MWANZA REGION MOCK EXAMINATION
FORM FOUR – 2018

CIVICS

011

Time: 2:30 Hours. **Monday, 20 August 2018 a.m.**

INSTRUCTIONS:

1. This paper consists of sections A, B and C.
2. Answer all questions in sections A, and B, and three (3) questions from section C.
3. Section A and B carry 20 marks each and section C carries 60 marks.
4. Cellular phones are not allowed in the examination room.
5. Write your Examination number on every page of your answer sheet (s).

Scanned by CamScanner

SECTION A: (20 marks)

Answer all questions in this section.

1. For each of the following items (i – x) choose the most correct answer among the given alternatives and write its letter beside the item number in your answer sheets provided.

(i) The following are the factors that influence democratization in a country except?

A. Education
B. Mass Media
C. Age distribution
D. Wealth
E. Sex

(ii) The ability of a person to know what he or she wants and why and be able to take necessary steps to achieve it:

A. Awareness
B. Emotion
C. Assertiveness
D. Negotiation
E. Problem solving

(iii) One of the following is not true about the factors that weaken the national sovereignity of a country.

A. Elections
B. Civil wars
C. Ethnicity
D. Foreign debts
E. unemployment

(iv) A permit from an authority to carry out an activity a business, to own or use something is called:

A. Rent
B. Duty
C. License
D. Levy
E. Fine

(v) Self-control enables one to do the following:

A. Involve himself or herself in whatever he or she desires without caring about the consequences.
B. To avoid destructive and unacceptable behaviour
C. Mistreat the weak people around him or her.
D. To fight anyone who provokes him or her

	P. A station where polling tax is collected.
	Q. A place where voting takes place.
	R. Person acquires new citizenship through written documents.

Scanned by CamScanner

SECTION B: *(2 marks)*

Answer all questions in this section.

3. Read the following passage carefully and answer the questions that follow.

There are a lot of written laws and policies in our country, as well as traditional or cultural rules that say what we can or what we cannot do. Sometimes the laws say one thing but what actually happens in our communities, schools, offices and homes is something else. Sometimes the rules are not clear or do not seem reasonable, which at the end of the day cause frustration, confusion and uncertainity.

Our laws tells us that women have equal rights, but you may notice that girls and women are often treated unfairly, meaning they are unable to take care of themselves or to make their own decisions. You may see that girls and women are not given chances to speak in public. You may notice that women and girls are controlled by men, but also they are the one's who face early marriages, domestic violence, female genital Mutilation and other negative socio-cultural practices. But also being excluded from leadership position. This is not equality.

Today, women and girls all around the world are working and struggling to gain equal rights by standing against oppression, against the negative socio-cultural practices, but demanding for good health care, leadership positions, being part in society and including the right to decide about their fertility and working with men to bring and make positive changes.

Questions:

(a) Suggest a suitable title for the passage.
(b) State two ways in which girls and women are treated.
(c) According to the passage list down three practices that undermine women and girls in the society.
(d) In your own view, what should be done to improve the equality between men and women? (give two points)
(e) Point out two strategies taken by women and girls to eliminate inequality.

4. (a) Briefly outline five factors needed for economic development.

   (b) Briefly explain five importance of the standard gauge railway construction on Tanzania's economic development.

SECTION C: *(60 marks)*

Answer three (3) questions from this section. Each question carries (20 marks).

5. Explain the potentiality of financial institutions for economic prosperity in the developing country like Tanzania. (Give six points)

6. Analyse the effectiveness of the government of Tanzania in its provision of social services to its people. (Give five points)

7. Examine the positive and negative effects of Globalization to a country like Tanzania (Give six points).

8. Multiparty system in Tanzania has mainly brought about democracy in the country but to some extent has destroyed the democracy. Support this statement by giving the merits and demerits of multiparty system in Tanzania.

9. Asses three importance and three consequences of preventive care and maintenance of personal and public property.

10. Our nation needs patriotic people who are very much committed to work together so as to speed up development in all sectors. Describe six importance of team work.

MWANZA REGION MOCK EXAMINATION
FORM FOUR – SEPTEMBER, 2018

ENGLISH LANGUAGE

022

Time: 3 Hours. **Thursday, 23 August 2018 p.m.**

INSTRUCTIONS:

1. This paper consists of sections A, B, C and D.
2. Answer all questions in sections A and B and sections C and D as instructed under each section.
3. Cellular phones and calculators are not allowed in the examination room.
4. Write your examination number on every page of your answer sheet (s).

Scanned by CamScanner

SECTION A: *(10 marks)*
COMPREHENSION AND SUMMARY

1. Read the following passage carefully then answer the questions that follow.

Have you ever noticed that his world is dominated by right handed people? And that their way of arranging and fixing things favours right – handedness rather than left handedness. For example, most door lock clockwise and open anti clockwise thus is simplifying things for right handed people. In England they will lay a table with the fork on the left and the knife on the right.

The Roman type of writing operates from left to right. Operating from right to left would have been easier from left handed persons. In some parts of the world using a left hand is looked upon negatively and perhaps as uncultured.

A child discovered to be left handed will be discouraged from this habit by all sorts of punishment.

There are two unsolved puzzles with regard to left handedness. What causes left handedness and why is it that there are very few left handed people around? Neither science nor psychology has been able to explain these puzzles clearly enough. Recently, however, scientists and psychologists have been looking into the human brain in an effort to solve these puzzles. No body can say for sure that they have made any headway so far. However, they have come up with some interesting discoveries.

The human brain is an expanded bulb-like structure made up of two hemispheres, the right and the left. It is a spongy matter consisting of many parts each with its own special function. Messages, from different parts of the body are sent to the brain for processing. There after, they are sent back to the various parts of body to perform different tasks.

The right and the left hemisphere are interconnected by a system of nerves. It has been discovered that in many right handed people, the area that controls speech in the brain is located in the left hemisphere. Yet only a small percentage of left handers have then speech control centers in the right hemisphere. That is to say, a great many left – handers have their speech control centers located in the left hemisphere. There are however a few left – handers with their speech centers in both hemispheres.

Generally, scientists agree that the left hemisphere deals with linear and logical information whereas the right one processes emotions and mood. They have also discovered of suffering from conditions such as depression, dyslexia, schizophrenia and phobias. This is quite unfortunate.

Nevertheless every cloud has its silver lining. Researchers have discovered that many left handers are bright – people. They usually score highly in science and maths. They are also said to be excellent in many other fields. For example great soldiers in history such as Julius Caesar, Napoleon Bonaparted and Alexander the great, were all left handlers. In sport particularly tennis and basketball, there are great names of left handers people well known – John McEnroe, Jimmy Connors and Martina Navratilova. You can probably think of a new other left – handed people who are famous.

Being left handed or right is a spectrum. That is one can be extremely left handed or some in the middle or extremely right handed.

Questions:

(a) Answer all questions below by choosing the most correct alternative.

(i) What happens in science and maths to many left handers?

A. They usually assist the slow learners
B. They are very special
C. They usually score highly
D. They are fantastic

(ii) What does the saying "Every cloud has a silver lining mean.

A. Misfortune may be followed by happiness
B. It is a good English proverb
C. Unsolved puzzles which are interconnected
D. Bulb like structure

(iii) Why do messages from different parts of the body are sent to the brain.

Scanned by CamScanner

A. For discoveries of different things
B. They are sent for processing
C. They are sent to perform parts
D. To deal with linear and logical information

(iv) According to the passage:
A. Scientists can say for sure what causes left handers
B. All clouds have a silver lining
C. There are three main groups of people mentioned
D. Most of left handers are at risk of suffering from high blood pressure.

(b) Complete the following sentences with the information from the passage.
(i) The type of typing which operates from left to right is called .....

(ii) This world is dominated by which kind of people? .....

(iii) What causes left handedness? .....

2. Summarize the second paragraph in not more than thirty (30) words.

SECTION B: *(20 marks)*
PATTERNS AND VOCABULARY

3. Re write the following sentences according to the instructions given after each.

(i) Jesca lent the ruler to Jackline (Begin: Jackline .....)

(ii) I like cartoons more than sports programme. (Begin: I prefer .....)

(iii) If you are fit, you will live longer. (Begin: the filter.....)

(iv) Although they are poor, they live happily/ (Begin with: Despite.....)

4. In each of the following sentences one word is wrong. Identify the wrong word and replace it by writing the correct word.

(a) Our headmaster told us that it is better to use local medicines because they are cheep and reliable.

(b) We are going to have a show next week, the prefects will be doing a sound cheque before the concert.

(c) May I have a peace of Zoazoa soap please!!

