected method
(d) Give any three (3) importance of family planning

12. Describe how malaria parasites are transmitted, the sign developed to the host and give four ways which can help in controlling Malaria in the country.

13. Write any essay on transpiration by using the guidelines below;
(a) Meaning of transpiration
(b) Factors affecting the rate of Transpiration (any five)
(c) Importance of transpiration (any four points)

Scanned by CamScanner
