ANSWERS

LIST A	i	ii	iii	iv	v
LIST B					

CamScanner

SECTION B (70 Marks)
Answer all questions in this section

3. Read the following passage below and answer the questions that follows:

It is strongly recommended that, 'understanding yourself ' is among the important thing for personal development of an individual. When boys and girls approach adolescence their hearts and even their minds change. It is very natural part of growth that adolescents start to develop an interest in peers of the opposite sex, talk about love and sexuality.

Adolescence is the time you can inform yourself about sexuality, what goes on in your body and your mind as well as what goes on the mind of the others. During adolescence you can have a sound friendship with other peers of an opposite sex. However, it does not mean that you should start having sex.

Its normal thing for the adolescents to talk about sex and it involves no health hazards. On the other hand, having unprotected sex can lead to health hazards such as unwanted pregnancies, misunderstanding in the family and infection of sexually transmitted diseases such as HIV/AIDs which kill a large number of people throughout the world and it ha no cure until now.

Therefore, better to take precautions for both boys and girls so as they can afford to meet and fulfill their dreams and thus can be achieved by helping them to understand themselves better and be in good position to do what is right and not what they like.

Questions

a. Suggest the best title for the passage

.....

b. Mention three (3) health hazards that adolescents can get if they have unprotected sex

i. .....
ii. .....
iii. .....

Candidate's examination number.....

1. (a) List the first 10 multiples of 3 and 5, and hence identify the common multiples.

(b) There 150 people at cricket match, 20% are children, one half are men and the rest are women. How many women are at the cricket match?

2. (a) Work out the following 8% 0f 0.737 correct to;
   (i) One significant figure

   (ii) Three decimal places

(b) Arrange the following in ascending order: $\frac{1}{2}$, $\frac{2}{9}$, $\frac{3}{8}$, $\frac{1}{12}$, and $\frac{2}{5}$

3. (a) A shopkeeper bought a radio for sh. 8,000/= and sold it at a profit of 20%. What were the profit and selling price?

(b) A roll of string is 13.5metres long. If four strings of lengths 2.3metres, 1.8metres, 2.37metres and 0.95metres are removed from roll and the remaining part is divided into pieces of length 32 cm. How many equal pieces are there?

CamScanner

Candidate's examination number.....

4. (a) The right-angled triangle with sides of lengths 7xcm, 24xcm and 150cm. If the length with 150cm is the longest one. Calculate

(i) The perimeter of the triangle

(ii) The area of the triangle

(b) The interior angle of a regular polygon exceeds the exterior angle by 150° find the number of sides of that regular polygon.

5. (a) If $\frac{6y+1}{4}=\frac{5(y+5)}{6}$, find the value of y correct to three significant figures.

(b) The difference between two positive numbers is 7. If their product is 30. Find the numbers.

6. (a) A line passes through the points P(k, 4) and Q(3, k +2). What value of k will make the line to be;

(i) Horizontal

(ii) Vertical

(b) Write the image of a point Q (-3, 7) after a reflection;

(i) In the x-axis

(ii) In the y-axis

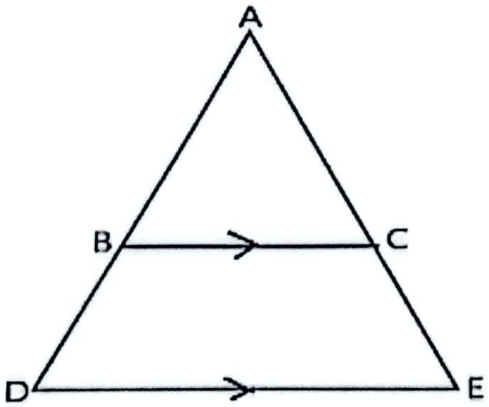

CamScanner

7. (a) If $x=\sqrt{3}$, $y=\sqrt{2}$ and $z(x-y)=2$, express z in the form of $z=a(\sqrt{b}+\sqrt{c})$.

(b) (i) Solve for x if $3^{2x} - 2(3^{(x+1)}) = -9$

(ii) If $\log y + 2\log x = 3$, express y in terms of x.

8. (a) In the given figure, $\overline{AD}:\overline{BD} = \frac{3}{5}$ and $\overline{AE} = 9.6cm$, find the length of $\overline{AC}$ when $\Delta ABC \sim \Delta ADE$.

CamScanner

Candidate's examination number.....

(b) Two regular houses are similar in shape their areas are $205m^2$ and $328m^2$.If the height of the smaller houses is 540m. Calculate the height of the larger house.

9. (a) Find the value of each of the following expressions and simplify the answer.

(i) $\sin 60° (\cos 45° + \sin 30°)$

(ii) $\tan 45° (4\cos 60° - \sqrt{3} \tan 30°)$

(b) The distance from the top of the flag post to the bottom of the mango tree is 24m, and the length of the flag post is 10m. Find the distance from the bottom of the flag post to the bottom of the mango tree.

.....

