(i)Which type of a fire is associated which flammable gases.
A. Class E B. Class C C. Class F D. Class B. ☐

(ii)The process of urban water treatment involves
A. 2 stages B. 5 stages C. 6 stages D. 3stages. ☐

(iii)Which statement is the most correct about chemistry laboratory?
A. Is a special room designed for science practical.
B. Is a special room designed for keeping apparatus.
C. Is a special room designed for conducting chemical testes
D. Is a special room where students learn chemistry. ☐

(iv)A chemical formula for potassium chlorate (v) is
A. $K_2 CLO_3$ B. $K (CLO_3)_2$ C. $K_5 CLO_3$ D. $KCLO_3$ ☐

(V)Water is a universal solvent because:
A. It is available everywhere.
B. It boils at 100^0c
C. It dissolves all the crystal compounds.
D. It dissolves most of the solutes. ☐

(vi)Which of the following laboratory processes do resemble most closely the natural water cycle?
A. Filtration followed by evaporation.
B. Evaporation followed by condensation.
C. Decantation followed by evaporation.
D. Evaporation followed by filtration. ☐

(vii)The present definition of relative atomic mass is based on a comparison of an isotope of:
A. Oxygen B. Carbon C. Argon D. Hydrogen. ☐

(viii)Chlorine ion, CL^- differs from chlorine atom,CL because it has:
A. More protons B. less protons C. more electrons D. less electrons. ☐

(ix)The source of energy which, when used can put into use again is known as:
A. Fuel B. solar energy C. water gas D. renewable energy. ☐

(x)Aluminium is the thirteenth element in the periodic table its valency is
A. 4 B. 2 C. 3 D. 1. ☐

2.(a)Match each item in list A with a corresponds in list B by writing in the letter of the correct response below the corresponding item in the table provided.

LIST A	LIST B
i)Gas with the highest percentage by volume of air ii)Turns lime water milk iii)The lightest gas which is not found in the atmosphere iv)A gas which does not readily form compound v)A gas which relights a glowing splint	A. Oxygen gas B. Carbon dioxide gas C. Sulphur dioxides gas D .Argon gas. E. Hydrogen gas. F. Nitrogen gas. G. Chlorine gas. H. Carbon monoxide gas.

ANSWERS

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

(b)Fill in the blank spaces by using the appropriate terms.
(i)Serum is separated from blood samples by employing a technique called……

6. a) calculate the oxidation state of underlined elements in the following radicals.
i) $\underline{N}H^{+}_{4}$

ii)**$\underline{S}O_4^{2-}$**

iii)**$\underline{C}O_3^{2-}$**

b)The percentage abundance of $^{35}_{17}X$ is 75%and that of $^{37}_{17}X$ is 25%

i)calculate the relative atomic mass of X

ii)Identify the name of atom X……..

7)Study the following elements lettered A, B, C, D and E

Elements	Atomic mass	Atomic number
A	16	8

B	19	9
C	23	11
D	14	7
E	20	10

(i)How many neutrons are presents in element C?.....
(ii)Which group and period of the periodic table does element A belong?.....
(iii)Which element does not redily from compound? Give a reason
……..
iv)Write electronic configuration of ion formed by element D……

b)Write the symbols of the following elements.

i. Sodium…….
ii. Beryllium……..
iii. Boron……
iv. Nitrogen……..
v. Neon……..

8.a) Define the following terms
i)Empirical formula……
……
……..

ii)Molecular formula……
…….....
…….

b) A compound consists of 85.7% carbon and 14.3% hydrogen by mass. If its relative molecular mass is 56, calculate:
i)Empirical formula.

ii)Molecular formula.

9 a) why some elements are assigned symbols with only one letter while other bear symbol with two letters?.....
……
……

Gender refers to the differences in social roles and relations between males and females. Gender roles are learned through socialization and very widely within and between cultures. Gender discrimination refers to unequal treatment between males and females whereby one gender is given more priority in different opportunities.

Some of the customs which lead to gender discrimination in our societies include food taboos. These are practices of restricting a certain group of people from eating certain types of food for example; some Tanzania societies do not allow pregnant women to eat eggs or fish.

Another custom that lead to gender discrimination of women and children in decision making. Women and children are discriminated even in issues that concern their lives for example marriage and property ownership. Young girls have been forced to be married while widows are forced to marry brother of their deceased husbands.

Boke lay in one of the Hospital bed, she was very weak, and she has been bleeding for the past two weeks. Boke is a Kurya girl. In their tribe, both girls and boys are circumcised. Circumcision of girls is called Female Genital Mutilation (F.G.M), circumcision is also practiced by the Maasai and the Chagga.

One morning three women took Boke into the bush. She was told to sit on the mat ready for circumcision, "NO! NO! I don't want to be circumcised God help me! " she cried loudly. No one listened to her you must be circumcised so that your husband may respect you. Now shut up! One old woman said she did not shut up. The operation was very painful. Two women held her very tightly so that she could not run away.

After the circumcision she started bleeding freely. She bled the whole day, she bled the whole night, she bled the following morning and even now she is bleeding badly! They poured paraffin to her wound, but she still bled. They poured water to her wound, but she still bled, they put blankets to her wound but she still bled.

In the afternoon they took Boke to the hospital. The Doctor said it was bad to circumcise women because they can bleed to death. But even if she was cured, she may face problems when she is giving birth, He said that boys could be circumcised so that they can be clean. After three days Boke past away!