(d) Please, do this examination careful.

5. Choose the most correct answer and write its letter in your answer sheet.

(a) That container is .....therefore there is nothing in it.
A. full B. nothing C. empty D. in

(b) The word dig and .....have the same ending sound.
A. dog B. pot C. tin D. thin

(c) My friend is cooking rice, I am cooking rice .....
A. to B. too C. two D. tooth

(d) Good bye! See you .....Thursday.
A. at B. on C. in D. between

10. Answer two questions from the four alternatives A, B, C, and D.

A. Write a composition about 250 words on four (4) causes and four (4) effects of gender discrimination.

B. It is now your third month at school. Life at school is not calm to you. Write the letter to the Headmaster/Mistress of your school expressing the two bad situations which make you not feel comfortable in studies.

C. Write an essay of not less than 250 words on why the majority of students in your school fail to communicate in English.

D. Imagine you are a president of this nation and you are making a speech to villagers about the causes (four causes) of child labour. Write the speech that you would give which will teach those villagers a good lesson.

SECTION D: *(40 marks)*
RESPONSE TO READING

Answer two (2) questions from this section. One (1) question should be selected from poetry and other from novels and short stories or plays.

LIST OF READINGS

NOVELS AND SHORT STORIES

A Wreath for Father Mayer of Masasi	-	S. N. Ndunguru 1977 Mkuki na Nyota
Unanswered Cries	-	Osman Conteh, Macmillan
Passed like a Shadow	-	B. M. Mapalala (2006), DUP.
Spared	-	S. N. Ndunguru (2004) Mkuki na Nyota
Weep not child	-	Ngugi wa Thiongo (1987) Heinemann
The interview	-	P. Ngugi (2002) Macmillan

PLAYS

Three Suitors One Husband	-	O. Mbia (1994) Eyre Methuen
The Lion and the Jewel	-	W. Soyink (1963) OUP
This Time Tomorrow	-	Ngugi wa Thiong'o (1972) Heinemann
The Black Hermit	-	Ngugi wa Thiong'o 1968, Heinemann.

POETRY

Song of Lawino and Ocol	-	O. P'Bitek (1979) EAPH
Growing up with Poetry	-	D. Rubadiri (ed) (1989) Heinemann.
Summons	-	R. Mabala (1960) TPH

Scanned by CamScanner

11. Read the following poem and then answer the questions that follow.

Behold!
The Sun has arisen
And with it the sons of the land have risen too
Forward they go
Well armed
Singing praises to the beauty of the sunrise
With the determination of long term
Warriors challenging the enemy
With the courage of free mind
And the vigour of a clean purpose
Sit and wait brethren
Wait and see what glory they bring at sunset,
How they pay homage to the land
2 And their people.

Questions:

(a) Write the title of this poem in one word

(b) What is the poem about?
3

(c) For whom does the poem tell us that the sun has risen?

(d) What does the word "Sunrise" symbolize?

(e) What is the theme of this poem?

(f) What type of a poem is this?

(g) Comment on the structure of this poem

(h) The poem contains two major images. Mention them

4. (i) The poet talks about "challenging the enemy" who do you think the enemy might be

(j) What do we learn from this poem?

12. Explain the eight important items to be considered in the criticism of a poem.

13. To protest is to react against injustice. With reference to any two plays you have done or read, justify the truth of this statement. Give eight (8) points.

14. With reference to any two novels you have read under this section, discuss eight (8) things which you think are not good to be practiced by the future generation.

5.

SECTIONA A: *(20 marks)*

1. For each of the items (i) – (x), choose the correct answer among the given alternatives and write its letter beside the item number in your answer sheet(s) provided.

(i) Which of the following is common to both plants and animals?
- A. Respiration
- B. Digestion
- C. Excretory system
- D. Photosynthesis
- E. Locomotion

(ii) Vasoconstriction and vasodilatation occurs in mammalian skin in order to maintain:
- A. Constant body temperature by shivering
- B. Body temperature
- C. Constant body temperature by sweating
- D. Constant body temperature during cold and hot conditions
- E. Constant body temperature by urination.

(iii) A bean plant can be bear either terminal or axial flowers. When a terminal flowered plant (T) is pollinated with an axial flowered plant (t), The off springs produced were 200 terminal flowered and 210 axial flowered. Which of the following represents the genotype of the parents?
- A. TT x Tt
- B. Tt x Tt
- C. Tt x tt
- D. TT x tt
- E. tt x tt

(iv) A useful materials in the kidney are retained by:
- A. Filtration
- B. Osmosis
- C. Osmoregulation
- D. Selective reabsorption
- E. Diffusion

(v) Oxygen debt occurs when:
- A. Too much corbondioxide is present in the body
- B. The rate of respiration exceeds that of photosynthesis in green plants
- C. Alcohol is formed in the tissue
- D. There is insufficient oxygen in the muscle tissues during vigorous exercise
- E. Too much oxygen is present in the body

(vi) Spitting, coughing and sneezing into a tissue paper are considered as:
- A. Waste disposal method
- B. Good manners
- C. Environmental pollution
- D. Risk behaviour
- E. Personal hygiene

(vii) Are conditions or factors that can change or be changed in an experiment.
- A. Hypothesis
- B. Experiment
- C. Variables
- D. Problem
- E. Conclusion

Scanned by CamScanner

(viii) Which of the following is formed immediately after fertilization:

A. Placenta
B. Embryo
C. Foetus
D. Infant
E. Zygote

(ix) in which of the following tissues can rapid mitotic cell division be seen:

A. Nerves
B. Embryonic
C. Heart
D. Muscle
E. Epidermal

(x) An involuntary muscle that is capable of relaxing continuously and do not fatique easily is known as:

A. Cardiac muscle
B. Skeletal muscle
C. Biceps
D. Triceps
E. Smooth muscle

(ix) In which of the following tissues can rapid mitotic cell division be seen.

A. Nerves
B. Embryonic
C. Heart
D. Muscle
E. Epidermal

(x) In voluntary muscle that is capable o relaxing continuously and do not fatique easily is known as:

A. Cardiac muscle
B. Skeletal muscle
C. Biceps
D. Triceps
E. Smooth muscle

2. Match the responses in List B with the phases in List A by writing the letter of the correct response beside the item number of List A in your answer sheet.

SECTION B: *(60 marks)*

Answer all questions in this section.

3. (a) What is binomial nomenclature?
   (b) Give any four (4) rules followed in naming organisms scientifically.
   (c) List two (2) advantages of giving scientific names to an organisms.

4. (a) With two examples, give the meaning of abiotic and biotic factors of the environment.
   (b) Differentiate the terms ecology and ecosystem.
   (c) Give four (4) importances of natural environment.

5. (a) Mention three (3) ways in which mitosis is important to living things.
   (b) List down two (2) factors that influence growth in animals.
   (c) What do you understand by the following terms:
   (i) Complete metamorphosis (ii) Incomplete metamorphosis (iii) Ecdysis

6. (a) Define the term neurone
   (b) With the aid of a well labeled diagram, give the function of the motor neurone.
   (c) Give the three (3) differences between nervous system and endocrine system.

7. (a) Briefly explain the following theories of the origin of life:
   (i) Special creation (ii) Spontenous generation
   (b) How the following evidences supports organic evolution.
   (i) Comperative embryology (ii) Comperative anatomy.

8. (a) State Mendel's first law.
   (b) Explain the meaning of the following:
   (i) Sex – limited character
   (ii) Sex – linked character
   (iii) Sex – determination
   (c) A married couple has four girls children but no boys. Does this mean that the husband produces X – chromosomes only?

9. (a) State two (2) functions of blood plasma
   (b) List down two (2) factors that increase blood pressure.
   (c) Why is a person with blood group AB is not always considered as a universal recipient?

10. (a) Name the organ through which substances are passed from the mother to the foetus.
    (b) Mention four (4) substances which are passed from the mother to the foetus in an organ named in (a) above.
    (c) State three (3) factors that may hinder fertilization in human being.

SECITON C: *(20 marks)*

Answer only ONE (1) question from this section.

11. Discuss the economic importance of bacteria (at least eight (8) points).

12. Write an essay on pollution in plants under the following guidelines:
    (a) Meaning of pollination
    (b) Types of pollination
    (c) Agents of pollination
    (d) Characteristics of mind and insect pollinated flowers.
    (e) Importances of pollination.

13. Explain five factors which contribute to irresponsible sexual behaviour among young people and their effects in the community.