7. Lugha ya maandishi na lugha ya mazungumzo husaidia kukamilisha mawasiliano katika jamii. Bainisha tofauti tano (5) zilizopo kati ya lugha ya mazungumzo na lugha ya maandishi.

(i) .....
.....
(ii) .....
.....
(iii).....
.....
(iv).....
.....
(v) .....
.....

8. (a) Kwa kutumia hoja tano (5) onesha umuhimu wa kuhifadhi kazi za fasihi simulizi.

a) .....
b) .....
c) .....
d) .....
e) .....

(b) Fafanua sifa tano (5) za msimulizi wa tukio au hadithi.

i. .....
ii. .....
iii. .....
iv. .....
v. .....

9. Soma shairi lifuatalo Kisha jibu maswali yafuatayo:

Sema na wako msiri, mkiwa wawili ndani
Nje msiyahashiri, yakawa ya hadharani
Wawili mjisitiri, stara ina uzani
Kuweni na siri ndani, waume na wanawari.

Si vyema kuyahibiri, mambo yenu mtaani
Bure mtajihadhiri, watu watakusuteni
Ni muhimu kujistiri, muonwe bukheri shwani
Kuweni na siri ndani, waume na wanawari

Mwisho wa lungu shairi, nimefika ukingoni
Na waasa mkiri, mchunge yako vichwani
Mipango msiabiri, iwe siri nyoyoni
Kuweni na siri ndani, waume na wanaheri.

Maswali:

(a) Nini dhamira ya shairi?

.....

CamScanner

(b) Je mshairi anatoa ujumbe gani?

.....

.....

(c) Je shairi limetumia muundo gani?

.....

.....

(d) Je mtindo gani uliotumika katika shairi hili?

.....

.....

(e) Andika mstari wa kituo bahari katika shairi hili.

.....

.....

(f) Mshairi ana maana gani asemapo "kuweni na siri ndani waume na wanawari".

.....

.....

(g) Andika kina cha kati na cha mwisho katika shairi hili

.....

.....

SEHEMU C (Alama 15)

10. (a) Taja mambo matano (5) muhimu ya kuzingatia katika uandishi wa Kadi za mwaliko

i. .....

ii. .....

iii. .....

iv. .....

v. .....

(b) Andaa Kadi ya mwaliko ukimualika mwalimu wako wa darasa kuhudhuria sherehe ya mahafali ya kaka yako anayehitimu kidato cha nne.

SECTION A (15 Marks)

Answer **all** questions in this section.

1. For each of the items **(i) - (x)** choose the correct answer from the given alternatives and write the letter in the space provided.

(i) The shape of the earth is known to be a geod or oblate sphere but not perfect sphere cast one fact below to prove oblateness of the earth

A. Observation of the ship
B. Circulation of the earth
C. Gravity difference between the poles and equator
D. Observation of the other heavenly bodies

(ii) During night, Mchonjo saw a bright object crossing the sky at high speed. Identify the object seen by Mchonjo

A. Meteors.
B. Asteroids
C. Comets
D. Planets

(iii) A newly elected pope Leo- xiv had his first speech on 11 may 2025 at 10:00 AM at the balcony of St. Peter's Basilica in Vatican City (35°w) where he addressed about unity peace and justice all over the world. What a time the conference was live broadcasts on ITV (45°E) in Dar es salaam.

A. 16:00 hrs
B. 16:00 pm
C. 5:20 pm
D. 04:00 hrs

(iv) Which one of the following are Fold Mountains?

A. Himalaya, Black Forest, Andes and cape ranges
B. Cape ranges, Andes, Himalaya and Appalachians
C. Rockies, Andes, Alps and Atlas
D. Ruwenzori, Rockies, Vosges and Himalaya

(v) Form two students from Kitomondo secondary school visited different historical sites found in Mafia. Identify the type of tourism they were involved in:

A. Eco – tourism
B. International tourism
C. Culture tourism
D. Domestic tourism

(vi) A Geography teacher of school X was leading his student in measuring and drawing of the map of their football ground. The students were very careful and considered *all* components of the map but they did not know when to decide on scale of that map. Choose the proper moment to think of the map scale.

A. After drawing the map.
B. After taking ground measurement.
C. Before taking ground measurement.
D. Before deciding to draw the map

(vii) Mr Kabuji established school bags industry near Kilimahewa Primary School. Identify the type of human activities that carried out by Mr. Kabuji

A. Secondary human activities

CamScanner

B. Primary human activities
C. Tertiary human activities
D. Production activities

(viii) The Rufiji river basin in Tanzania is a major source of fresh water for irrigation and hydro-power. However, it is also facing a significant threat from;
A. Raising sea levels and salt water intrusion into a river system
B. Excessive deforestation and soil erosion along the river banks.
C. Increased industrial waste discharge and water pollution.
D. Frequent earthquakes and natural disasters and impacting water flow

(ix) Students from Kisangire Secondary school managed to visit Rebeca's farm where she involves in growing different crops on the same farm at different time but they do not know the agricultural type of cultivation practiced by her. Assist them to know the agriculture system opted by Rabeca.
A. Crop rotation.
B. Monoculture.
C. Bush following.
D. Shifting cultivation

(x) The grid reference of point B of an area as recorded as 361585. What are the number of Eastings and Northings
A. 585 are Eastings and 361 are Northings.
B. 361 are Eastings and 585 are Northings.
C. 585 are both Eastings and Northings.
D. Only 61 are Northings and 58 are Eastings.

