THE UNITED REPUBLIC OF TANZANIA

PRESIDENT'S OFFICE

REGIONAL ADMINSTRATION AND LOCAL GOVERNMENT

KASULU TOWN COUNCIL

FORM TWO PRE-MOCK EXAMINATION

CODE: 033 **BIOLOGY**

Time: 2:30 Hours **Wednesday, 21.05.2025**

INSTRUCTIONS

1. This paper consists of three sections A, B and C with a total of ten (10) questions

2. Answer all questions in each section

3. **Section A** carries fifteen (15) marks, **section B** carries seventy (70) marks and **section C** carries fifteen (15) marks

4. Cellular phones and any other unauthorized materials are not allowed in the examination room

5. All writings must be in blue or black ink except for diagrams that must be drawn in pencil

6. Write your examination number at the top right corner of every page

MsomiBora.com

Section A (15 marks)

Answer all questions in this section

1. For each of the items (i) - (x) choose the most correct answer from the given alternatives and write its letter in the space provided.

(i). The following are the respiratory surfaces except.....

(a). Lungs (b). Heart (c).Leaves (d).Gills

(ii). Green plants are known as producers because they:

(a). Produce chlorophyll in chloroplasts (b). Produce green leaves (c). Contain fruits and seeds (d). Make food from simple substance

(iii). Controls movement of substances in and out of the cell

(a). Cell wall (b). Cell nucleus (c).plasma membrane (d). Vacuole

(iv). The ability of the human body to resist infection by disease - causing organisms

(a). Immunity (b). Vaccine (c). Inoculation (d). Vaccination

(v). The most important outcome of cellular respiration of living organisms is

(a). Discharge of carbon dioxide (b). Release of energy (c). Intake of oxygen (d). Formation of water

(vi). Cell walls:

(a). Are products of middle lamella (b). Surround all types of cells (c). Give rigidity to the plant cells (d). Control all the activities of the cells

(vii). An organism is made up of _____which are the basic functional units of life.

(a). Tissues (b). Cells (c). Organs (d). Systems

(viii). Which one of the following is NOT transmitted by sexual intercourse?

(a). HIV and AIDS (b). Malaria (c). Hepatitis B (d). Gonorrhea

(ix). Yasiratih is a form two student and she wants to measure a mass of a substance in the biology laboratory for an experiment, which instrument can she use among the following?

(a). Meter rule (b). Beam balance (c). Tape measure (d). Measuring cylinder

(x). The process of preventing food substance from spoilage is called _____

(a). Irradiation (b). Canning (c). Storage (d). Preservation

2. Match the items in LIST A from with the responses in LIST B by writing the letter of the correct response besides the item number

List A	List B
(i). Interconnected food chains (ii). All living and non-living things that occur naturally on earth (iii). An interaction that is beneficial to all the organisms involved (iv). Temperature, wind, light, water, soil, altitude and atmospheric pressure (v). Organisms that make organic food molecules from carbon dioxide, water and other inorganic raw materials	A. Competition B. Carbon cycle C. Natural environment D. Food web E. Mutualism F. Producers G. Biotic factors H. Commensalism I. Abiotic factors

SECTION B (Marks 70)

3. We are advised to plant trees in our environments and avoid cutting trees unnecessarily and burning bushes. What is the importance of trees and forests? Give five reasons.

4. State the functions of the following parts of a microscope

(a). Eye piece. ----------

(b). Mirror. ----------

(c). Body tube. ----------

(d). Base. ----------

(e). Arm. ----------

5. Waste disposal has been a disturbing issue in most of our streets, what three methods you can employ to get rid of these wastes near your school compounds

6. Briefly describe the process of blood circulation in human beings

7. Explain the application of the following items found in the first aid kit

(i). Scissors. ----------

(ii). Liniment. ----------

(iii). Petroleum jelly. ----------

(iv). Sterile gloves. ----------

(v). Safety pin. ----------

8. Human body is like an industry that has different systems in order it to run well.

(a). Which organelle works as a power house in the animal cell?

(b). Draw it and show any four parts

9. Adhaniya visited a health center for his body checkup, before entering the doctor's room he was told to one of the room where he was measured his height was 165 cm and mass to be 60 kg. What will be his body mass index? Give your comment on the answer

SECTION C (15 Marks)

Answer only one question

10. Classification of living things is much important today since other new species are continuously discovered.

(a). Meaning of the process

(b). Types of the process

(c). Four important of the process

THE UNITED REPUBLIC OF TANZANIA

PRESIDENT'S OFFICE, REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

KASULU TOWN COUNCIL

FORM TWO PRE-MOCK EXAMINATION MARKING SCHEME JUNE 2025

BIOLOGY

SECTION A (15Marks)

I	II	III	IV	V	VI	VII	VIII	IX	X
B	D	C	A	B	C	B	B	B	C

Each item=01 mark, grand total is 10 marks

2.

I	II	III	IV	V
D	C	E	I	F

Each item =01 mark, grand total is 05 marks

SECTION B (70 Marks)

3 i. They provide shades for both humans and other animals

ii. They produce oxygen to the atmosphere

MsomiBora.com

iii. They are habitats for animals

iv. They produce food that is vital in an ecosystem

v. They help in water cycle regulation

vi. They prevent soil erosion

vii. They help in cleaning the air in the atmosphere by absorbing carbon dioxide

Any correct five points @02 marks, total is 10 marks

4.

Part	Function

Eyepiece	For magnifying of specimen between 5x to 15x
Mirror	Reflecting and directing light to the specimen
Body tube	. Supports the objective lenses . Rotated to allow the change from one lens to another
Base	Provides firm support of the microscope
Arm	Supports bedy tube, knobs, stage, diaphragm and the mirror

@ function=02 marks, total is 10 marks

5.i. Burying

ii. Incenaration

iii. Recycling

iv. Decompositing

Any three methods @ 03.3 marks, total is 10 marks

6.✍Deoxygenated blood returns to heart from all body parts through venacava to the right atrium

✍ From right atrium blood is pumped to the right ventricle

✍From right ventricle blood is pumped through pulmonary artery to the lungs for oxygenation

✍Oxygenated blood returns to the heart through left atrium that pumps the blood through bicuspid valve to the left ventricle

✍From left ventricle blood rich in oxygen is pumped through aortic valve to aorta to the rest parts of the body. Later it repeats the cycle

@ correct step = 02 marks, total is 10 marks

7. i. Scissors-cutting dressing materials

ii. Liniment - relieving muscle pains

iii. Petroleum jelly- Smoothing chapped skin

iv. Sterile gloves - protecting hands from coming into contact with victim's body fluids

v. Safety pin- Securing bandages

8.a. Power house in an animal cell is Mitochondria

b. Take the diagram from biology text book page number 140

9. Given data

Height =165cm

Mass = 60kg

Required, body mass index =?

04 marks

BMI =mass of the body/square metre of the height 01 mark

$60/(1.65)^2$

60/2.7225 01 mark

22.04Kg/m2 02 marks

Comment : The BMI calculated shows that a person is more healthier since the value is between the range 18.5-25.4

SECTION C (15 marks)

10. Introduction - meaning of the term Classification 02 marks

Types of classification are artificial and natural systems @ 01 mark

Their meanings - 001/2 marks

Any four points of its importance @point 01 mark and explanation 01 mark

Conclusion :Any relevant and convincing 02 marks