2. Jibu maswali yote toka sehemu A, B, na D. Swali moja toka sehemu C, na maswali matatu toka sehemu E.
3. Swali la kumi na tano (15) ni la lazima.
4. Simu na mawasiliano aina yoyote hayaruhusiwi.
5. Andika namba yako ya mtihani kila ukurasa.

Scanned by CamScanner

SEHEMU A:
UFAHAMU NA UFUPISHO *(Alama 10)*

Jibu maswali yote katika sehemu hii.

1. Soma kwa makini kifungu cha habari kifuatacho kisha jibu maswali yanayofuata:

Elimu iliyotolewa kwa vijana wa kiafrika enzi za Ukoloni haikuwa na utaratibu maalumu kwa ufupi haikuwasaidia wala kusadifu vijana kuelewa walichopaswa kama wazazi wa vizazi vijavyo mbali ya hapo nafasi ya wanawake kila wakati haikuwa muhimu katika maendeleo katika zama hizo wanaume ndio walithaminiwa kama nguzo muhimu ya maendeleo suala hili liliwafanya wanawake waonekane duni watu wasiojitegemea kimaamuzi kitu kiliwafanya wafuate maelekezo na matakwa ya wanaume zao kwa ujumla.

Mfumo dume ulifanya wanawake kuwa vigumu kufanya jambo lolote aidha kwa kutaka mabadiliko ya aina fulani ya maendeleo katika ngazi ya familia au jamii inayohusika pasipo kupata maelekezo kutoka kwa wanaume ambao walijichukulia nafasi ya waelekezaji wa mwisho katika maamuzi yanayohusu jamii. Kasumba hii inaendelea mpaka leo hii japo kidogo imelegezwa angalau wanawake kwa sasa wachache wanaweza kuhusishwa katika utoaji wa maamuzi katika familia na jamii kwa ujumla.

Kipindi cha Ukoloni mila na desturi nyingi zilitengwa kwenye maumbile wanawake walikuwa wakibaguliwa katika mambo mengi na kuwanyima fursa nyingi ambazo zingeweza kuwaweka katika hali nzuri kiafya na pia kuwapa uwezo mkubwa zaidi katika jukumu la malezi na uzalishaji wa mazao lililokuwa linawakabili. Ubaguzi huo uliongeza misuguano ya kimasilahi baina ya wanawake na ambapo wanaume wanaonekana ndio wanafanya kazi thabiti ilihali wanawake walibakizwa kuwa mama wa nyumbani huku wakiwa chini ya maamuzi ya wanaume.

Baada ya nchi nyingi za Kiafrika kupata uhuru zimefanya jitihada kubwa za kurekibisha suala hili kwa kuweka misingi ya usawa kati ya wanawake na wanaume hasa katika nafasi ya elimu ya juu zimetengwa kwa ajili ya wanawake. Idadi ya wanawake imeongezeka katika nafasi mbalimbali hasa katika sera za ajira sasa zinatoa nafasi kwa wanawake kufanya kazi za ubingwa ambapo hapo awali wanaume ndio walizifanya.

Lakini pamoja na juhudi hizo zinazofanywa na serikali za Afrika ukombozi wa wanawake bado kuna ugumu katika sera za ajira mfano viwandani wanawake hulipwa mishahara kidogo hawaongezwi ujuzi wa kusomeshwa na si rahisi kwao kupandishwa vyeo jambo ambalo bado linaonekana ni tatizo katika kumkwamua mwanamke hivyo ni vyema serikali na taasisi binafsi kurekebisha hilo na wanawake kupewa stahiki sawa na wanaume hasa kwenye suala la elimu.

Maswali:

(a) Andika kichwa cha habari hii kisichozidi maneno matano.
(b) Unafikiri katika habari hii mwandishi anawalaumu akina nani?
(c) Kwa nini wanaume walionekana wanafanya kazi thabiti kuliko wanawake?
(d) Ni mabadiliko gani yanafanywa ili kupunguza ugandamizaji wa wanawake?
(e) Eleza maana ya maneno yafuatayo kama yalivyotumika kwenye habari.
  (i) Zama
  (ii) Mfumo dume
  (iii) Fursa
  (iv) Jitihada

2. Fupisha habari uliyosoma katika swali la kwanza kwa maneno yasiozidi mia moja (100)

Scanned by CamScanner

SEHEMU B:
SARUFI NA UTUMIZI WA LUGHA *(Alama 25)*

Jibu maswali yote sehemu hii.

3. Onesha kazi za mofimu zilizopigiwa mstari.
   (i) Akichelewa
   (ii) Wamelia
   (iii) Walichekana
   (iv) Aliolewa
   (v) Zilijengeka

4. Kwa kutumia mifano mbalimbali tunga tungo kuonesha maumbo mbalimbali ya kitenzi kishirikishi. Andika maumbo matano (05) tofuati.

5. Toa maana ya istilahi zifuatazo kwa mifano:
   (a) Kirai
   (b) Sarufi
   (c) Tungo
   (d) Njeo
   (e) Kiambishi

6. Kwa kutumia ngeli za upatanishi wa kisarufi zilizotajwa hapa chini tunga tungo mbili kwa kila ngeli Kwa kutumia - O – rejeshi ya umoja na wingi.
   (a) Ngeli ya pili
   (b) Ngeli ya nne
   (c) Ngeli ya saba
   (d) Ngeli ya nane
   (e) Ngeli ya tano

7. Bainisha maana tano (05) za neno pasi na kwa kila maana tunga tungo moja.

SEHEMU C:
UANDISHI *(Alama 10)*

Jibu swali moja toka sehemu hii.

8. Soma barua ifuatayo kisha tumia taarifa utakazozipata kwenye barua hii kuandika simu yenye maneno kumi (10) tu.

Kijiji cha Ujamaa Tumaini,
S.L.P. 144,
MOYONI.

15.07.2018

Mpendwa Imani John,

Salaam nyingi sana zikufikie hapo Kilindi. Nimefurahi sana kunialika ili nije kwenye sherehe ya kuolewa binti yako Furaha Imani. Hata hivyo nasikitika sana sana kukuarifu kuwa sitaweza kufika kwenye sherehe hiyo kwa sababu siku hiyo ya tarehe 20.07.2018 nitasafiri kwenda kusadikika kwa majukumu ya kiofisi. Pia nimefurahi kujua sanduku lako la posta kuwa ni S.L.P. 733 Njombe. Niwie radhi kwa tukio hilo.

Wako

Fikiri Mawazo.

Scanned by CamScanner

9. Andika Insha yenye maneno miambili hamsini (250), inayohusu "Haki za Watoto".

SEHEMU D:
MAENDELEO YA LUGHA YA KISWAHILI *(Alama 10)*

10. Ni mambo gani yaliyochangia kukua na kuenea lugha ya Kiswahili baada ya uhuru wa Tanzania? Taja na elezea kwa kifupi mambo matano.

SEHEMU E:
FASIHI KWA UJUMLA *(Alama 45)*

Jibu maswali matatu (03) tu sehemu hii. Swali la 15 ni la lazima.

11. Ili hadithi ya fasihi simulizi iweze kukamilika ni lazima pawepo mambo muhimu manne (04). Fafanua mambo hayo.

12. "Kila mtunzi wa kazi ya fasihi huandika kazi yake kuonesha upotovu mwingi ambao huiweka jamii katika njia isiyo sahihi" Dhihirisha kauli hiyo kwa kutumia vitabu viwili vya ushairi vilivyoorodheshwa mwishoni.

13. Elezea mchango hasi wa wahusika wawili wa riwaya ulizosoma ziizoorodheshwa mwishoni.
(a) Makwati (b) Brown Kwacha (c) Lomolomo

14. Muundo ni kipengele muhimu sana katika uumbaji wa kazi ya fasihi. Thibitisha kwa mifano jinsi kipengele hicho kilivyotumiwa na waandishi wawili wa Tamthilia uizosoma ziizoorodheshwa mwishoni.

15. Tunga tenzi yenye beti tano kuhusu ajali za barabarani.

Orodha ya Vitabu:

Ushairi:

Malenga Wapya	-	Takiluki (Dup)
Mashairi ya Chekacheka	-	T.A. Mvungi (ED & DLTD)
Wasakatonge	-	M. S. Khatibu (Dup)

Riwaya:

Joka la Mdimu	-	A. J. Safari (H.P)
Takadini	-	Ben. J. Hanson (MBS)
Watoto wa mama Ntilie	-	E. Mbogo (H.P)

Tamthiliya:

Kilio chetu	-	Medical Aid Foundation (TPH)
Ngoswe Penzi kitovu cha uzembe	-	E. Semzaba (ESC)
Orodha	-	Steve Raynolds (MA)

MWANZA REGION FORM FOUR MOCK EXAMINATION AUGUST 2018

BASIC MATHEMATICS

041

Time: 3:00 Hours **Tuesday, 21st August 2018 a.m.**

INSTRUCTIONS:

1. This paper consists of sections **A** and **B**.
2. Answer **All** questions in section **A** and any **Four** questions from section **B.**
3. All necessary working and answers for each question done must be shown clearly.
4. Mathematical table may be used.
5. Calculators and mobile phones are strictly prohibited in the examination room.
6. Remember to write your Index (Examination) number on every page of your answer booklet (sheets) provided.