ANSWERS

Questions	i	ii	iii	iv	v	vi	vii	viii	ix	x
Answers										

2. Match each item in list A with a corresponding in list B by writing the letter of the correct response besides the item number in space provided

LIST A	LIST B
i. Isohyets	A. lines that divide the Earth into two halves
ii. Contours	B. Lines show valleys in a map
iii. Isotherms	C. Are lines that shows the same amount of humidity in the atmosphere.
iv. Equator	D. Are lines drawn on a map showing the same amount of pressure in the atmosphere.
v. Isobars	E. Lines drawn in a map showing the same amount of precipitation of a place.
	F. lines drawn in a map showing the same amount of snow.
	G. Lines drawn on a map or chart joining points with the same temperature.
	H. Collection of lines found on a map that show the same height on the map.
	I. Lines drawn on a map or chart joining points with different temperature of places.

SECTION B: (70 Marks)

Answer all questions in this section

3. (a) Tanzania is constructing H. E. P project at Rufiji river so as to ensure constant supply of electricity in our country. Describe five conditions before constructing that project.

i. .....
ii. .....
iii. .....
iv. .....
v. .....

(b) Assume you are living in areas that affected by stagnant water, soil erosion and draught where the areas are useless for economic activities. Point out five (5) techniques that you can apply to make the areas useful.

i. .....
ii. .....
iii. .....
iv. .....
v. .....

4. (a) Carefully study the climatic data of **station Y** in the table below and then answer the questions that follow;

Day	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Maximum Temp (°C)	30	37	29	45	42	31	20
Minimum Temp. (°C)	26	27	25	17	20	22	17

i. Calculate weekly range of temperature for maximum temperature
.....
.....

ii. Find mean/ average temperature for minimum temperature
.....
.....
.....

iii. Which day is the coldest day in the week?
.....

(b). If the temperature of Dar es salaam at sea level is 35°C what will be the temperature at Manyovu- Kigoma with the altitude of 1200 metre?
.....
.....
.....
.....

CamScanner

5. Masai in Tanzania are famous in livestock keeping. They normally keep their animals by moving from one place to another with their herds in searching of water and pastures.

a) What is the system of livestock keeping they practice?

.....

.....

.....

b) Outline the four (4) environment impacts associated with system identified above

i. .....

ii. .....

iii. .....

iv. .....

c) List four benefits (4) of the livestock keeping identified (A) above

i. .....

ii. .....

iii. .....

iv. .....

6. (a) In Coast Region there are various forest reserves, such as Kazimzumbwi, Nyamwage and Ruvu. With examples explain five (5) importance of forest to human development.

i. .....

ii. .....

iii. .....

iv. .....

v. .....

(b) Outline five (5) setbacks facing forest exploitation in Tanzania.

(i) .....

(ii) .....

(iii).....

(iv).....

(v) .....

7. Most of the people in Mwadui Shinyanga have invested in the extraction of mineral resources and selling them to other people. Unfortunately, they don't know the side effect of that activities on the environment.

a) With five (5) points, tell them the impacts of conducting such activities on the environment.

i. .....

ii. .....

iii. .....

iv. .....

v. .....

b) By using five (5) points, what are the contribution of mining industry to the economy of Tanzania?

i. .....

ii. .....

iii. .....

iv. .....

v. .....

CamScanner

8. (a). Nowadays Tanzania country focused much on establishing and developing different industries in different regions especially in Coastal region. NAFCO wants to establish the plastic processing industry in Kwala village. Highlight five (5) conditions needed before establishing the industry.

i. .....
ii. .....
iii. .....
iv. .....
v. .....

(b) Give out two (2) major types of manufacturing industry in Tanzania

i. .....
ii. .....

(c). Give out three (3) challenges facing manufacturing industry in Tanzania.

i. .....
ii. .....
iii. .....

9. In Mwanga town, located in Kilimanaro region, people typically walk along the road to go to market and fulfill their needs. As a form two student;

a) What type of transport are the people using?

.....

b) What is the mode of transport are they utilizing?

.....

c) List four advantages of the transport described in (a) above.

i. .....
ii. .....
iii. .....
iv. .....

d) State four (4) disadvantages of the transport type described in (a) above.

i. .....
ii. .....
iii. .....
iv. .....

SECTION C: (15 Marks)

SECTION A (15 Marks)

Answer All Questions

1. For each of the item (i – x), choose the correct answer from among the given alternatives and writes its letter in the space provided.

i. Gas M was prepared in the laboratory by form two students. It was found that gas M could harden the oil into margarine but also rarely found in the atmosphere due to its low density, the gas M is _____

A. Chlorine gad
C. Hydrogen gas
B. Oxygen gas
D. Bromine gas

ii. A scientist was required to carry investigation of the powdered materials found in the area of crime. He made the guess of what the powder could be and went to the laboratory for experimentation. What was he trying to test in his experiment? _____

A. Data
C. Problems
B. Hypothesis
D. Observation

iii. Most of the time; the red buckets full of sand are expected to be seen in petrol station. This is because in petrol station the fire breaks out expected to happen is _____ that can be extinguished by sand.

