THE PRIME MINISTER OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
MARKING SCHEME - GEOGRAPHY
FORM TWO MOCK EXAMINATION - ARUSHA

(1)

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
D	B	B	C	A	D	D	A	C	A

1@ = 10 marks

(2)

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B	D	F	E	B	C

1@ 5 marks

(3) (a) Earthquake --- 2 marks

(b) Epicentre --- 2 marks

(c) (i) Primary wave
(ii) Secondary wave
(iii) Surface wave
2 marks

(d) (i) Tectonic movement of plates
(ii) Isostatic adjustment
(iii) Vulcanicity
(iv) Mass movements (landslide, rock falls)
(v) Falling heavy objects from atmosphere (meteorites)
(vi) Human activities (military use bombs, mining
any four points
1@ = 4 marks

(4) (a) Fault --- 2 marks

(b) (i) Normal fault
(ii) Reverse fault
(iii) Transform fault
(iv) Overthrust fault
1@ = 4 marks

(c) any four
(i) Rift valley e.g great Rift valley
(ii) Block mountain e.g Usambara mountain
(iii) Fault line scarps e.g Pare Mountain
(iv) Plateaus
(v) Graben e.g Lake Tanganyika

1@ = 4 marks

(5) (a) Mass wasting ---- 2 marks

(b) (i) Slow mass wasting.
(ii) Rapid mass wasting

1@ = 2 marks

(c) any four points
(i) The nature of the material
(ii) The angle of the slope
(iii) Climate
(iv) Influence of vegetation
(v) Human activities (mining, building, herding animals)
(vi) Earthquakes and volcanic eruption

1½ @ = 6 marks

(6) (a) (i) Seasons of the year
(ii) Change of overhead sun
(iii) Varying lengths of day and night at different time of the year
(iv) Aphelion and perihelion
(v) Eclipses

1@ = 5 marks

(b) (i) Solar eclipse occurs when moon passes between the earth and the sun. The moon casts its shadow over the earth 1 marks

DIAGRAM SOLAR ECLIPSE

1½ marks

3

(iv) Lunar eclipse occurs when the earth passes between the moon and the sun, thus casting its shadow on the moon -- 1 marks

DIAGRAM LUNAR ECLIPSE

1½ marks

(7) (i) Geography is the scientific study of physical characteristics of the earth and their influence on human life and activities

(ii) International date line (IDL) is an imaginary line where date is changed or calender day begins

(iii) Eclipse is a total or partial obstruction of light from the sun by either the earth or the moon

(iv) A rock is natural solid materials composed of various minerals in different ratio.

1@ = 5 marks

(v) Equinox refers to equal lengths of day and night, due to the tilting of the earth's axis.

(b) (i) It increase awareness of our country as our national heritage.

(ii) It develop the basic skills of observation, measurement, recording, analysing and interpreting geographical phenomena.

(iii) It help to understand our culture and how it differ from other cultures

(iv) It help us gain knowledge and skills for improving ways of utilising our resources

(v) It help us to gain skills for environmental conservation and management.

any five points

(vi) It helps to realise how natural resources are distributed over the country

(vii) It gives us practical skills and knowledge in various field like map making (cartography) teaching ..

1@ = 5 marks

(8) (i) Source of building materials e.g sand, stone

(ii) Tourism attraction eg Bismark Rock

(iii) Formation of soil 2@ = 10 marks

(iv) Source of minerals such as Tanzanite, gold

(v) Habitat for numerous animals species e.g snake

(9) (a) Continent is a major land mass rising from the ocean floor. 1½ marks

(b) (i) Asia
(ii) Africa
(iii) North America
(iv) South America
(v) Antarctica
(vi) Europe
(vii) Australia
1½@ = 3½ marks

(c) (i) Plains

(ii) Plateaus

(iii) Mountain

(iv) Basins

(v) Valleys

1@ = 5 marks

(10) Introduction - - - 2 marks

Main body
(i) Climate
(ii) Relief 2@ = 12 marks
(iii) Soil
(iv) Human activities
(v) Aspects
(vi) Slope

Conclusion - - - 1 mark