Scanned by CamScanner

SECTION A: (60 MARKS)

1. (a) A boy walked 120 paces while a girl used 100 paces from the same place to the market. If they started at the same time and used the same speed, how many times did they step together?

   (b) Express 1.8666.....as an improper fraction in its simple form.

2. (a) Use mathematical tables to evaluate the expression:

   $$\frac{4.762 \times 0.007853}{0.0129}$$ Correct to:-

   i. 2 decimal places ii. 3 significant figures.

   (b) Rationalize the dimominator of: $\frac{2\sqrt{3} - 3\sqrt{2}}{3\sqrt{2} + 3\sqrt{3}}$

3. (a) A football match lasts 90 minutes with a break of 10 minutes at half time. If a refree allows five minutes extra for injuries and stoppages, what time does a match end if it starts at 4:30 pm?

   (b) In a class of 100 students. 41 take History, 29 take Geography, 28 take Literature, 15 take History and Geography, 8 take Geography and Literature, 19 take History and Literature and 5 take all the three subjects. Using a venn-diagram, find the number of students taking: i. at least two subjects. ii. Only one subject.

4. (a) Find the distance between the point (-3, -2) and the mid-point of (2, 13) and (4, 7). Write your answer in the form of $a\sqrt{c}$ where a and c are real numbers.

   (b) Given vectors $a = 6i + 12j$ and $b = 17i + 18j$

   i. Find the vector $c = 2a - b$ and its magnitude correct to 3 significant figures.

   ii. Find a unit vector in the direction of the vector c in (b) (i) above.

5. (a) Two triangles are similar. The ratio of their heights is $^5/_3$. If the area of the smaller triangle is 36 cm^2. What is the area of the larger triangle?

   (b) The sum of second and third terms of geometric progression is 12 and the sum of third term and fourth term of geometric progression is 60. Find the common ratio.

6. (a) Mkwizu uses ⅜ of his salary for food, $^6/_{25}$ for bills and the rest proportion for other expenditures. If his monthly salary is 15,200/=. Find the ratio for the other expenditures and the amount he usually spends on bills.

   (b) If y varies inversely as the cube root of x and y = 3 when x = 64. Find:

   i. the formula relating the variables x and y.

   ii. x then $y = {}^{15}/_4$.

Scanned by CamScanner

7. (a) Plot the solution set of the inequality $|2x+5| \leq ||$ on a number line.

(b) Onyango makes 30% loss by selling an article for Tshs. 35,000/=. What would be the percentage profit if it is sold at Tshs. 64,000/=?

8. (a) The nth term of an arithmetic progression:

$2.3 + 4.2 + 6.1 + \ldots\ldots\ldots\ldots\ldots\ldots$ is 36.5.

Find the number of terms 'n' contained in the progression.

(b) Given that $f(x) = \sqrt{2x} + 1$, find:-

i. $f^{-1}(x)$ ii. Domain and range of $f^{-1}(x)$.

9. (a) A ship sails from point A (O°N, 20°W) to point B(10°N, 20°W) at knots. If it leaves point A at 8.00 am on Tuesday, when will it reach B?

(b) A student stands a distance of 10 metres from the foot of a tall tree. He measures the angle of elevation of the top of the tall tree and finds it is 55°. If his height is 1.75 metres, determine the height of the tree.

10. (a) If $t^{3n} = 6$, find the value of $3t^{6n} - 12$.

(b) Find two consecutive even numbers such that the sum of their squares is 244.

SECTION B: (40 MARKS)

11: A company makes two types of furniture, chairs and tables. The contribution of each product is Tshs. 1500 per chair and 2500 per table. Both products are processed by three machines M_1 M_2 and M3. The time required in hours per week on each machine is as follows:-

Machines	Chairs	Tables	Available time
M1	3	3	36
M2	5	2	50
M3	2	6	60

i. How should the company schedule its products in order to maximize contributions?
ii. Find the maximum contribution.

12. The height of some plants grown in a laboratory were recorded after 5 weeks. The results are shown in the table below:

Height (cm)	11 - 15	16 - 20	21 - 25	26 - 30	31 - 35	36 - 40
Frequency	4	8	20	21	12	3

(a) Calculate the mean and modal height of plants.
(b) Draw a cumulative frequency curve for the data.
(c) Estimate the median from the graph.

Scanned by CamScanner

13. The following trial balance was extracted from the books of Victory Group on 31st December, 2006.
You are required to prepare:-
i. Trading account and
ii. Profit and loss account for the year ended on 31st Dec. 2006 in a combined form.

Trial balance of Victory group as at 31.12.2006.

S/No.	Name of Account	Dr	Cr.
1	Capital		8.300
2	Purchases	12,000	
3.	Sales		17,500
4.	Return in wards	550	
5.	Return outwards		640
6.	Plant and Machine	2,400	
7.	Furniture and fittings	750	
8.	Sundry debtors	1,370	
9.	Sundry Creditors		860
10.	Wages	2,280	
11.	Bad debts	360	
12.	Discount received		270
13.	Opening stock	5,000	
14.	Insurance	160	
15.	Commission receivable		430
16.	Trade expenses	220	
17.	Cash in hand	170	
18.	Cash at bank	2,740	
	Total	28,000	28,000

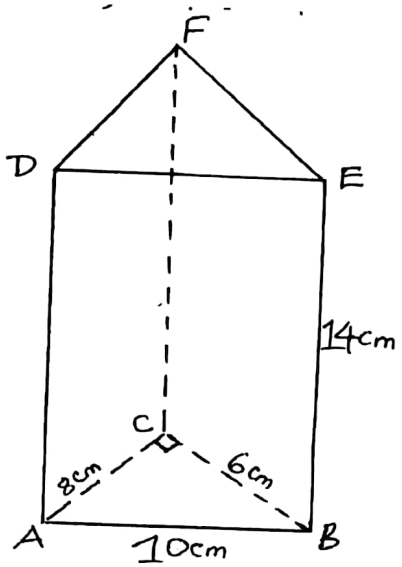

Note: Closing stock was valved at Tshs. 6,300

14. A bag contains 6 red balls and 8 blue balls. If one ball is drawn from the bag and then replaced before drawing the second ball, using a probability tree, find the probability of drawing:
(a) Two red balls
(b) Two blue balls
(c) Balls of different colours
(d) Balls of the same colour

15. (a) Find the distance in kilometers between Morogoro (7°S, 38°E) and Dar es Salaam (7°S, 39°E)
(take $\pi = 3.14$, R = 6400 kilometres).

Scanned by CamScanner

(b) In the figure below AB = 10cm, BC – 6cm, AC = 8 cm and BE – 14 cm as shown:

Find: i. The total surface area.
ii. The angle AF makes with the plane ABC

16. (a) U and V are two vectors such that T [U] = (3, 4) and T [V] = (9, -11). Find
i. T [3V] ii. T [2U + 5V] iii. T [U – V]

(b) Find the image of a point A(-3, 4) under a reflection in the line x + y = 0 followed by another reflection in the line x – y = 0.

(c) Solve the equations 6x + 5y – 3 = 0 and 7x + 8y – 10 = 0 by using Cramer's rule/method.

(d) Given that $A = \begin{pmatrix} -1 & 2 \\ 3 & 4 \end{pmatrix}$, show that $AA^{-1} = A^{-1}A = I$. Where I is an identity matrix.

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENTS

MWANZA REGION FORM FOUR MOCK EXAMINATION- 2018

PHYSICS 1

031/1

Time: 3 Hours. **Wednesday, 29 August 2018 a.m.**

INSTRUCTIONS:

1. This paper consists of section A, B and C.
2. Answer ALL questions in section A and B, and one question from section C.
3. Cellular phones, calculators and unauthorized materials are not allowed in the examination room.
4. Write your examination number on every page of your answer sheet.
5. Use the following constants where necessary.
   - Acceleration due to gravity "g" = $10^{m}/s^{2}$
   - Density of water = $1g/cm^{3}$
   - Density of mercury = $13600\ ^{kg}/_{m^{3}}$
   - Specific heat capacity of water = $42000^{J}/_{kg^{\circ}C}$

Scanned by CamScanner

SECTION A: (30 marks)

Answer ALL questions from this section.

