RUSHA REGION TERMINAL EXAMINATION

TEACHER'S MARKING SCHEME

SUBJECT: GEOGRAPHY CLASS: FORM THREE

SECTION A (15 Marks)

Qn1. Multiple choice Questions

Questions	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	ix	x
Answers	C	D	A	D	A	A	B	B	B	A

1@ = 10 marks

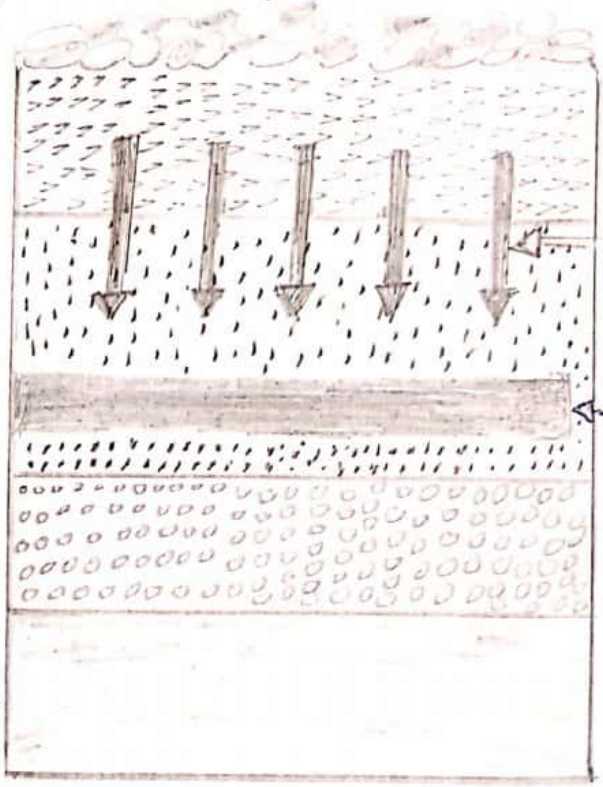

Qn 2.

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B	E	B	C	F	G

1@ = 05 marks.

SECTION B (55 marks)

Qn 3. (a) Diagram of the soil profile.

(4 marks)
1 mark for @ horizon.

Scanned with CamScanner

Scanned with CamScanner

3(a) The horizons layers of the soil profile

There are three horizon layers of the soil profile : There are,

A-Horizon : This is the topmost highly weathered layer which can include Organic Matter to form A_0. It is also called the Zone of Elluviation since it is the layer from which nutrients are washed down through leaching.

2@=(6 Marks)

B-Horizon : It is also called the Zone of illuviation, Since it is the layer where nutrients leached from A horizon and to be accummulated to form hard pan. This layer is rich in Colloids.

C-Horizon : This layer is partially weathered parent rock from which the soil develops! It is underlined by the D horizon which is fresh rock.

Scanned with CamScanner

Scanned with CamScanner

(b) Factors influencing soil formation.

i/ Parent rock.
ii/ Climate
iii/ Living organisms
iv/ Relief / Topography
v/ Time.

1@ = (5 Marks)

Qn 4. (a) Earth quake : Is the sudden movement or shaking of the part of the earth's crust.

(02 marks)

(b) Four effects of the earth quakes.
(Must be briefly explained)

i/ Damage of properties
ii/ Subsidence of the crust
iii/ Death
iv/ Fire outbreak.

4 points 2@ = (8 Marks)

Scanned with CamScanner

Scanned with CamScanner

15 (a) Rock Cycle Is a process in which rocks are continuously transformed between the three rock types. (2 marks)

(b) External structure of the earth are

- Atmosphere : Is a layer of gasses surrounding a planet. It is held in that place by the gravity.
  or, Is a blanket of gases which surrounds earth. Atmosphere support life. (2 marks)

- Hydrosphere : Is the layer which includes water that is on the surface of the planet, Underground, and in the air. Hydrosphere can be liquid, Vapour or ice. Liquid water is in form of Oceans, lakes and rivers. (2 marks)

(10 marks)

- Biosphere ; This is where life exists and occupied by living things (all ecosystems).
  This is the zone of life on ~~earth~~. (2 marks)

(C) Chemical Composition of Igneous rocks is that: They contain Minerals like Iron, Magnesium etc. Also Igneous rocks can be accidic or basic or intermidiate depending on the amount of silica.

