THE PRIME MINISTER'S OFFICE

ARUSHA SECONDARY SCHOOL

FORM ONE TERMINAL EXAMINATION 2026

036 – COMPUTER SCIENCE

MARKING SCHEME

SECTION A (15 MARKS)

Q1: Multiple Choice (10 × 1 = 10 marks

Item	Answer
(i)	C
(ii)	B
(iii)	B
(iv)	B
(v)	B
(vi)	D
(vii)	B
(viii)	B
(ix)	B
(x)	C

Q2: Matching (5 × 1 = 5 marks)

List A	Answer
(i) Second generation	D
(ii) Fifth generation	B
(iii) Fourth generation	E
(iv) First generation	C
(v) Third generation	F

SECTION B (70 MARKS)

Q3:

(Each point = 1 mark, any 3 per sector = 3 marks each section)

(a) Agriculture (3 marks)

Any 3:

I. Use of computers in farm management systems
II. Weather forecasting for farming planning
III. Monitoring crop diseases using ICT
IV. Automated irrigation systems
V. Market price information access

(b) Banking (3 marks)

Any 3:

I. Electronic banking (ATM, mobile banking)
II. Record keeping and account management
III. Online money transfer systems
IV. Fraud detection systems
V. Customer database management

(c) Transportation (3 marks)

Any 3:

I. Ticket booking systems
II. Traffic control systems
III. GPS navigation systems
IV. Vehicle tracking systems
V. Airline reservation systems

Q4:

(a) Meaning (3 marks)

A computer system is a set of interrelated components (hardware and software) that work together to process data into information.

(b) Components (4 × 1 = 4 marks)

I. Hardware
II. Software
III. Data
IV. users

(1 mark each: identification + brief explanation)

(c) Types of Hardware (4 × 1 = 4 marks)

I. Input devices
II. Output devices
III. Processing devices
IV. Storage devices

Q5:

(a) Definition (2 marks)

The system unit is the main box of the computer that contains internal components that process and store data.

(b) Internal Components (4 × 1 = 4 marks)

Any 4:

I. CPU
II. RAM
III. Hard disk / SSD
IV. Motherboard
V. Power supply unit

(c) Functions (4 × 1 = 4 marks)

I. CPU: processes instructions
II. RAM: temporary storage for running programs
III. Hard disk/SSD: permanent storage
IV. Motherboard: connects all components together

Q6:

(a) Types of printers (4 marks)

I. Impact printers (strike ribbon to print)
II. Non-impact printers (inkjet/laser, no striking)

(b) Modern printer + advantages (3 marks)

Expected answer: Non-impact printers e.g. **Laser or Inkjet printer**

Any 3 advantages:

I. Fast printing
II. High-quality output
III. Low cost per page (laser)
IV. Quiet operation
V. Easy maintenance

(c) Disadvantages (3 × 1 = 3 marks)

I. Expensive to purchase
II. Requires consumables (toner/ink)
III. Repairs can be costly
IV. Not suitable for heavy industrial printing

Q7: Monitors (12 marks)

(a) Types (2 marks)

I. CRT monitor
II. Flat panel (LCD/LED)

(b) Modern monitor (2 marks)

LCD/LED monitor is commonly used because it is thin, energy efficient, and produces high-quality images.

(c) Advantages (3 × 2 = 6 marks)

I. Energy efficient
II. Sharp image quality
III. Space saving (thin design)
IV. Less eye strain
V. Lightweight

Q8:

(a) Meaning (1 marks)

Secondary memory is non-volatile storage used to permanently store data and programs.

(b) 3 marks

i. Magnetic Storage.
examples Hard disk and Magnetic tape

ii. Optical Storage.
examples CD, DVD and Blu-ray

iii. Flash Storage.
examples USB flash drive, Memory card and SSD

(c) 6 marks

Any 3:

I. Large storage capacity
II. Low cost per GB
III. Permanent storage
IV. Easy data access
V. Can store large files
VI. Widely available

Q9:

(a) Meaning (1 mark)

A touch screen is a display device that allows users to interact by touching the screen directly.

(b) How it works (1mark)

Detects touch using sensors, converts touch into electrical signals and Sends signals to processor and Executes command based on touch location

(c) Functions (3 × 1= 3 marks)

i. Selecting icons
ii. Typing using on-screen keyboard
iii. Zooming in/out and Scrolling pages

(d) Devices (5 marks)

Any 5:

I. Smartphones
II. Tablets
III. ATMs
IV. Self-service kiosks
V. POS machines
VI. Laptops with touch screens

SECTION C (Q10 – 15 MARKS)

Characteristics of a Computer

Any 5 well explained:

i. Speed
ii. Accuracy
iii. Diligence
iv. Storage capacity
v. Automation
vi. Versatility
vii. Reliability

(2 marks each: identification + explanation)

(Introduction and conclusion each 2.5 marks)