A. Class A fire
C. Class C fire
B. Class B fire
D. Class D fire

iv. A student was asked to choose the appropriate source of heat in the laboratory, which one among the following sources you would recommend to student;

A. Bunsen burner
C. Spirit burner
B. Charcoal burner
D. Electric burner

v. The reaction between X and Y, forms compound Z. X loses electron and Y gains electron. Which of the following properties is not shown by Z? _____

A. Has High boiling point
C. Conduct electricity
B. Has low boiling point
D. Occurs as solid

vi. One may recover a sample of copper (II) sulphate contaminated with sand by performing one of the following sequence series_____

A. Dissolution, filtering, decoloring again and finally evaporating
B. Decantation, evaporation and then distillation
C. Dissolution, Filtration and evaporation
D. Dissolution and then evaporation

vii. One of the most interesting things that chemist focus/pay attention when they make study of chemical substance is? _____

A. Its force of attraction
C. Its properties
B. Its shape
D. Its smell and colors

viii. An element has the atomic number 19 and mass number of 39. How many numbers of protons and neutrons are found in the nucleus of this element?

A. 19 protons and 20 neutrons
B. 20 protons and 19 neutrons
C. 19 protons and 19 neutrons
D. 20 protons and 20 neurons

CamScanner

Candidate's Examination Number.....

ix. Swimming pools are usually bubbled with chlorine gas before letting people have fun in it, the aim of doing this process is to;
   A. Remove bad and odious smell
   B. Killing organisms causing diseases
   C. Making water attractive
   D. Making water syrup

x. Separation of mixture by fractional distillation process is made possible if the constituents of the mixture differ in their.
   A. Boiling points
   B. Melting points
   C. Vaporizing points
   D. Freezing point

Question	i.	ii.	iii.	iv.	v.	vi.	vii.	viii.	ix.	x.
Answer										

2. Match the items in List A with the correct response from list B by writing letter beside the number of the corresponding items in the table provided below.

LIST A	LIST B
i Group of elements which react quickly with water to form alkaline solution.	A. Metalloids
ii The ability of an atom to attract an electron	B. Non-Metals
iii Group of elements in which their shells are completely filled up	C. Periodicity
iv A vertical column of elements in the periodic table	D. Transition element
v Group of elements which reacts slowly with water to form alkaline solution.	E. Electronegativity
	F. Alkali metals
	G. Halogens
	H. Periodic law
	I. Alkali earth metal
	J. Rare non-metal
	K. Period
	L. Noble gases
	M. Periodic table
	N. Group

ANSWERS

Question	i	ii	iii	iv	v
Answer					

SECTION B (70 Marks)

Answer all questions in this section

3. (a) Most of farmers in the rural areas were interested to know how the knowledge of chemistry is necessary in agricultural activities. Assume you are a chemist; educate the farmers on the applications of chemistry by giving five points

i. .....
ii. .....
iii. .....
iv. .....
v. .....

CamScanner

(b)Form one student entered in the chemistry laboratory and found five apparatus on the benches used for holding hot objects substance, apparatus for scooping small quantities of powder or crystalline chemicals, measuring volumes of base, heating substances strongly and apparatus for grinding and crushing. Mention those five apparatuses respectively.

i. .....
ii. .....
iii. .....
iv. .....
v. .....

4. (a) A laboratory technician advised students to use non-luminous flame when they are heating chemicals in the laboratory. As form two student explain briefly six (6) reasons why encourage students to use this kind of flame?

i. .....
ii. .....
iii. .....
iv. .....
v. .....
vi. .....

(b) Some people in the society believe that solving problems by using scientific procedures is wastage of time and money. By using knowledge of chemistry that you have, refuse the Statement by giving four points.

i. .....
ii. .....
iii. .....
iv. .....

5. (a) Define the following

i. Empirical formula

.....
.....

ii.Molecular formula

.....
.....

(b) A form two student found a bottle of chemical in the laboratory of chemistry labelled M with the following information: 52.2% carbon, 13% Hydrogen and the rest is oxygen. If the vapor density of the compound M is 23. Then

i. Calculate empirical formula of the compound M

ii.Find its molecular formula

6. (a) Define the following terms as used in chemistry

i. Element.....
.....
ii. Compound.....
.....

CamScanner

iii. Mixture.....

.....

(b) A form two student at Kilangalanga Secondary school was asked to give difference between two samples found in the school laboratory Sample A (water with chalk particles) and sample B(Salt water). As a form two student outline three (3) difference between two sample

Sample A	Sample B

(c) In an experiment, two iron nails A and B were used, nail "A" was painted with reddish color materials and nail" B" was left naked. Both nails A and B were placed in moist environment.