1. For each item (i) to (x) choose the correct answer from the given alternatives and write its letter besides the item number.

(i) At what temperature is the density of pure water maximum?
A. 100°C B. 4°C C. 32°C D. 0°C E. 40°C

(ii) Area under the graph in the velocity time-graph represents:
A. The acceleration with which the body takes off from rest
B. The deceleration with which the body is brought to rest
C. The total distance travelled by the body
D. The uniform velocity of the body
E. The average velocity of the body

(iii) During the cold season, we warm our bodies using radiant energy emitted by burning firewood. This energy is in the form of electromagnetic wave called:
A. Micro wave
B. X-ray wave
C. Visible light wave
D. Infra-red radiation
E. X-rays radiation

(iv) Two resistors of 3Ω and 6Ω are connected in parallel and the system is then connected in series to the battery of 3V. If the internal resistance of the battery is negligible, what is the current through the 6Ω resistor?
A. 1A B. 2A C. 1.5A D. 0.5A E. 0.3A

(v) A group of stars that form a definite shape or pattern when viewed from the earth is called:
A. Galaxy
B. Solar system
C. Constellation
D. Planet
E. Meteors

(vi) The intelligent guess that tries to explain as observation during a scientific investigation is known as:-
A. Testable hypothesis
B. Conclusion
C. Theory
D. measurement
E. Observation

(vii) The atoms in which their binding energy is not strong enough to hold the nucleus together are known as:-
A. Stable atoms
B. Unstable atoms
C. Nuclear atom
D. Isotopes

Scanned by CamScanner

E. Stable and unstable atoms

(viii) Racing car rarely set an accidents despite their speed because they:
A. Have greater momentum
B. Have big tyres with big treads
C. Have wide bases and low centre of gravity
D. Exert a greater friction force
E. have less mass

(ix) The purpose of adding impurities to the pure-semi-conductor is:
A. To make it poor conductor
B. To make it non-conducting material
C. To increase conductivity
D. To decrease conductivity
E. To make it dirty

(x) The average atmospheric pressure recorded at a certain air port is 758 mmHg. In term of S.I unit this pressure is equal to:
A. 1.0 atmosphere
B. 105 Pascal's
C. 103,088 N/m^2
D. 100,000 N/m^2
E. 10,088 N/m^2

Match the items in List A with responses in List B by writing the letter of the most correct response beside the item number in the answer sheet provided.

LIST A	LIST B
(i) Compound microscope	A. Caused by the total internal reflection of light rays.
(ii) Mirage	B. Due to the diffraction of light in cold day.
(iii) Sonometer	C. Sound waves.
(iv) Longitudinal waves	D. Water molecules vibrations.
(v) Convection	E. Occurs in solids and liquids.
(vi) Regelation	F. Occurs in both liquids and gases.
(vii) 1 Kwh	G. Echo.
(viii) Intrinsic semiconductor	H. Frequency of stretched string.
(ix) Translucent material	I. Resonance
(x) Combination of multiple echoes.	J. Two concave lenses.
	K. Two convex lenses.
	L. Reverberation of sound waves.
	M. Occurs in substances that have ability to expand on freeing.
	N. It needs doping.
	O. Does not need doping.
	P. Does not allow light to pass.
	Q. Allow partial light to pass.
	R. 3600J
	S. 3600 KJ.

Scanned by CamScanner

3. **Fill the blank space** by writing the correct answer on the answer sheet provided.

(i) The property of the body to return to its original shape and size after a deforming force is removed is called.....

(ii) If the acceleration of an object is zero, its velocity must be .....

(iii) The influence of a vector in a given direction is known as.....

(iv) .....is a resistor used to convert moving coil galvanometer into an ammeter.

(v) The process by which the emission of radiation by the atmosphere warms the earth's surface is called.....

(vi) The process of a liquid to form a layer which supports pond skater to walk on it is called .....

(vii) ..... Protects buildings and other structures against lightning strikes.

(viii) The quality of sound refers to as .....

(ix) A polythene and ebonite rods when rubbed with .....produce a negative charge.

(x) An instrument used to measure the ground movement caused by earthquakes is called.....

SECTION B: (60 marks)

Answer ALL questions in this section.

4. (a) Briefly explain each of the following terms:
   (i) Sinking
   (ii) Floating
   (iii) Buoyant force

   (b) State any three applications of relative density in our daily life.

   (c) A piece of iron of mass 156g and density 7.8g/m^3 floats on mercury of density 13.6g/cm^3. What is the minimum force required to submerge it?

5. (a) (i) What is a cell?
   (ii) Name two defects of a simple cell.
   (iii) Explain briefly how those defects can be minimized?

   (b) What is the cost of using electrical iron rated 240V, 2000 Watt for 10 hours, if the electrical energy costs 100 per unit (1 unit = 1 kwh).

   (c) Explain the working of a fuse in an electrical appliance.

Scanned by CamScanner

6.(a) (i) Explain how each of the three characteristics of a force i.e magnitude, direction and point of application plays a role in determining an objects state of equilibrium.

(ii) A uniform wooden plank with a mass of 75kg and length of 5m is placed on top of a brick wall so that 1.5m of plank extends beyond the edge hanging freely in air. How far beyond the edge of the wall can a 100kg woman walk before the plank began to rotate about the edge of the wall.

(b) State two reasons which causes the efficiency of a pulley system to be less than 100%.

7.(a) (i) Give three difference between intrinsic and extrinsic semi-conductors.

(ii) What is N-type semiconductors?

(b) (i) Define the term transducer.

(ii) Name three uses of a transistor.

8.(a) (i) What is an echo?

(ii) Name four (4) behaviors of waves.

(b) (i) Explain briefly why sound produced in a hall of many people is heard more clearly than when the hall has few people?

(ii) Distinguish between mechanical waves and electromagnetic waves.

(c) The frequency obtained from a plucked string is 400Hz when the tension is 2N. calculate:
(i) Frequency when the tension is increased to 8N.

(ii) The tension which needed to produce a note of frequency 600Hz.

9.(a) Give the meaning of the following terms:
(i) Volcanoes

(ii) Earthquakes

(b) Outline three effects of volcanoes and three effects of earthquakes.

SECTION C: (10 marks)

Answer only **ONE** question in this section.

10. (a) (i) State the laws of electromagnetic induction.

(ii) Distinguish between magnetic and non-magnetic materials.

(iii) What is a magnetic relay?

Scanned by CamScanner

(b) (i) What is efficiency of a transformer?

(ii) A 240V main transformer has 1000 turns in primary coil and N turns in secondary coil, it is used to supply energy to 12V, 24W lamp. How much turns are there in secondary coil?

11. (a) Define the term (i) Half life (ii) Activity of a radioactive atom.

(b) (i) Name three fundamental particles of which atoms of an element are composed.

(ii) State two applications of neutron activation as applied in artificial radioactivity.

(c) List three conditions which make the cathode ray tube work best.

MWANZA REGION MOCK EXAMINATION FORM FOUR – AUGUST 2018

CHEMSTRY 1

032/1

TIME: 3:00 HOURS. **Friday, 24 August 2018 a.m.**

INSTRUCTIONS:

1. This paper consists of section A, B and C.
2. Answer all questions in this paper
3. Cellular phones and calculators are not allowed in examination room.
4. Write your examination number on every page of your answer sheet.
5. The following constants may be used:

Atomic masses
H = 1, C = 12 O = 16 5 = 32, N = 14, cl = 35.5

Avogadro's number = 6.02×10^{23}

G. M. V at STP = 22.4 dm^3

1 faraday = 96500 coulombs

Standard pressure 760 mm Hg

Standard temperature 273

1 litre = dm3 = 1000 cm^3

Scanned by CamScanner

SECTION A: (20 marks)

Answer ALL questions.

1. For each of the item (i) – (x) choose the correct answer from the given alternatives and write its letter beside the item number in the answer sheet(s) provided.

