BIOLOGY FORM ONE
MARKING GUIDE.

1.

i	ii	iii	iv	v	vi	vii	viii	ix	x
D	B	A	A	C	B	B	C	D	B

10Marks, @ 01mark.

2.

i	ii	iii	iv	v
A	F	C	D	B

05 Marks, @ 01Mark.

3. (a) (i) Mycology - Is the study of fungi eg mushroom.
(ii) Taxonomy - Is the study of classification of living organisms
(iii) Genetics - Is the study of heredity and variation.

(b) (i) Pooter - It is used to pick up small specimen without injuring them.
(ii) Thermometer - It is used to measure the temperature of an object.
(iii) Sweep net - It is used to catch flying insects.

10marks, @

4. (a) (i) Biology laboratory is a building or room where biological experiments are done.

WHILE

Laboratory is a special room or building where experiment are done.

(ii) Botany is the branch of biology that deals with the study of plants.

WHILE

Zoology is the branch of biology that deals with the study of animals.

(iii) Unicellular organisms are organisms that are made up of one cell. BUT, Multicellular organisms are organisms made up of more than one cell.

(b) (i) It should have a rought floor to avoid slipperyandfall
(ii) It should have large windows for light and air.
(iii) It should have a first aid kit and fire extinguisher.
(iv) It should have a door opening outwards for easy escape during an accident.

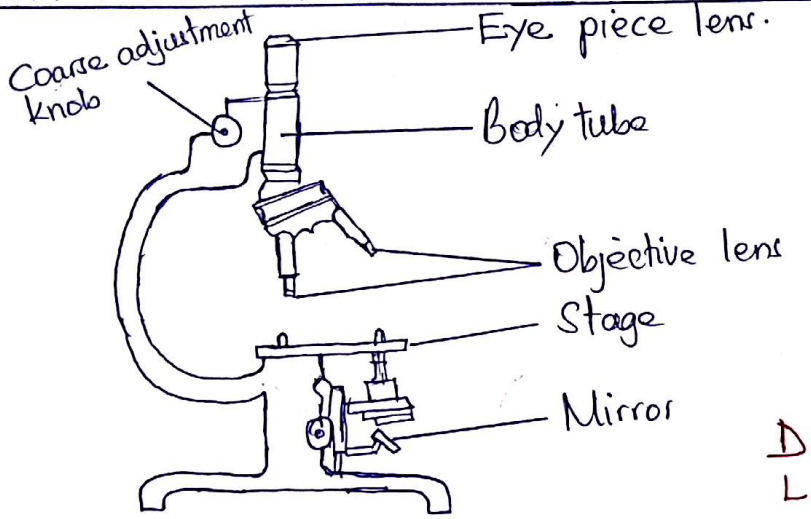

10Marks, @ 01 mark.

GMK

5 (a) It was necessary because the cells in the frog are invisible. (02marks)

(b) Handlens. (02marks)

(c) A LIGHT MICROSCOPE'S DIAGRAM.

D = 03
L = 03
T = 06

6 (a)

Eye piece lens magnification	Objective lens magnification	Total magnification
6x	13x	78x
7x	5x	35x
9x	8x	72x
3·5x	1·5x	5·25x
8x	3x	24x

@1mark

(b) (i) Do not touch the microscope with wet hands
(ii) Lubricate the moving parts regularly.
(iii) When it is not in use cover it with a clean cloth and store it in a dry and dustless place.
(iv) Hold the microscope with two hands, one hand holding the arm and another holding the base. @1·25mark. ≈ 10marks.

7. (a) Scientific procedures are systematic methods used to investigate and understand a phenomena (1mark)

(b) (i) It helps to prove the hypothesis.
(ii) It helps to answer fundamental questions. (03marks)
(iii) It helps to acquire skills of solving problems.

(c) (i) Problem identification
(ii) Formulating hypothesis
(iii) Experimentation.
(iv) Observation
(v) Data analysis. (06marks)
(vi) Conclusion
(vii) Reports results.

GMK

8(a)

MEASUREMENT	SI-UNIT	INSTRUMENT.
mass	Kilogram (kg)	Weighing balance.
Temperature	Kelvin	Thermometer.
Length.	Metre (m)	Tape measure

(b)

(i) 10kg into g	(ii) 40°C into °F	(iii) 20°C into K
1kg = 1000g 10kg = ? $= \frac{10\text{kg} \times 1000\text{g}}{1\text{kg}}$ = 10000g	$°F = (°C \times \frac{9}{5}) + 32$ $= (40 \times \frac{9}{5}) + 32$ $= (8 \times 9) + 32$ $= 72 + 32$ $= 104°F$	$K = °C + 273$ $K = 20°C + 273$ $= 293K.$

10marks.

9. Importance of Studying Biology.

(i) It helps to group and understand living things.
(ii) It helps to understand ourselves better.
Example, body parts.
(iii) It helps to know and care for our environment.
(iv) It helps to answer fundamental questions like how do plants move?
(v) It helps to get professionals like doctors, nurse and pharmacists.

10 marks, @02marks.

GMK

10 (i) What has caused the erruption of Malaria at Jangwani village. (02 marks).

(ii) Erruption of Malaria at Jangwani village may be due to most of the villagers not using mosquito net. (03 marks).

(iii) Control experiment – Not using mosquito net (02 marks)

Test experiment – Using mosquito net (02 marks)

(iv) Dependant variable.

- Erruption of Malaria. (02 marks)

Independant Variable

- Using mosquito net. (02 marks)

Controlled variable

- Beds. (02 marks).

TOTAL = 15 marks.

THE END.

GMK.