(i) After one-month weight of nail A was found the same while that of nail B decreased. Explain why?

.....

.....

(ii) Explain three methods that can be used to prevent the loss of weight of nail B.

.....

.....

.....

7. (a) What do you understand by the term.

i. Isotope?

.....

.....

.....

ii. If a sample X consists of 99.76% of ^{16}X; 0.04% of ^{17}X, the rest percentage was for ^{18}X. Calculate the relative atomic mass of X.

(b) Copy the following table and fill the missing details of the arbitrary element given.

Element	Atomic number	Mass number	Number of protons	Number of elections	Electronic configuration
T	3	7	.....	.....	.....
U	.....	23	.....	.....	2:8:1
Q	.....	40	20	.....	2:8:8:2

8. (a) Gas M was prepared in the laboratory by form two students. It was found that gas M could harden the oil in to margarine but also rarely found in the atmosphere due to its low density

i. Identify gas M.....

ii. Mention two chemical reagents that can be used to prepare gas M in the laboratory

CamScanner

.....

.....

iii. Write down the word equation which represent a chemical reaction taking place in preparation of gas M.....

iv. State how gas M can be identified chemically and uniquely?

(b) List four main processes in the water cycle

i. .....

ii. .....

iii. .....

iv. .....

(c) Why is the water cycle important for life on Earth? (Give three points)

i. .....

ii. .....

iii. .....

9. (a) Calculate the oxidation number of the underlined elements

i. $K_2\underline{Cr}_2O_4$

ii. $\underline{S}O^{2-}_4$

iii. $H\underline{S}O^{-}_3$

(b) Write the formula of the following compounds

i. Sodium chloride.....

ii. Calcium hydroxide.....

iii. Magnesium sulphate.....

iv. Iron (iii) chloride .....

SECTION C (15 Marks)

Answer question number 10.

10. (a) Define the following

Fuel .....

.....

Energy..... .....

.....

(b) You are given two types of fuel commonly used at home **charcoal** and **liquefied petroleum gas (LPG)**. Which one will you prefer to use? And why? **(six reasons)**.

SECTION A (15 Marks)

Answer **all** questions in this section.

1. For each of the item (i)-(x) choose the correct answer from the given alternatives and write its letter in the box provided.

   i. A cross- sectional cut stem was immersed in iodine solution for five minutes and appeared to have a blue black with the given regiment. Which part of the stem stained blue black colour.
   - A. Cambium
   - B. Endodermis
   - C. Pericycle
   - D. Phloem
   - E. Xylem

   ii. A nurse told a mother with a bow–legged child that her child had a vitamin deficiency, which of the following could be the deficient vitamin?
   - A. Vitamin A
   - B. Vitamin B
   - C. Vitamin C
   - D. Vitamin D
   - E. Vitamin E

   iii. During puberty stage youth want to exercise everything as the way of learning hence they show different behaviour, which of the following is a risk behaviour that should not be exercised/practiced
   - A. Alcoholism
   - B. Being patient
   - C. Eating eggs daily
   - D. shaking hands with HIV infected individual
   - E. Sharing toilet facilities with HIV infected individual

   iv. Which one of the following branches of biology concern with the study of insects?
   - A. Cytology
   - B. Ecology
   - C. Entomology
   - D. Mycology
   - E. Parasitology

   v. Which of the following is expected to happen if blood supply to the brain is reduced?
   - A. Vomiting
   - B. Nausea
   - C. Fainting
   - D. Shock
   - E. Shivering

   vi. Air is warmed and humidified in the nasal passages. This help to
   - **A.** Prevent infection
   - **B.** Decrease sensitivity
   - **C.** Prevent damage to the lungs
   - **D.** Prevent abrupt change of the body temperature
   - **E.** All of the above

CamScanner

vii. A pond water drop was observed under a microscope. A unicellular organism was seen moving by mean of cilia
   A. Paramecium
   B. Euglena
   C. Amoeba
   D. Plasmodium
   E. Spirogyra

viii. The form two students were given **coconut** to **make observation** of **the shape and** determine if **contain liquid inside**. Do you think which sense organ will they use to identify the answer?
   A. Tongue and eye only
   B. The eyes and Ears only
   C. The tongue, nose and eye only
   D. The tongue, skin, nose and eye only
   E. The eyes, The tongue and mouth only

ix. The following are reasons why waste disposal is a problem EXCEPT?
   A. Inadequate litterbins
   B. Disposal of waste in a wrong area
   C. Enforcing punishment to discourage littering
   D. Failure of cleaners to collect waste from public places
   E. Educating the people on effect of poor waste disposal

x. Anaerobic respiration in plants lead to the production of.
   A. Ethanol
   B. Lactic acid
   C. Oxygen
   D. Hydrogen
   E. Nitrogen

ANSWERS

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match each item in **Column A** with the corresponding item in **column B.** Write the letter of the correct response in the space provided.

