SECTION A (15 MARKS)

Answer **ALL** questions in this section

1. Select the most correct answer in each item and write its letter beside its corresponding item number.

(i) The two main branches of Biology are:
A. Botany and Microbiology B. Bios and Logos
C. Botany and Zoology D. Biochemistry and Physiology

(ii)People who are always talking while eating are most likely to be:
A. Fans of one of the two big football clubs in Tanzania B. Expressing bad manners
C. Very hungry D. Observing table manners

(iii) A victim of electric shock can be saved from danger of death by giving one of the following First Aids:
A. pouring a lot of water over the victim B. pulling the victim away by hands
C. removing the victim from the current by using a metallic object D. turning off the sources of electricity

(iv) Which of the following organisms are members of the Kingdom Protoctista?
A. Bacteriophage and the Corona virus B. Plasmodium and Amoeba
C. Corona virus and Euglena D. *vibrio cholera* and paramecium

(v) Which organelle is used for respiration in a living cell?
A. Ribosome B. Cell wall C. Mitochondrion D. Chloroplast

(vi) The immunity an individual receive at birth and from breast feeding is known as:
A. Natural active immunity B. Artificial active immunity.
C. Natural passive immunity D. Artificial passive immunity

(vii) The ability of the human body to resist infection by disease causing microorganisms is known as:
A. Immunity B. Inoculation C. Medication D. Vaccination

(viii) The following is an example of a non-communicable disease:
A. Lung cancer B. Cholera C. HIV/AIDS D. Tuberculosis

(ix) Which of the following component is not likely to be found in the First Aid Kit?
A. Pain killers B. Antiseptics C. Medicine for curing the malaria disease D. Sterilized cotton wool

(x) A foreign substance which can cause disease in the body is known as:
A. Antibody B. Antigen C. Vaccine D. Pathogen

Answers

Student's Name: ……

2. Match the item in List A with the correct item in List B by writing its letter below the number of the corresponding item in List A in the table provided.

LIST A	**LIST B**
(i) Causes sleeping sickness in man, which is transmitted by a vector called tsetse fly. (ii) The virus that attack bacteria is known as. (iii)Prokaryotic unicellular microscopic organisms. (iv)Aquatic, photosynthetic, eukaryotic- unicellular organisms that moves by means of flagella. (v) Slipper shaped eukaryotic unicellular organisms, which live in water ponds, move by using cilia and feed on bacteria and other microscopic organisms.	A. Paramecium B. Trypanosome C. Bacteriophage D. Euglena E. Plasmodium F. Amoeba G. Schistosoma H. Bacteria

LIST A	**i**	**ii**	**iii**	**iv**	**v**
LIST B					

SECTION B (70 MARKS)

Answer **ALL** questions in this section

3. (a) Complete each of the following sentences by writing the correct answer.
   (i) A taxonomic rank of organisms which interbreed freely and give rise to viable organisms is known as ……
   (ii) The type of classification which is based on a few observed features is called ……..
   (iii) The highest rank of classification is known as…….
   (iv) The process of sorting living things into groups is called ……

   (b) List six characteristics of amoeba
   (i) …….
   (ii) ……..…….
   (iii) ……
   (iv) ……
   (v) …….
   (vi) …….

4. (a) Giving at least one example of each, differentiate eukaryotic from prokaryotic cells
   ……
   …….

   (b) Give six differences between the plant and animal cells

Plant cell	Animal cell
i.	
ii.	
iii.	
iv.	
v.	
vi.	

Student's Name: ……

5. (a) (i) What do you understand by the term "laboratory"? …….

……

(ii) Outline four qualities of a good laboratory.

……

……

……

……

(b) Mention one function of each of the following apparatus:

(i) Bunsen burner …….

(ii) Test tube ……

(iii) Microscope slide ……..….

(iv) Forceps ……..

(v) Scalpel……

6. (a) Give the five statements from the cell theory

(i) …… ……

(ii) ……..……..

(iii)……

(iv)……

(v) …….

(b)Briefly explain the functions of each of the following cell organelles:

(i) Mitochondrion.……

(ii) Cell membrane……

(iii) Cytoplasm ……..

(iv) Ribosomes…….

(v) Chloroplast……..

7. (a) (i) Define the term 'waste disposal'

…….

……

(ii) Briefly describe any two types of wastes

…….……

…….……

……..

(b) Briefly explain three basic principles of waste management.

(i) ……

(ii) ……..…

(iii) ……..…

8. (a) (i) What is meant by the term "agent of disease"?……

……

(ii) Name the agent for each of the following diseases:

Disease	Agent
(i) Common cold	
(ii) Cholera	
(iii) Dysentery	
(iv) Bilharzia	

(b) Some of the components of the immune system include white blood cells, lymph nodes, spleen, liver, the tonsils and thymus. State the function of each of above mentioned components of the immune system.

(i) White blood cells …….

(ii) Lymph nodes ……

(iii) Spleen ……..……

(iv) Liver ……....

(v) Tonsils and Thymus ……

9. (a) Define the terms First Aid and First Aid Kit

(i) First Aid

……..

…….

(ii) Frist Aid Kit

……

…… …….

(b) Give four importance of First Aid

(i) ……

(ii) ……

(iii)……

(iv) ……

(c) List four common accidents at homes and schools

(i) ……

(ii) ……..

(iii)…….

(iv) ……..

SECTION C (15 MARKS)

Answer the question given

10. Like other organisms, bacteria are very important in our daily lives. Write an essay on the importance of bacteria by giving at least six reasons that shows how or why they are so important.