(i) An element whose electronic configuration is 2:8 is likely to be found in:
- A. Group II and period 3 of the periodic table
- B. Group III and period 2 of the periodic table
- C. Group III and period 3 of the periodic table
- D. Group O and period 1 of the periodic table
- E. Group VIII and period 2 of the periodic table

(ii) The equation below shows the industrial preparation of ethane from a higher alkane
$C_{13}H_{28(s)} \xrightarrow[70\ atm]{750^oC} C_2H_{4(g)} + C_3H_{6(g)} + C_8H_{18(L)}$ This process is called:
- A. Gracking
- B. Double decomposition
- C. Sublimation
- D. Chain reaction
- E. Distillation

(iii) Insoluble salts like Barium sulphate can be prepared in the laboratory by:
- A. Neutralization of alkalis by acids
- B. Evaporation of solutions followed by crystallization
- C. Precipitation reaction
- D. Synthesis reaction
- E. Sublimation process

(iv) The oxidation state of Nitrogen in ammonium (NH4+) is:
A. $^+3$ B. $^+4$ C. $^-3$ D. $^+4$ E. $^+5$

(v) Which of the following contain least number of molecules.
A. 88g of Co_2 B. 64g of O_2
C. 28g of N_2 D. 10g of H_z E. 128g of SO_2

(vi) The percentage by mass of water of crystallization in oxalic acid ($C_2H_2O_4$, $2H_2O$) is:
A. 28.5% B. 14.29% C. 30.16% D. 18% E. 70%

(vii) Which of the following substances represent a group of neutral oxides.
- A. H_2O, CO_2 and SO_2
- B. $A2_2O_2$, ZnO and H_2O
- C. HO_2, CO and NO
- D. N_2O, NO_2 and CO
- E. CaO, MgO and FeO

(viii) Frasch process for extraction of sulphur involves the following:
- A. Molten sulphur, hot compressed air and superheated water.
- B. Superheated water, hot compressed air
- C. Rhombic sulphur, monoclinic sulphur
- D. Molten sulphur, superheated water
- E. Hot compressed air and rhombic sulphur

Scanned by CamScanner

(ix) The dispersed phase of one or more liquid(s) in another liquid is:
A. Solute
B. Suspension
C. Precipitation
D. Solution
E. Emulsion

(x) The third step in scientific procedures is:
A. Conclusion
B. Hypothesis
C. Experimentation
D. Data collection
E. Observation

2. Match the item in List A with the response in List B by writing the letter of the correct response beside the item number in the answer sheet provided.

LIST A	LIST B
(i) A reddish brown gas	A. CO_2
(ii) An alkali gas	B. H_2
(iii) Second lightest gas	C. C_2H_2
(iv) Bleaches most litmus paper	D. N_2
(v) Has highest percentage by volume in air	E. Br_2
(vi) Has a rotten egg smell	F. H_2S
(vii) Oxidation of NH_3 to NO in the presence of platinum catalyst.	G. C
(viii) Turn yellow potassium dichromate green	H. O_2
(ix) The lightest gas	I. Cl2
(x) A laughing gas	J. Ne
	K. NO_2
	L. CO
	M. He
	N. CH_4
	O. Ar
	P. N_2O
	Q. Hcl
	R. NH_3
	S. C_2H2
	T. SO_2

SECTION C: (54 marks)

Answer ALL questions in this section.

3. (a) (i) What is the energy value of a fuel.
(ii) List four factors that determine the choice of a good fuels

(b) Write and complete the following equations in ionic form.
(i) $Na_2^{+}CO_{3(aq)}^{-} + Ca^{+}(HCO_3)_{2(aq)}^{-} \longrightarrow$

(ii) $Mgcl_2^{-}(aq) + AgNo_{3(aq)} \longrightarrow$

4. (a) Define the following terms.
(i) Homologous series
(ii) Hydrocarbon

Scanned by CamScanner

(b) Write the open structure formula of the following compounds.
(i) 2 – chlorobutane
(ii) 4 – methylhexan – 3 – ol

(c) The following are some organic compound.

(i) $CH_3\underset{\underset{C_3H_7}{|}}{CH}CH_2CH_2Ch_2C\overset{O}{\underset{OH}{=}}$

(ii) $CH_3\underset{\underset{C_2H_5}{|}}{CH} - CH = CHCH3$

Name each of the compound and indicate the functional group in each.

5. (a) State three applications of reactivity series.

(b) (i) Why is nitric acid kept in dark bottle?
(ii) State the effect of nitrogen dioxide in the environment.

(c) Study the periodic table below and answer the questions that follow:-

T	II	III	IV	V	VI	VII	VIII
		Q				T	
U					X	E	
Y							

Which element form:
(i) Divalent anion
(ii) Monovalent cations
(iii) Most electrovalent anion
(iv) State one common physical properties which element U and Y have.

6. (a) In a titration reaction 30 cm^3 of a solution of a dibasic acid (d H2 Q) completely neutralized by 25 cm^3 of 0.12M sodium hydroxide solution contained 3.15g of the acid in 500 cm^3 of the solution. Calculate.
(i) The Morality of the acid
(ii) The relative molecular mass of Q in the acid.

(b) Industrial sulphuric acid is usually labeled as containing 98% of the acid and having the desity of 1.84g/ cm^3. Calcuate:
(i) Molarity of this industrial sulphuric acid.
(ii) Volume of this industrial sulphuric acid that is required to prepare 2dm^3 fo 0.5M H_2/SO_4.

7. (a) The preparation of ammonia in the laboratory is done by heating a mixture of ammonium chloride and calcium hydroxide.
(i) Write a balanced chemical equation for the reaction.
(ii) Why concentrated sulphuric acid is not suitable to dry ammonia gas? Suggest a suitable drying agent.

(b) Write two chemical equations to show how ammonia gas is used as a reducing agent?

Scanned by CamScanner

8. (a) Why aluminium is extracted by electrolysis method?

(b) Write equations to show how slag is formed during extraction of the following:
(i) Iron
(ii) Aluminium

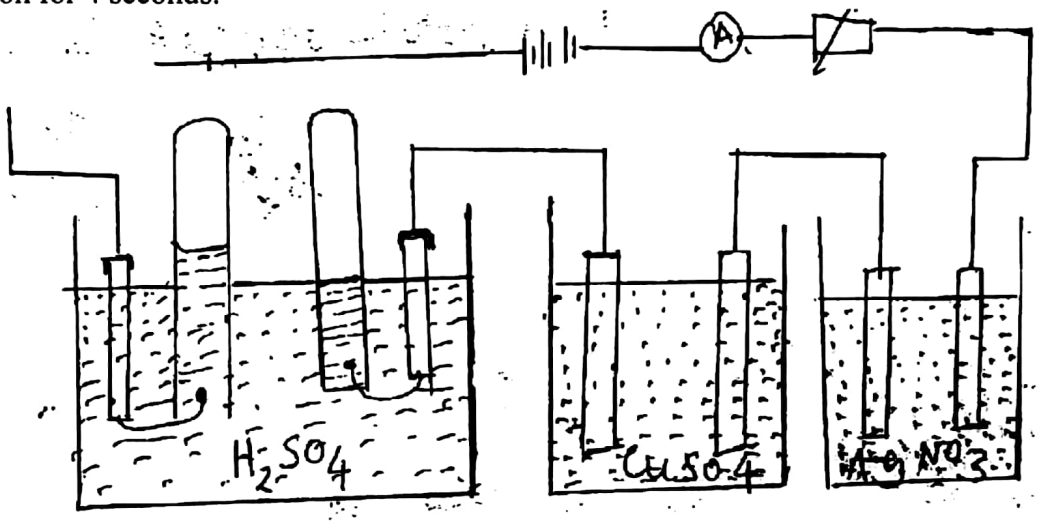

(c) Mention two uses of aluminium.

9. (a) (i) What is a fertile soil
(ii) State four factors affecting soil fertility.

(b) List three differences between manure and fertilizer.

10. Explain four pollution effects of the industrial production of metals on the environment.

11. Figure below represents an experiment which Faraday's second law was illustrated by connecting in series three cells containing water to which very little amount of dilute H_2SO_4 acid and copper (II) sulphate solution and silver nitrate solution had been added. A current of 0.5 A was passed through the solution for 4 seconds.

The Volume and weight of hydrogen and oxygen liberated were calculated. The weight of copper and silver formed by electrolysis of copper (II) sulphate and silver nitrate were also measured.

The results of the experiment were tabulated as show below:-

	ELEMENT	CURRENT (A)	TIME (S)	MASS OF ELEMENT DEPOSITED	QUANTITY OF ELECTRIDTY	ELECTRO CHEMICAL EQUIVALLENT
1.	Hydrogen	0.5	4	2.0892×10^{-5}		
2.	Oxygen	0.5	4	1.658×10^{-4}		
3.	Copper	0.5	4	6.58×10^{-4}		
4.	Silver	0.5	4	2.236×10^{-3}		

(a) Complete the table above by calculating the quantity of electricity and electrochemical equivalent.

(b) If the faraday constant is 96500C calculate the chemical equivalent of:
(i) Hydrogen (ii) Oxygen (iii) Copper (iv) Silver.