LIST A	LIST B
i) Reducing muscle pain. ii) Cleaning and drying wounds iii) Covering small wounds. iv) Securing bandages. v) Used in burns	A. Sterile gloves B. Plaster C. Cotton wool D. Liniment E. Petroleum jelly F. Pain killers G. Scissors H. Safety pins

SECTION B (70 Marks)

Answer **all** questions in this section

3. Form one students at **Dunda Secondary school** were debiting about **a motor car being a living thing** because can move from one place to another and use fuel as source of energy, in turn produce fumes (smoke) as waste products. As an Expert, write five points to clarify against the motion.
   i. .....
   ii. .....
   iii. .....
   iv. .....
   v. .....

4. In the study tour to Serengeti national park the following organisms were seen. Lion, grasses, hyena, wildebeest, shrubs, antelope, buffalo, and Some dead and **decaying/decomposed living** matters.
   a) As an expert in the study of **balance of nature Construct feeding relationship** which comprises all living things seen in the park.

   b) What are the roles of shrubs and buffalo in the food web constructed
      i. .....
      ii. .....
   c) Mention all the groups of organisms which make an ecosystem to be stable
      i. .....
      ii. .....
      iii. .....

5. **Believe or not biology** will never stand alone in the world and become self-sustained stable. Briefly show **other four areas (field)** of study that interlink (relate) With biology.
   a) .....
   b) .....
   c) .....
   d) .....

6. a] What is aerobic respiration?
   .....
   .....
   .....

CamScanner

(b) Give reason for each of the following characteristics of respiratory surface.

(i) Have thin wall

.....

(ii) Have moist surface

.....

(iii)Highly branched

.....

(iv)Large number of blood capillaries.

.....

7. a) Outline three components of gastic juice;

i. .....

ii. .....

iii. .....

(b) Diana is 70kg and 150cm tall.

i. What is her BMI?

ii. What danger is facing Dina?

.....

.....

iii. What advice will you give to Dina?

.....

.....

8. In the study of living things all organisms are grouped according to their similarities and differences.

a) Mention all the major groups of classification.

i. .....

ii. .....

iii. .....

iv. .....

v. .....

b) One of the groups of organisms mentioned above can make their own food and also the food for other organisms in different groups by the process called **Photosynthesis**

(i). Name that group

.....

(ii). Outline three importance of the members of this group

.....

.....

.....

.....

CamScanner

c) State any three **criteria's (characteristics)** used to press the organisms in the in this group.

SECTION A: (15 Marks)

Answer all questions in this section

1. For each of the item (i)-(x), choose the correct answer from the given alternatives and write its letters below item number in the box provided.

   i. The form two students of Tandale Secondary school went visit a special building where historical artifacts and other artistic objects are kept. This building is known as;
   A. Archives
   B. Historical sites
   C. Museum
   D. Archaeology

   ii. One day in the evening I met with form two students just discussing the events that took place in Europe in the 19th century, the event that led to the abolition of slave trade in Africa. What event was the students discussing?
   A. Legitimate trade
   B. Industrial revolution
   C. Boer trek
   D. Triangular slave trade

   iii. Mwakatundu is a form one student who believe that "all creatures including human being were created by that Super natural power. Which theory does Mwakatundu use to explain the origin of Man?
   A. Biblical theory
   B. Evolution theory
   C. The theory of Darwinism
   D. The theory of Creation

   iv. Mwashamba was in the group discussion explaining to his fellow group members on exploitative modes of production existed in pre-colonial Africa. Which of the following modes were presented by Mwashamba?
   A. Socialism and Capitalism
   B. Feudalism and Communalism
   C. Slavery and Feudalism
   D. Feudalism and Capitalism

   v. Ngoni defeated many societies they encountered during their migration because they used superior weapons. Which among the following is the correct set of weapons used by Ngoni?
   A. Clubs, cow hide-shield and gunpowder.
   B. Short stabbing spears, gunpowder and clubs
   C. Guns, clubs, and short stabbing spears
   D. Short stabbing spears, clubs, and cow hide-shield

   vi. Mzee Kishozi was a land owner in Buhaya and he used that for economic activities. Therefore, Mzee Kiashozi system was known as;
   A. Ubugabire system
   B. Umwinyi system
   C. Ubusulu and Mvunjo
   D. Nyarubanja system

CamScanner

vii. Form two students were arguing on the type of organisation in which the division of work was based on age and sex. As historian what type of organization were they arguing for?
A. Clan organisation
B. Age set organization
C. Ntemi system organisation
D. State organization

viii. Which of the following describes best the collapse of Trans- Saharan Trade on first half of 16th century?
A. Coming of many Arabs from Egypt
B. Emergence of new species of Camels
C. The decline of Trans-Atlantic slave Trade
D. The rise of rise of Trans-Atlantic slave trade

ix. Molell is a Maasai livestock keeper who moves from one place to another searching for pasture and water for his cattle's. This movement is known as:
A. Pastoralism.
B. Normadic pastoralism.
C. Sedentary pastoralism.
D. Permanent pastoralism.

x. The growth and expansion of Soghai Empire was a result of
A. Geographical position and Equatorial favorable climate
B. Expansion of Gao Empire through conquering neighboring states.
C. The emergence of Mansa Musa as strong leader
D. Development of Iron technology

Answers

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the items in list A with the correct item in list B by writing its letter below the number of the corresponding item in list A in the table below.