(2 marks)

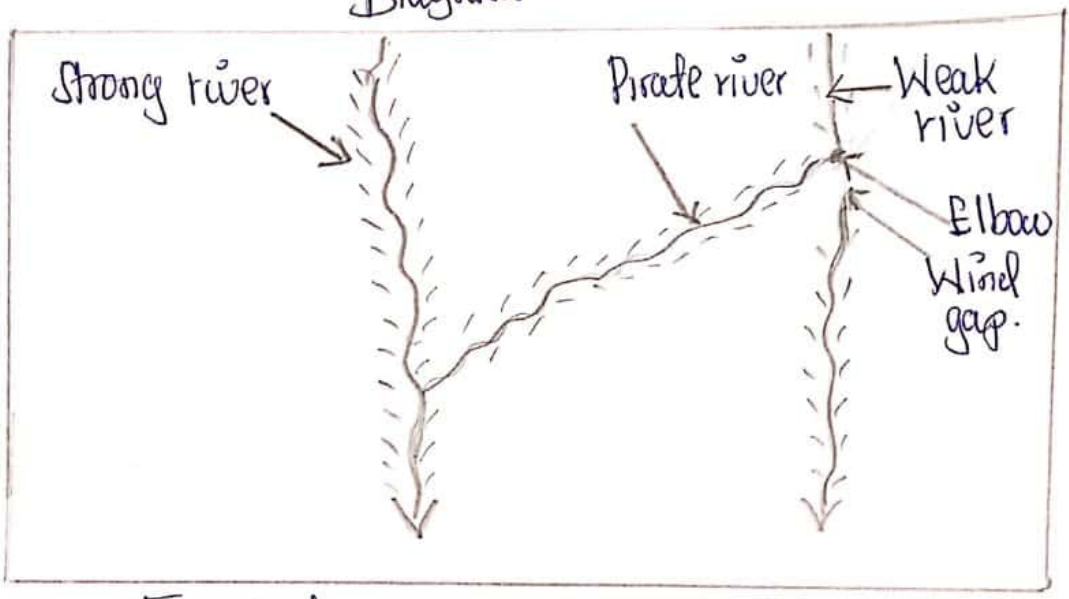

Scanned with CamScanner

Scanned with CamScanner

6 (a) River profile Is the process whereby a stronger river capture a weak river in a condition where a stronger river erodes its valley both Vertically and headward at a faster rate and it flows at a lower level than the weak river. (2 marks)

(b) To describe the features resulting from the river capture with diagram.

Diagram

Four features 2@ =08 Marks.

Qn 7 Factors influencing the rate and nature of Mass Wasting

Mass wasting Is the downward movement of the weathered material on the slope under the influence of gravity without involving the actual transport agent like water, ice and wind. (1 mark)

Factors

a/ Gradient /slope
b/ Climate

Four points 2@ =(8 marks)

Scanned with CamScanner

Scanned with CamScanner

Qn 7. c/ Vegetation
d/ Earth quakes
e/ Vulcanism
f/ Human activities.

SECTION C: (30 Marks)

Qn 8. How tourism industry can improve life standard of people as individual.

Introduction – 2marks.
Mainbody (six factors)
i) Employment
ii/ Improvement of social services 02@
iii/ To get friends / social interaction
iv/ Environmental conservation.
v/ Protection of local culture
vi/ Encourages mobility of people
Conclusion – 1mark

Qn 9. Factors that influence the distribution of forest in the world.

Introduction – 2 marks
Mainbody (six factors)
i/ Differences in amount of rainfall
ii/ Temperature of the place 2@
iii/ Type of soil.
iv/ Relief
v/ Drainage
vi/ Aspect
vii/ Human activities.

Scanned with CamScanner

Scanned with CamScanner

Conclusion – (1 Mark)

Qn10 Contribution of mining sector to the social economic development of Tanzania.

Introduction-(2 marks)

Main body (Six points)

i/ foreign income / foreign currency.

ii) Employment opportunities 2@

iii) Provision of raw materials.

iv/ Development of other sector / industries

v/ Stimulate development of transport system. and communication

vi/ Increase of national income

Conclusion – (01 mark)