Scanned by CamScanner

SECTION C: (26 marks)

Answer ALL questions.

12. (a) Consider the reaction below:

$$CH_4(g) + H_2O(g) \rightleftharpoons CO(g) + 3H_2(g)$$

What will be the effect in equilibrium reaction if:

(i) Catalyst is added

(ii) Inert gas is added

(iii) Pressure is increased.

(b) Describe how an impure copper can be purified by electrolysis.

13. Briefly explain six (6) reasons on how neutralization reaction is important in our daily life.

MWANZA REGION MOCK EXAMINATION
FORM FOUR – 2018

GEOGRAPHY

013

Time: 3 Hours. **Monday, 20 August 2018 p.m.**

INSTRUCTIONS:

1. This paper consists of section A, B, C and D.
2. Answer all questions in sections A, B and C and one (1) question from each part of section D.
3. Map extract of Hanang (Sheet 84/4) is provided.
4. Write your Examination number on every page of your answer sheet (s) or booklet(s).

Scanned by CamScanner

SECTION A: *(25 marks)*
PHYSICAL AND MATHEMATICAL GEOGRAPHY

Answer all questions in this section.

1. For each of the item i – x, choose the correct answer from among the given alternatives and write its letter beside the item number.

(i) .....is the spinning of a body on its axis
A. Revolution B. Rotation C. Season D. Eclipse E. Aphelion

(ii) If the temperature of Kilindi 500M is 20°C. What will be the temperature of Karatu 1500M above the sea level.
A. 20.6°C B. 14°C C. 06°C D. 26°C E. 09°C

(iii) The drainage pattern in which all streams flow, converging at the centre in a basin is called.
A. Radial drainage pattern
B. Dendritic drainage pattern
C. Trellis drainage pattern
D. Centripetal drainage pattern
E. Parallel drainage pattern.

(iv) The size of individual soil particles is known as.....
A. Soil pH
B. Soil catena
C. Soil texture
D. Soil structure
E. Soil porocity

(v) The continent crossed by all three major latitude is .....
A. Asia B. North America C. South America D. Africa E. Europe

(vi) The process in which soil nutrients are washed down ward in solution from horizon A to horizon B is known as.....
A. Mulching
B. Humification
C. Iluviation
D. Cation exchange
E. Leaching

(vii) What is the compass bearing of S.E direction?
A. 90° B. 225° C. 135° D. 202.5 E. 270

(viii) The excessive strong wind blowing across an extensive ocean surface is called:
A. Tsunami B. Storm surge C. Ocean currents D. Wind E. Hurricane

(ix) It occurs when the earth passes between the sun and the moon.
A. Solar energy
B. Solar eclipse
C. Solar system
D. Lunar eclipse
E. Penumbra

Scanned by CamScanner

(x) The lisosphere is separated from the mantle by the zone of discontinuity known as.....
A. Mohorovicic discontinuity
B. Guternburg discontinuity
C. Connd discontinuity
D. Mesopause
E. Exosphere.

2. Match the item in List A with the responses in List B by writing the letter of the correct response besides the item number in the answer booklet provided.

LIST A	LIST B
(i) Peeling off the outer leyer of the rock like onion (ii) The roots of plants and barrowing animals which cause breaking of rock in to small particles. (iii) Disintegration or decomposition of rocks exposed to the earth's surface. (iv) Breaking and wearing away of rock particles. (v) A very hard rock which have been left after exfoliation.	A. Exfoliation dome B. Transportation C. Biological weathering D. Mass wasting E. Exfoliation F. Oxidation G. Weathering H. Physical weathering I. Erosion J. Rock pedestal

3. (a) What is mass wasting
(b) Explain four (4) factors which influence the rate and nature of mass wasting.

SECTION B: *(27 marks)*
APPLICATION OF STATISTICS, INTRODUCTION TO RESEARCH AND ELEMENTARY SURVEYING

Answer all question in this section.

4. Carefully study the hypothetical data presented below showing the export of crop from Tanzania in (000 tonnes) from 2000 to 2002.

YEAR	COTTON	SISAL	COFFEE
2000	40	35	30
2001	30	25	30
2002	10	15	25

(a) Present the data using a multiple bar graph
(b) Give two advantages and two disadvantages of the method used in "a" above.
(c) What are the other two (2) alternative methods that can be used to present the data in the table above.

5. (a) Define the term chain survey
(b) Mention three people who make the survey team
(c) State the uses of each of the following survey instruments
(i) Ranging pole (ii) Tape measure (iii) Pegs (iv) Note book and pencil

6. (a) Define the term "Research"
(b) Differentiate between probability and non probability sampling.
(c) Explain three (3) advantages and two (2) disadvantages of questionnaires.

Scanned by CamScanner

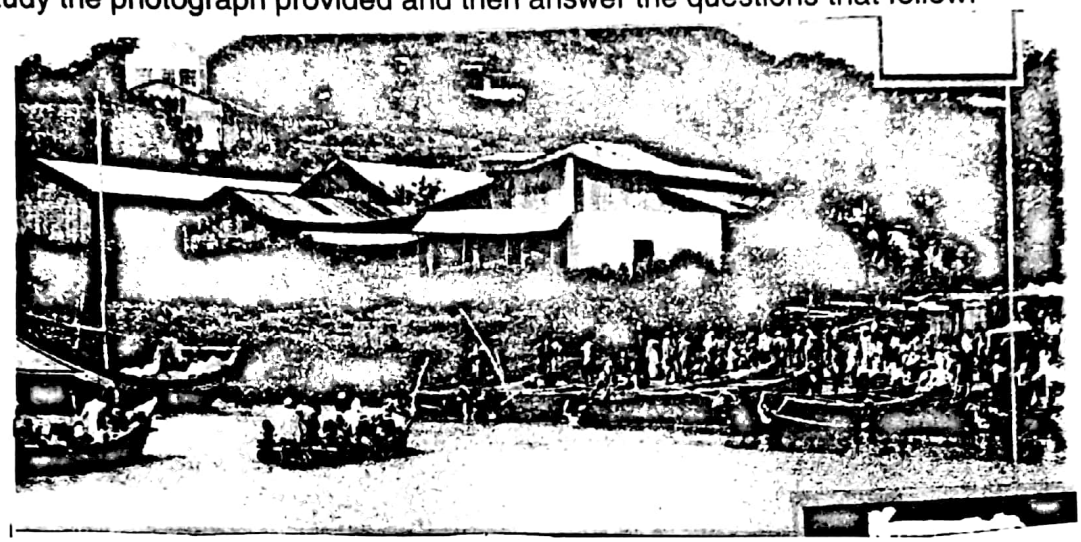

SECITON C: *(28 marks)*
MAP READING AND PHOTOGRAPH INTERPRETATION

Answer all questions in this section.

7. Carefully study the map extract of Hanag (sheet 84/40 provided and answer the questions that follow:

   (a) Identify four (4) socio-economic activities taking place in the mapped area.
   (b) Measure the distance of the road from grid reference 747298 to 680243 in km.
   (c) Express the given map scale as a statement scale.
   (d) Calculate the area of Lake Balangida in km^2.
   (e) With evidence identify four (4) methods that have been used to show relief features on the map.

8. Study the photograph provided and then answer the questions that follow:

   (a) Giving one strong evidence name the type of photograph.
   (b) With evidence the activity taking place in the photograph.
   (c) Mention two regions in Tanzania where the photograph might have been taken from.
   (d) List four problems facing the activity taking place in the photograph.

SECTION D: *(20 marks)*
PART 1: REGIONAL FOCAL STUDIES

Answer one (1) question from each part.

9. (a) What is manufacturing industry?
   (b) Explain six (6) factors influencing the location of industries in Tanzania.

10. Explain six factors that hinder development of agriculture in Tanzania.

PART II
ENVIRONMENTAL ISSUES, POPULATION AND SETTLEMENT

11. (a) Define the term "biodiversity".
    (b) What are the causes of loss of biodiversity.

12. "Human population whether of developed or developing countries share the same characteristic" Justify this statement by explaining these characteristics.

HISTORY

012

Time: 3:00 Hours. **Friday, 24th August 2018 p.m.**

INSTRUCTIONS:

1. This paper consists of section A, B and C.
2. Answer all questions in sections A, and B, and three (3) questions from section C.
3. Write your Examination number on every page of your booklet (s).
4. Cellular phones are not allowed in the examination room.
5. All drawings should be in pencil.

Scanned by CamScanner

SECTION A: (20 marks)

Answer all questions in this section.