LIST A	LIST B
i. Harmaton treaty of 1845	A. William Wilberforce
ii. A person who believed that slave trade and slavery where inhuman acts	B. Bartholomew Diaz
iii. A person who sponsored Portugal exploitation voyage	C. It prevented the Arabs slave traders from sending slaves from outside the sultan empires
iv. A person who is an explorer and missionary	D. It emphasizes on closing of the Zanzibar slave market.
v. Moresby treaty of 1822	E. It prohibited the sultan of Zanzibar to export slaves' outsides East Africa
	F. Prince Henry the navigator
	G. David's living stones
	H. Carl Peter
	I. The treaty which signed between chief Mangungo of Msovero and Carl Peter

SECTION B (70 Marks)

Answer all questions in this section

3. Briefly explain the following terms as used in history
   (i) Golden tool
   .....
   .....
   (ii) Kaffir war
   .....
   .....
   (iii) Scorched-earth technique
   .....
   .....
   (iv) Black smith
   .....
   .....
   (v) Monsoon winds
   .....
   .....

4. Arrange the following sentences in chronological order by writing their roman numbers below the corresponding position in the table provided
   (i) At the stage of Homo sapiens man began crop cultivation and animal husbandry to supplement hunting and gathering
   (ii) Darwin's theory suggest that man's species have been involving gradually from lower stage to higher stage
   (iii) The origin of man has been a controversial issue among the historians especially when and how man came into existence.
   (iv) The evolution theory suggests that members of Australopithecus family which lived during the early Stone Age could make tools.
   (v) The discovery of fire during the middle stone age enabled human being to eat roasted food

1st	2nd	3rd	4th	5th

5. Briefly, answer each of the following questions
   (i) Why did the early human beings adopt a communal life? **(Give 2 reasons)**
   .....
   .....
   (ii) How did the geographical location favoured the rise and growth of Buganda kingdom? **(Give 2 points)**

SECTION A (15 Marks)

Answer all questions in this section

1. For each of the following items (i) - (x), choose the correct answer from the given alternatives and write its letter in the box provided.

i. A diameter of an object by using vernier caliper given as 0.75cm, the Vernier scale reading division and the main scale reading respectively was
A. 0.5cm and 7 B. 5 and 7 C. 7cm and 5 D. 0.7cm and 5

ii. A student gets an electrical shock and falls down unconscious in physics laboratory which of the following would, you do first to help a victim.
A. Administer breathing exercise B. Calling the physics teacher
C. Calling the other students D. calling the medical doctor

iii. On the moon always, sky is black this is because
A. No atmosphere to scatter light B. No atmosphere to scatter black colour
C. No atmosphere to scatter blue colour D. No atmosphere to form light

iv. The hydrometer is calibrated in such a way that has large number at the bottom this is because
A. It obey both law of submergence and law of floatation
B. To enable it to stand upright when measuring the density of liquid
C. Its construction is to enable to sink more in less denser liquid and less in denser liquid
D. Its construction enables to sink more in denser liquid and less in the less dense liquid

v. The quantities of charge passing through a circuit of 1.5A are 32 coulombs. What is the time taken for the flow in the circuit?
A. 48 second B. 21.3 minutes C. 48 minutes D. 21.3 second

vi. The up thrust on a body partially or totally immersed in a fluid is equal to
A. Mass of the fluid displaced B. Weight of fluid displaced
C. Volume of fluid displaced D. Weight of body in air

vii. The atomic dipole when are in random direction their net magnetic field cancel out and produce no net effect of attraction or repulsion. The process of aligning them in one direction done by
A. Demagnetization process B. Magnetization process
C. Shielding process D. Desaturation process

viii. If you push box-containing books across the floor there are force acting on the box, the forces are
A. Friction, gravity and applied force B. Friction, gravity and normal force
C. Friction, tension and Gravity D. Gravity, air resistance and friction

ix. The function of constriction in a clinical thermometer is
A. storage of mercury liquid B. To maintain the temperature reading
C. To allow passage of mercury D. To absorb heat from the substance being measure

CamScanner

x. Which of the following statement is not true?
A. hydroelectric power station are easy to set up
B. Wind mills are noisy
C. Hydroelectric power degrade the environment
D. Wind mills can be set up near the seabed

Answers

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the items in **List A** with a correct response in **List B** by writing the letter of the correct response below the corresponding item number in the table provided.

LIST A	LIST B
i. Resultant force	A. Momentum
ii. Inertia	B. Action and reaction force
iii. Impulse	C. Net force
iv. Newton second law of motion	D. Act over short time intervals
v. Occurs in pair	E. N/s
	F. Resist to change of its state
	G. Force is directly proportional to rate of change of momentum

Answers:

List A	i.	ii.	iii.	iv.	v.
List B					

SECTION B (70 Marks)

3. (a) (i) With a clear diagram describe the charge density distribution on the following surface conductor Spherical conductor, pear shaped conductor. **(2 marks)**

(ii) Give two applications of static electricity in our daily life. **(2 marks)**

_____

_____

(b) Three capacitors x, y and z have their capacitors as 10μF, 20μF and 30μF Calculate the equivalent maximum and minimum capacitance. **(6 marks)**

CamScanner

4. (a) A body immersed in water displaced 150N. If its weight when in air is 500N. Find

(i) Apparent object's weight in water **(1 mark)**

(ii) Why does the object weight less in water? **(1 mark)**

(iii) State two (2) factors on which your answer in b (ii) depends. **(2 marks)**

(b) A hydrometer of mass 28g float with 3cm of its stem out of water, the cross-area of stem is $0.75m^2$. What is the total volume of hydrometer and the lengh of stem above the surface when floats in a liquid of relative density 1.4? **(6 marks)**

5. (a) In what sense is a clinical thermometer considered a maximum thermometer **(4 marks)**

(b) Why is not advisable to use an alcohol thermometer to measure temperature of boiling water. **(3 marks)**

(c) Why is it possible to reset the indexes of minimum and maximum thermometer using a permanent magnet **(3 marks)**

6. (a) Briefly explain why

(i) Travelling bags have wheels. **(1 mark)**

(ii) The efficient of a machine is always less than 100%? **(2 marks)**

CamScanner

(b) The efficiency of block and tackle system pulley is 80%. If a load of 400N is raised by this machine by using a force of 100N. Draw a clear diagram of this pulley system. **(2 Marks)**

(c) A wheel and axle of efficiency 80% is used to rise a load of 2000N. if the radius of a wheel is 50cm, and that of axle is 2cm, calculate:

(i) The velocity ratio of a machine **(2marks)**

(ii) The effort required to overcome the load. **(3marks)**

7. (a) (i) Give reason why dams are constructed thicker at the bottom than at the top? **(2marks)**

_____

_____

(ii) Give reason why water is not used as a barometric liquid? **(2marks)**

_____

_____

(b) A rectangular box whose dimensions are 1.2 m by 0.5 m by 2m has a density of 25 kg/m^3. Calculate the maximum pressure, which it can exert when placed on flat ground. **(6 marks)**

CamScanner

Student's Assessment Number .....

8. (a) Briefly explain in which conditions a moving car can have momentum but not net force on it? **(2 marks)**

_____

_____

(b) A car starts from rest and accelerates uniformly at a rate $4\,m/s^2$ for 5 seconds. It maintains a constant speed for 20 seconds. The brake is then applied and a car decelerates for 3seconds. By using graphical sketched method find; the maximum speed attained and total distance covered. **(8 marks)**

9. (a) Explain the following: -

(i) Why a loaded test tube float upright? **(1mark)**

_____

(ii) It is more difficult to balance a nail on its tip than on its base **(1mark)**

_____

(iii) A bus carrying a very big load on its carrier can easily overturn **(1mark)**

_____

(b) A uniform bar AB of height 5m weights 60N. The bar is supported at a horizontal position by two vertical strings X and Y. If string X is 0.6m from A and string, Y is 1.8m from B. Find the tension in the string. **(7 marks)**

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x) choose the correct answers from the given alternatives and write its letter beside the item number in the box provided.

i. A trial balance is prepared in the business in order to.....
A. Calculate profit or loss
B. Check bank balance
C. Check the accuracy of ledger entries
D. provided a list of assets and liabilities

ii. An accounting concept which assumes a business continues to exist for the unforeseeable future is known as.....
A. business entity concept
B. matching concept
C. going concern concept
D. historical cost concept

iii. A ledger that directors would not want their staffs to see due to some reason is termed as:
A. Sales ledger
B. private ledger
C. general ledger
D. director ledger

iv. Double entry system means: -.....
A. recording business transaction in the book of accounts
B. recording of business transaction once in the book of account
C. recording of business transaction several times in the books of account
D. recording of business transaction twice in the books of accounts

v. One of the following statements is not correct.....
A. Assets – Liability = Capital
B. Liabilities + Assets = Capital
C. Assets – Capital = Liabilities
D. Liabilities + Capital = Assets.

vi. The periodical total of the purchases returns day book is transferred to the
A. Debit side of the return outward Account
B. Debit side of the return outward Journal
C. credit side of the return outward account
D. Debit side of the purchases Account

vii. Under which classification of account can furniture be categorized?
A. Nominal account
B. personal account
C. real account
D. impersonal account

viii. Which of the following is an expense to a business?
A. Loan interest
B. Loan from Halima
C. Loan to John
D. loan repayment

ix. Instructions from the account holder to the drawee to make payment on behalf at regular interval is termed as:
A. instruction order
B. order point
C. standing order
D. order level

x. Namwinyo bookshop received a trade discount of 20% and a cash discount 5% on goods worth Tsh. 150,000. How much will be required to pay?
A. Tsh. 142,000
B. Tsh. 114,000
C. Tsh. 110,000
D. Tsh.120, 000