1. For each of the following items (i) – (x), choose the correct answer among the given alternatives and write its letter beside the item number.

(i) Which of the following shows the stages of man's evolution in the correct order?
- A. Homo sapiens, Homo habilis, Homo erectus
- B. Homo habilis, Homo erectus, Homo sapiens
- C. Homo erectus, Homo sapiens, Homo habilis
- D. Homo habilis, Homo sapiens, Homo erectus
- E. Homo erectus, Homo habilis, Homo sapiens

(ii) The major commodities that were taken from Africa in the Trans-saharan trade were.....
- A. gold, ivory, salt and kolanuts
- B. silk, cloth, guns, swords and horses
- C. salt, swords, kolanuts and metal pans
- D. ivory, kolanuts, horses and metal pans
- E. silk, cloth, slaves, guns and horses

(iii) The combination of productive forces and relation of production is known as.....
- A. Means of production
- B. Mode of production
- C. labour forces
- D. Object of labour
- E. Production activities

(iv) The provision of colonial social services, such as health, education, water supply was not given first priority to Africans because:
- A. Social services were not profitable to the Europeans
- B. Presence of good social services in Africa was not necessary
- C. Africans had adequate social services
- D. Africans disliked this system
- E. Africans preferred most traditional things

(v) The British took over Tanganyika after 1918 because:
- A. It was the end first World war
- B. The Germans were not able to rule Tanganyika because Tanganyika was strong to them
- C. The British were asked by the league of Nations
- D. They wanted to merge Uganda, Kenya and Tanganyika as colonies
- E. They defeated the Germans

(vi) Which International organ failed to control the action of Hitler and Mussolin:
- A. League of Nations
- B. International Court of Justice
- C. Economic and social council
- D. United Nation's Organizations
- E. Security council

(vii) The following are functions of clan heads EXCEPT:
- A. Settling conflicts
- B. Supervised communal economic activities
- C. Protecting all communal wealth
- D. Arranging marriage in the line with the customs of the clan
- E. Ruling a number of villages

Scanned by CamScanner

(viii) The name given to the capital of Congo Kingdom by the Portuguese in the 14thC:
A. Mwata Yamvo
B. Mani Kongo
C. San Salvador
D. Alfonso
E. John I

(ix) The period which man was able to make chopping and pebble tools is known as:
A. Old Stone Age
B. Late Stone Age
C. Iron Age
D. Industrial Age
E. Middle Stone Age

(x) One of the main aims of today's Non-Alignment movement is to:-
A. Accelerate liberation of colonial societies
B. Balance the influence of the two super power
C. Propagate nuclear arms among its members
D. Promote economic development in the World's poor countries
E. Development of the poor African countries in economic issues only.

2. Match the items in List A with the correct responses in List B by writing the letter of the response beside the item number in your space provided.

LIST A	LIST B
(i) The founder of Ndebele Empire (ii) The founder of KANU (iii) Collaborated with the British in Uganda (iv) The historical and famous war between the Boers and the Xhosa in South Africa. (v) Associated with primitive accumulations (vi) The policy taken by U.S.A to revamp its economy to get out of the depression. (vii) Military organization to protect the Western block. (viii) The trade which was disturbed by the Portuguese invasion along the East Africa Coast in the 16thC and 17th C. (ix) Emphasized co operations between the colonized and colonizers. (x) One of the African countries which were not colonized.	A. Robert Mugabe B. Jomo Kenyatta C. Lobengula D. Shaka Zulu E. Mzilikazi F. Kabalega G. Sir Fredric Lugard H. Semei Kakunguru I. Assimilation policy J. Anglo – Zulu war K. Indirect Rule L. Mercantilism M. NATO N. War saw pact O. New deal policy P. Open door policy Q. Great Economic Depression R. Kaffir war S. The Indian Ocean trade T. Legitimate trade U. Ethiopia V. Sudan

LIST A	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
LIST B										

Scanned by CamScanner

SECTION B: (20 marks)

Answer all questions in this section.

3. (a) Draw a sketch map of Africa and locate the following:
   (i) The country in which the 1994 genocide took place
   (ii) The country that attained her last independence through constitutional means in 1957.
   (iii) The headquarters of African Union (AU)
   (iv) The well known African revolution country which led by Gamal Nasser in 1952.
   (v) The East African great slave market which was closed in 1873.

   (b) Outline five (5) objectives of colonial economy.

4. (a) Arrange the following statements in a chronological order by writing number 1 to 5 beside the item number.
   (i) Changes of education curriculum, Nationalization of schools, hospitals, churches, and plantations were some of the changes taken by independent Tanzania.
   (ii) After Tanganyika got her independence in 1961 it joined together with Zanzibar in 1964 and formed a new country of Tanzania.
   (iii) Many associations in Tanganyika joined together and formed T.A.A (Tanganyika African Associations).
   (iv) The late MWL. J.K. Nyerere faced a lot of challenges from colonial government such as transfer of TANU leaders and closure of its branches in Tanganyika under TANU political party.
   (v) In July 7 – 1975 TANU (Tanganyika African National Union) was formed under J. K. Nyerere.

   (b) The items (I – V) consist of four sentences which form a complete historical meaning. One of the sentences (A – E) is missing. Indentify the missing sentence and write its letter beside the item number.

   (i) 1. The Berlin Conference was called in November, 1884 by chancellor Bismarck of German.
   2. It was attended by all Europeans interested in acquiring colonies in Africa.
   3. The aim of the conference was to avoid war over colonial possessions.
   4. .....

   A. It brought slave trade to an end.
   B. Company rule in the colonies was discouraged.
   C. That means each claimed area had to be put under the control of the claiming power.
   D. Nigeria represented African countries.
   E. King Leopold II was given Uganda and Congo.

   (ii) 1. UNO promoted and maintained peace and security all over the World.
   2. .....
   3. through its functional agencies, it created awareness in the world.
   4. UNO succeeded in the decolonization process by creating awareness for African countries.

   A. Some of the UNO's functional agencies are not fair in their functions.
   B. It failed to equalize the World economy
   C. Some of the permanent members powered the security council in meeting ther economic interest.
   D. Tanzania is a member of the UNO
   E. The UNO has mediated in conflicts and promoted understand between countries.

Scanned by CamScanner

(iii) ... policy of assimilation in their colonies.
2. The policy aimed at transforming Africans into French citizens.
3. .....
4. The most powerful tool of assimilation was education.

A. Thus every aspect of African life had to be changed
B. The assimilated African became regional commissioners in French colonies.
C. After fulfilling some conditions, Africans were turned into a Senegalese citizen.
D. The policy involved the transfer of loyal Africans to France.
E. An assimilated Africans was protected by French laws but not allowed to contest for elections to the French parliament.

(iv) I. Archaeology is a science that deal with the excavation of fossils, ancient tools and other artefacts.
2. It is a branch of science which studies prehistoric events often using laboratory.
3. It is most useful where written sources are lacking or not decisive.
4. .....

A. Major archaeological sites in East African include Olduvai Gorge, Kalambo, Nsongezi and Meroe.
B. Archaeological information is obtained through the word of mouth.
C. Some societies involved with iron working were Kamba, Yao and Nyamwezi.
D. Archaeology make history real because people can see and touch the objects.
E. Archaeology is too expensive to conduct archaeological research.

(v) 1. The first World war lasted from 1914 – 1918.
2. It was primarily a struggle between the imperial powers.
3. German claimed to be main causative of the war due to its ambition to dominate the whole world.
4. .....

A. Britain, France and Russia were fighting against Germany, Italy and Turkey.
B. Although the first World War involved purely European issues it was inevitable that the over seas of the two sides would be involved.
C. Tanganyika was to be under Germany rule after the war.
D. German, France and Italy joined the war and fight against triple alliance of Britain, U.S.A and Russia.
E. All European nations struggled for colonies in the Balkan states such as Romania and Bulgaria.

QUESTION	(i)	(ii)	(iii)	(iv)	(v)
ANSWER					

SECTION C: (60 marks)

Answer three (3) questions from this section.

5. Examine six factors that led to the development of Trans-saharan trade during pre-colonial era.
6. Critically explain six social effects of Ngoni migration in east Africa.
7. Attaining independence in some African countries such as Angola and Mozambique was not an easy process. Explain six reasons for the use of armed struggle in these countries.
8. Discuss three causes of first World war and show three of its consequences in Africa.
9. Analyse the contribution of peasants association and African Independent church to the rise of Nationalism in East Africa by 1900 – 1940's.
10. State why British used indirect rule in their colonies? (Give six points)

– Shortage of land — Food ... Pag...
– Shortage of food — Urban ...
– Rapid expansion
